Dead Girls Are Easy-Terri Garey 2009-10-13 There's something about almost dying that makes a girl rethink her priorities. Take Nicki Styx—she was strictly goth and vintage, until a brush with the afterlife leaves her with the ability to see dead people. Before you can say boo, Atlanta's ghosts are knocking at Nicki's door. Now her days consist of reluctantly cleaning up messes left by the dearly departed, leading ghouls to the Light . . . and one-on-one anatomy lessons with Dr. Joe Bascombe, the dreamy surgeon who saved her life. All this catering to the deceased is a real drag, especially for a girl who'd rather be playing hanky-panky with her hunky new boyfriend . . . who's beginning to think she's totally nuts. But things get even more complicated when a friend foolishly sells her soul to the devil, and Nicki's new gift lands her in some deep voodoo. As it turns out for Nicki Styx, death was just the beginning.

comprehensive textbook for upper level undergraduates which discusses the nature of heterogeneous systems in the natural environment. The links between and within the various environmental compartments - air, water, soil - are emphasized. The book describes the chemistry of natural systems, their composition and the processes and reactions that operate within and between the various compartments. Without focusing specifically on pollution, it also discusses ways in which these systems respond to perturbations, either those that are natural or those that are caused by humans. Background material from subjects such as atmospheric science, limnology, and soil science is provided in order to establish a setting for a description of the relevant chemistry. Emphasis is on general principles that can be applied in a variety of circumstances. At the same time, these principles are illustrated with examples taken from around the world. Because of issues of the environment related to every society, care has been taken to relate the subject material to situations in urban and rural areas in both highly industrialized and low-income countries.

Love in a Time of Loneliness-Paul Verhaeghe 2011-10 Noted Belgian psychoanalyst Paul Verhaeghe shows us what it is about sex that both keeps us moving and inhibits us at the same time. The first essay, The Impossible Couple, is both a humorous and razor-sharp analysis of the contemporary relationship between man and woman. In the second essay, Fleeing Fathers, the author demonstrates that today the Freudian Oedipus complex has disappeared, with a resulting shattering of classic gender roles. Post-modern morals are strange compared to previous morality, because they convey an obligation to enjoy. Things become even stranger when one finds that the expected enjoyment fails to come and, instead of that, we are faced with boredom, anxiety, and anger. The reasons for this are discussed in the third essay, The Drive. Today, sexual abuse is omnipresent, with the male in the role of offender, women and children reduced to his victims. Paul Verhaeghe reconsiders the opposition between Eros and Thanatos as an opposition between two forms of sexual pleasure. The fact that this opposition is ever present in heterosexual love demonstrates that gender differentiation goes beyond temporal cultural forms.

Finance for Executives: Managing for Value Creation-Gabriel Hawawini 2010-09-22 Ideal for both aspiring managers and experienced executives, the Fourth Edition of FINANCE FOR EXECUTIVES: MANAGING FOR VALUE CREATION illustrates the importance of financial information in maximizing firm value. Respected authors Gabriel Hawawini and Claude Viallet draw on their wealth of business and teaching experience to provide a concise, analytically sound introduction to financial management that is neither too simplistic nor too theoretical. In fact, the text masterfully balances a thorough exploration of modern finance principles with a strong practical focus on real-world applications and rigorous analysis, even while avoiding complicated formulas with little value for decision-making. Perfect for executive education courses, M.B.A. programs, or any class with an emphasis on translating theory into practice or learning through real-world cases, FINANCE FOR EXECUTIVES employs a strong problem-

scenario approach to present key concepts within the context of realistic financial management issues that executives commonly face. In addition, a series of integrated case studies analyzes the same set of companies throughout the text to explore concepts in greater depth and reinforce learning. The new Fourth Edition maintains the text's highly reader-friendly structure and presentation. Because each chapter is self-contained, instructors can enjoy great flexibility in structuring their courses, while students will find the text an invaluable reference and resource to use throughout their careers. In addition, the current edition features extensive updates incorporating the most recent financial data and latest references, as well as a new chapter devoted to managing corporate risk, an essential topic for success in today's high-stakes business environment. Xeelee: An Omnibus-Stephen Baxter 2010-03-18 Stephen Baxter's epic sequence of Xeelee novels was introduced to a new generation of readers with his highly successful quartet, *Destiny's Children*, published by Gollancz between 2003 and 2006. But the sequence of novels began with *RAFT* in 1991. From there it built into perhaps the most ambitious fictitious universe ever created. Beginning with the rise and fall of sub-quantum civilisations in the first nano-seconds after the Big Bang and ending with the heat death of the universe billions of years from now the series charts the story of mankind's epic war against the ancient and unknowable alien race the Xeelee. Along the way it examines questions of physics, the nature of reality, the evolution of mankind and its possible future. It looks not just at the morality of war but at the morality of survival and our place in the universe. This is a landmark in SF.

Spray Finishing-Andy Charron 1996 A professional-looking finish is the dream of most woodworkers. One way to achieve it is through modern spray finishing. Spray finishing is a lot less trouble than it used to be - recent technological breakthroughs have made a previously messy and expensive process safer, easier and cheaper. The development of water-based finishes and HVLP spray systems has put spray finishing within the grasp of any small-shop woodworker willing to learn the technique and make a modest investment in equipment. Andy Charron, a professional woodworker, has been experimenting with spray finishes for some years and has experience with a number of systems. He has put this expertise into a comprehensive volume that explains the entire process. Charron describes how each system works and how to choose the system that's right for the kind of work you do - from guns and spray booths to compressors, turbines, air lines, filters and safety equipment. You'll also learn how to work with lacquers, crosslinked finishes, shellac, polyurethane and water-based finishes; how to color, stain and tone the wood; how to spray contact cement; and how to clean your equipment when you're done. A troubleshooting chart at the end of the book will help you identify and solve problems at a glance.
