Tribal Libraries, Archives, and Museums-Loriene Roy 2011-10-10 Hundreds of tribal libraries, archives, and other information centers offer the services patrons would expect from any library: circulation of materials, collection of singular items (such as oral histories), and public services (such as summer reading programs). What is unique in these settings is the commitment to tribal protocols and expressions of tribal lifeways—from their footprints on the land to their architecture and interior design, institutional names, signage, and special services, such as native language promotion. This book offers a collection of articles devoted to tribal libraries and archives and provides an opportunity for tribal librarians to share their stories, challenges, achievements, and aspirations with the larger professional community. Part one introduces the tribal community library, providing context and case studies for libraries in California, Alaska, Oklahoma, Hawai'i, and in other countries. The role of tribal libraries and archives in native language recovery and revitalization is also addressed in this section. Part two features service functions of tribal information centers, addressing the library facility, selection, organization, instruction, and programming/outreach. Part three includes a discussion of the types of records that tribes might collect, legal issues, and snapshot descriptions of noteworthy archival collections. The final part covers strategic planning, advice on working in the unique environments of tribal communities, advocacy and marketing, continuing education plans for library staff, and time management tips that are useful for anyone working in a small library setting.

American Streamlined Design-Samuel Gibson 2005 "The twentieth century loved machines and the speed they made possible. Speeding cars, trains, and planes promised to conquer space and time; their aerodynamic styling and metal skins embodied a new and modern beauty, one that especially enchanted American designers from the late 1920s through the 1950s. Streamlining became the popular American style for all sorts of objects: from toy scooters to typewriters, from power tools to teakettles." "This book celebrates this beauty as epitomized by the work of Raymond Loewy, Kem Weber, Henry Dreyfuss, Norman Bel Geddes, as well as in works by many lesser-known industrial designers whose products are presented here for the first time. The book also demonstrates the resurgence of interest in streamlining among international vanguard designers from the 1980s to the present." "This volume is illustrated with patent drawings and period photographs showing how these dynamically styled objects were used. The one hundred eighty objects presented here, drawn from the Eric Brill Collection (recently donated to the American Friends of Canada) and supplemented by pieces from the Stewart Collection at the Montreal Museum of Fine Arts, were photographed for this book. A full bibliography, biographies of the designers, and index complete the study."--BOOK JACKET.
