Fiat Tractors-William Dozza 2012-01-01 Fiat's first agricultural tractor was presented to the civil and military authorities of Turin in 1918 and marketed the following year by the Federation of Agricultural Consortia. This book uses original photographic documentation to illustrate the origins and development of the company's agricultural products, tackling the technical and human aspects of a story that has seen the introduction of over 500 models since 1918. This is the first comprehensive study of the Turin-based firm's history in the agricultural sector. This updated edition includes all the new Holland new series presented from 2008 up to 2011.

Handbook of Atopic Eczema-Thomas Ruzicka 2013-03-09 State-of-the-art review on atopic eczema, one of the most common skin diseases today. This multi-authored handbook covers all aspects relevant for physicians from various disciplines.

Decrypted Secrets-F.L. Bauer 2013-03-09 Cryptology, for millennia a "secret science", is rapidly gaining in practical importance for the protection of communication channels, databases, and software. Beside its role in computerized information systems, cryptology is finding more and more applications inside computer systems and networks, extending to access rights and source file protection. The first part of this book treats secret codes and their uses - cryptography - before moving on to the process of covertly decrypting a secret code - cryptanalysis. Spiced with a wealth of exciting, amusing, and occasionally personal stories from the history of cryptology, and presupposing only elementary mathematical knowledge, this book will also stimulate general readers.

The Anatomy of Entrepreneurial Decisions-Andrea Caputo 2019-08-02 The creation, success and long-term survival of enterprises are fundamentally linked to the effectiveness of decision-making processes and negotiation capabilities. This book provides an overview of research into how decisions permeate entrepreneurial ventures throughout their lifecycle. A multidisciplinary approach combining psychology, sociology and political science is used to investigate how entrepreneurs address and deal with decision-making. The respective contributions highlight the latest empirical, theoretical and meta-research, and bridge the gap between literature on entrepreneurship, entrepreneurial and innovative behaviours with that on decision-making and negotiation. This book is one of the first to combine these streams of research, thereby offering a new and insightful addition to the field of entrepreneurship.

Free Culture-Lawrence Lessig 2016-07-30 Lawrence Lessig, "the most important thinker on intellectual property in the Internet era", masterfully argues that never before in human history has the power to control creative progress been so concentrated in the hands of the powerful few, the so-called Big Media. Never before have the cultural powers- that-be been able to exert such control over what we can and can't do with the culture around us. Our society defends free markets and free speech; why then does it permit such top-down control? To lose our long tradition of free culture, Lawrence Lessig shows us, is to lose our freedom to create, our freedom to build, and, ultimately, our freedom to imagine.

The Two Faces of Islam-Stephen Schwartz 2003-09-09 Since its formation in 1932, Saudi Arabia has been ruled by two interdependent families. The Al Sa'uds control politics and the descendants of Ibn Abd al-Wahhab impose Wahhabism—a violent, fanatical perversion of the pluralistic Islam practiced by most Muslims. Stephen Schwartz argues that Wahhabism, vigorously exported with the help of Saudi oil money, is what incites Palestinian suicide bombers, Osama bin Laden, and other Islamic terrorists throughout the world. Schwartz reveals the hypocrisy of the Saudi regime, whose moderate facade conceals state-sponsored repression and terrorism. He also raises troubling questions about Wahhabi infiltration of America's Islamic community and about U.S. oil companies sanitizing Saudi Arabia's image for the West. This sharp analysis and eye-opening expose illuminates the background to the September 11th terrorist attacks and offers new approaches for U.S. policy toward its closest ally in the Middle East.

A Text-book of Church History-Johann Karl Ludwig Gieseler 1871

Preserving New York-Anthony Wood 2013-10-28 Preserving New York is the largely unknown inspiring story of the origins of New York City's nationally acclaimed landmarks law. The decades of struggle behind the law, its intellectual origins, the men and women who fought for it, the forces that shaped it, and the buildings lost and saved on the way to its ultimate passage, span from 1913 to 1965. Intended for the interested public as well as students of New York City history, architecture, and preservation itself, over 100 illustrations help reveal a history richer and more complex than the accepted myth that the landmarks law sprang from the wreckage of the great Pennsylvania Station. Images include those by noted historic photographers as well as those from newspaper accounts of the time. Forgotten civic leaders such as Albert S. Bard and lost buildings including the Brokaw Mansions, are unveiled in an extensively researched narrative bringing this essential episode in New York's history to future generations tasked with protecting the city's landmarks. For the first time, the story of how New York won the right to protect its treasured buildings, neighborhoods and special places is brought together to enjoy, inform, and inspire all who love New York.

