The Death and Life of Great American Cities-Jane Jacobs 2016-07-20 Thirty years after its publication, The Death and Life of Great American Cities was described by The New York Times as "perhaps the most influential single work in the history of town planning....[It] can also be seen in a much larger context. It is first of all a work of literature; the descriptions of street life as a kind of ballet and the biting satiric account of traditional planning theory can still be read for pleasure even by those who long ago absorbed and appropriated the book's arguments." Jane Jacobs, an editor and writer on architecture in New York City in the early sixties, argued that urban diversity and vitality were being destroyed by powerful architects and city planners. Rigorous, sane, and delightfully epigrammatic, Jacobs's small masterpiece is a blueprint for the humanistic management of cities. It is sensible, knowledgeable, readable, indispensable. The author has written a new foreword for this Modern Library edition.

Photography Composition-James Carren 2015-10-09 Master The Art of Photography Composition! Learn All The Right Tricks to Make You A Better Photographer Today (FREE Bonus Inside!) \*\*\* Photography Composition - By Amazon #1 Best-Selling Author James Carren \*\*\* In "Photography Composition," you will find all you need to know to learn the basics of composition. It will teach you the proper terms and ways to apply rules that you might already know instinctively, yet not quite understand why they work the way they do. Here Is A Preview of What You'll Learn In This Book... Happy accidents: This tip teaches you how to pay attention to the following rules in order to replicate happy accidents, and to be able to more purposefully craft your photographs. Rule of thirds: This basic rule of composition is often the first to be learned in many art classes. It teaches you where to place points of interest in your photos. Leading lines: This tip shows you how lines can help move a viewer's eye around the composition. Move around: Don't just stick to one position or vantage point when you shoot. Moving around gives you access to different perspectives, which might actually bring better compositions than what you first assumed. Horizon lines: Different from leading lines, horizon lines break up the frame into two parts. Shape: You will learn how to utilize shape that already exists in the frame, and how to create it where you want it using points of interest. Foreground and background: This tip also mentions usage of mid-ground, and why you should take advantage of the entire depth of your frame, not just the immediate foreground. Weight: You can give weight to your photos by placing a "heavier" subject to one side, or the top or bottom of a frame. Juxtaposition: Juxtaposition has to do with both the composition of your photo as well as the content of your photo. It basically means that you will place two opposite things side by side. This could be anything, from darkness and light, complementary colors, or things that have differing symbolic meaning. Balance: Balance, ironically, you may think, is achieved in odd numbers. Tension: Tension also often has a lot to do with the content of a photo as well. You can create tension by examining the relationships of your subjects and composing them accordingly. Framing: Framing is so very important in composition. It can dramatically alter a viewer's perception of a scene. Also, especially with people, it's important not to cut part of your subject out of the frame. Color: Finally there is color, which can often be used as a crutch by new photographers. However, with this tip you will learn how to properly control it and use it to your advantage for maximum visual and emotional effect. While it may seem overwhelming at first, combining all of these elements will soon become a snap once you learn to recognize them. As your awareness grows, so will your ability to utilize them, and even artfully and successfully break rules as well. So hurry! Take action, scroll back up the page and get your very own copy today!