An Oak Spring Pomona-Sandra Raphael 1990-12-26 An Oak Spring Pomona is the second in a series of catalogues describing selections of rare books and other material in the Oak Spring Garden Library, a collection formed by Mrs. Paul Mellon. The Pomona describes one hundred books and manuscripts about fruit, with illustrations taken from some of the most beautiful books on the subject as well as from original drawings and paintings. The earliest book described is Bussatos Giardino di Agricoltura of 1592, the latest The Herefordshire Pomona, an encyclopedia of apples and pears from the 1870s. In between there are fruit books large and small: La Quintinie's Instruction pour les Jardins fruitiers, Duhamel's Traite des arbres fruitiers, and many others. The book is divided into sections on fruit-growing in France and Britain, fruit elsewhere in Europe, and fruit in America, as well as citrus fruit, apples and pears, peaches and soft fruit, grapes, melons, and tropical fruit. Each description gives the background of the book and its relationship to others and is accompanied by illustrations of its contents in color and black and white. The Pomona includes not only brief bibliographical summaries of each book but also background wssays that place the books in a historical setting.

The series is an invaluable resource for the classic car enthusiast and a must have for owners interested in performing their own maintenance.

Samuelson and Neoclassical Economics-G. Feiwel 2012-12-06 This is not a festschrift, but a study of the prodigious Samuelson phe nomenon, his history-making contributions to and impact on the econom ic's of our age, and the intricate, often perplexing, and divergent trends in modern economics - all intensely controversial subjects that will be argued, scrutinized, and periodically reassessed by economists of various strands and traditions for years to come, for, as Samuelson wrote of Pigou, "immortality does have its price." A scholar with such an outstanding body of contributions "must expect other men to swarm about it" (1966, p. 1233), subject it to scholarly scrutiny, and challenge it. Although Paul Samuelson was 65 on May 15, 1980 (and our best wishes go out to him for long life and continued enrichment of economics), this is neither a birthday party nor a gathering of only the Good Fairies, for, as he himself has said of Marx, "a great scholar deserves the compliment of being judged seriously" and critically (1972, p. 268). In accordance with the rule of Roman law, *audiatur et altera pars*, I have invited representative scholars of widely divergent perceptions to offer their critical evaluation of the "age of Samuelson." While the response was by and large gratifying, some scholars were unable to meet the deadline, ix x PREFACE and with much compunction I have had to expand my own essays to partly fill the gaps.

The Natural Law-Heinrich Albert Rommen 1998 Originally published in German in 1936, The Natural Law is the first work to clarify the differences between traditional natural law as represented in the writings of Cicero, Aquinas, and Hooker and the revolutionary doctrines of natural rights espoused by Hobbes, Locke, and Rousseau. Beginning with the legacies of Greek and Roman life and thought, Rommen traces the natural law tradition to its displacement by legal positivism and concludes with what the author calls "the reappearance" of natural law thought in more recent times. In seven chapters each Rommen explores "The History of the Idea of Natural Law" and "The Philosophy and Content of the Natural Law." In his introduction, Russell Hittinger places Rommen's work in the context of contemporary debate on the relevance of natural law to philosophical inquiry and constitutional interpretation. Heinrich Rommen (1897-1967) taught in Germany and England before concluding his distinguished scholarly career at Georgetown University. Russell Hittinger is William K. Warren Professor of Catholic Studies and Research Professor of Law at the University of Tulsa.

Zierath: Lord of the Alliance-M. David Loyal 2007-06-01 Welcome to the Achar, a huge rotating mobius strip encircling a yellow sun. The Achar is home to hundreds of sentient races, bizarre monsters, thousands of countries, and the Imrhy's, a race of immortal humans with great magical abilities who believe it is their responsibility to save the world. More than three thousand years have passed since the last great Gnarrhys War, but Lord Zierath and his fellow Imrhy's still remember it. More than half of all the sentients on the Achar died in that war. Now, rumors of a darkness forming off in the west set Zierath out on a quest to gather allies, armies, and information before the darkness envelops them all. Of course, the first trick is to get out of the tedious administrative duties of ruling a large confederation of countries. Zierath's solution is simple. Sneak out of the castle, city, and country before the regent can stop him. However, if the regent can see into the future, things can get complicated very quickly.

In Its Corporate Capacity-Brian J. Young 1986 Since the 1660s, the Seminary of Montreal -- a French, male religious community -- had been an integral part of the merchant, seigneurial, and clerical elite that dominated Montreal. Its significance in pre-industrial society was strengthened by its role as seigneur of Montreal Island and titular parish priest. The Seminary survived the British conquest, but came under increasing attack in the early nineteenth century from industrial producers and large capitalists landlords who resented the Seminary's seigneurial expropriations. By the 1830s, anticlerical elements in the peasantry and other popular classes had joined in the attack.

Something for the Weekend-Jamie Oliver 2005 Every book tells a story And the 70 titles in the Pocket Penguins series are emblematic of the renowned breadth of quality that formed part of the original Penguin vision in 1935, and that continues to define our publishing today. Together, they tell one version of the unique story of Penguin. unknown when he became a Penguin author in 1999. Six TV series and worldwide sales of more than eight million copies of his five books later, he is one of the UK's favourite chefs and an international celebrity who has changed the face of the cookbook. In Something for the Weekend, Jamie pulls together a selection of crowd-pleasers to liven up anybody's Sunday dinner, whether you're partial to traditional fare or you're looking for something a bit more adventurous.

Feminism and the Politics of Travel After the Enlightenment-Yael Rachel Schlick 2012-01 Taking the Enlightenment and the feminist tradition to which it gave rise as its historical and philosophical coordinates, Feminism and the Politics of Travel After the Enlightenment explores the coincidence of feminist vindications and travel in the late eighteenth and nineteenth centuries, the way travel's utopian dimension and feminism's utopian ideals have intermittently fed off each other in productive ways. Travel's gender politics is analyzed in the works of J.-J. Rousseau, Mary Wollstonecraft, Stéphanie-Félicité de Genlis, Germaine de Staël, Frances Burney, Flora Tristan, Suzanne Voilquin, Gustave Flaubert George Sand, Robyn Davidson, and Sara Wheeler.

Howling at the Moon-Walter Yetnikoff 2004-03-02 Show biz memoir at its name-dropping, bridge-burning, profane best: the music industry's most outspoken, outrageous, and phenomenally successful executive delivers a rollicking memoir of pop music's heyday. During the 1970s and '80s the music business was dominated by a few major labels and artists such as Michael Jackson, Bruce Springsteen, the Rolling Stones, Bob Dylan, Billy Joel, Paul Simon, Barbra Streisand and James Taylor. They were all under contract to CBS Records, making it the most successful label of the era. And, as the company's president, Walter Yetnikoff was the ruling monarch. He was also the most flamboyant, volatile and controversial personality to emerge from an industry and era defined by sex, drugs and debauchery. Having risen from working-class Brooklyn and the legal department of CBS, Yetnikoff, who freely admitted to being tone deaf, was an unlikely label head. But he had an uncanny knack for fostering talent and intimidating rivals with his appalling behavior—usually fueled by an explosive combination of cocaine and alcohol. His tantrums, appetite for mind-altering substances and sexual exploits were legendary. In Japan to meet the Sony executives who acquired CBS during his tenure, Walter was assigned a minder who confined him to a hotel room. True to form, Walter raided the minibar, got blasted and, seeing no other means of escape, opened a hotel window and vented his rage by literally howling at the moon. In Howling at the Moon, Yetnikoff traces his journey as he climbed the corporate mountain, danced on its summit and crashed and burned. We see how Walter became the father-confessor to Michael Jackson as the King of Pop reconstructed his face and agonized over his image while constructing Thriller (and how, after it won seven Grammys, Jackson made the preposterous demand that Walter take producer Quincy Jones's name off the album); we see Walter, in maniacal pursuit of a contract, chase the Rolling Stones around the world and nearly come to blows with Mick Jagger in the process; we get the tale of how Walter and Marvin Gaye—fresh from the success of "Sexual Healing"—share the same woman, and of how Walter bonds with Bob Dylan because of their mutual Jewishness. At the same time we witness Yetnikoff's clashes with Barry Diller, David Geffen, Tommy Mottola, Allen Grubman and a host of others. Seemingly, the more Yetnikoff feeds his cravings for power, sex, liquor and cocaine, the more profitable CBS becomes—from \$485 million to well over \$2 billion—until he finally succumbs, ironically, not to substances, but to a corporate coup. Reflecting on the sinister cycle that left his career in tatters and CBS flush with cash, Yetnikoff emerges with a hunger for redemption and a new reverence for his working-class Brooklyn roots. Ruthlessly candid, uproariously hilarious and compulsively readable, Howling at the Moon is a blistering You'll Never Eat Lunch in this Town Again of the music industry.

Cantos 85-95-Ezra Pound 1955

Architects' Data-Ernst Neufert 1991-01-15 This is an essential aid in the initial design and planning of a project. The relevant building type is located by a comprehensive index and cross reference system, a condensed commentary covers user requirements, planning criteria, basic dimensions and other considerations of function, siting aspect etc. A system of references based on an extensive bibliography supports the text. In every section plans, sections, site layouts, design details and graphs illustrated key aspects of a building type's design. Most illustrations are dimensioned or scaled - the metric system of measurement is used throughout, and the equivalent in feet/inches can easily be read either off a graphic scale on the page or from the built-in conversion table. The illustrations are international in origin and include both well know and less famous designers. Architects Data is primarily a handbook of building types rather than of construction techniques and details. However its treatment of components (such as doors and windows) and of spaces for building services is extremely thorough, since consideration of this data is an essential element of the planning process. The opening pages of basic data on man and his buildings cover critical subjects such as scale, drawing practice, noise, light and space for the same reason. Particular attention has also been paid to the implications of energy conservation, means of escape from fire and the needs of the elderly and the disabled.

Just a Spoonful of Laughter Helps the Medicine Go Down-Richard D. Edgerly, MD 2011-03-29 Just a Spoon Full of Laughter...is a great read for anyone that's been to a doctors office and made it out alive. Written by an actual physician, it will keep you in stitches (no pun intended) from one story to the next. See for yourself what could be so funny about the physician office visit. Whether it's recalling his first sigmoidoscopy or performing an autopsy, you'll keep this riveting series of short humorous stories right there in the bathroom for pleasurable reading. You may even find yourself somewhere between the pages. From an author who will never be a New York Times Best Seller, it's a great book for young or old, male or female, professional or not. It's especially ideal for that person in your life who has everything except a sense of humor. It's ideal as a stocking stuffer, white elephant gift or for future yard sales. "The funniest book I ever read." Says Dr. Zhivago "Yes! Yes! Yes!" Says Dr. No

The Economics of Regional Clusters-Uwe Blien 2008-01-01 This important new book takes a critical view on regional industry clusters, in particular their identification and formation, and the policies which help create and support them.

Introduction To Computers (Sie)-Norton 2010

Power, Process and Participation-Rachel Slocum 1995 This book focuses on participatory capacity-building in ways that address the practical needs and strategic interests of the disadvantaged and disempowered - it examines how differences in class, ethnicity, race, caste, religion, age and gender lead to the 'politics of exclusion'. It offers innovative, accessible tools to enable facilitators from both inside and outside communities to empower those who are frequently omitted from decision-making processes. The style and approach are interactive, stimulating reflection and involvement by all parties. Power, Process and Participation aims to enable facilitators from inside and outside communities to involve and empower those commonly excluded in decision making processes. It provides a balanced overview of how 'participation' has been used in this context and raises the questions that all those involved in this type of activity should ask themselves. There are three distinct sections: Part 1: Definitions, history and issues - which provides an overview of some of the broad issues underlying the themes addressed in this book. A useful brief history is given of well known participatory methodologies and key questions are asked on the use and misuse of 'participation': whose ends does it serve, who is involved and what are the power relations, appropriate time frames and scale and how should it proceed in order to best serve the interests of the people involved? Part 2: Methods and ethics in our research and our use of the mediaN251pp - Whose expertise counts? How is it acknowledged? These are explored in the context of contributors' experience of undertaking research with women in Zimbabwe. Questions of ownership and consent as well as other issues are discussed further in the context of the use of video in participatory communication. Part 3: Tools for environmental and social change - The longest section in the book gives 35 tools and how to use them in facilitating participation. An introductory session explains how to use the section. Tools are cross referenced and for each the purpose, materials, process and estimated time is provided. For a number of the tools, examples of how they have been used in practice are included. Power, Process and Participation describes itself as a manual and although it does not immediately look like one, it is readable, logically arranged and combines instructions on how tools can be used with examples of how they have been used in practice. There are notes on how to use the book and how to choose from the tools offered. This book would be useful to anyone looking for both an overview of participation and how it can be used and misused; and guidance on facilitating the process.

Dictionary of Civil Engineering-Jean-Paul Kurtz 2004-09-14 I am pleased to present a work which marks a milestone in the history of public works and, more precisely, in that of permanent structures—a comprehensive dictionary of Civil Engineering terms. Since the beginning of time, Man has always tried to find a means to clear the obstacles which nature erected to displace him. With the first tree trunk thrown across a river, man sought to improve the crossing structure. After the invention of the wheel, and to satisfy his thirst for conquest (Roman ways), and comfort (aqueducts), man built bridges that became a preemporty necessity to move quickly. Thus, Man started to build wooden and masonry works. With the passing centuries, the builders became masters in the art of building masonry works. Then came the Industrial Revolution and the advent of the steel (1864), which was closely followed by the invention of the reinforced concrete (1855). The need for railways and improving the road network inspired great works of crossing such as viaducts and tunnels. The boom of the railway network and the development of the car required the construction of an increasing number of new structures. This phenomenon continues today with hundreds of structures built each year throughout the world.

Mercedes-Benz W124-James Taylor 2015-05-31 Designed by Mercedes's head of design Bruno Sacco, the W124 range immediately became the benchmark by which medium-sized car models were judged in the late 1980s due to its engineering excellence and high build quality. There was a model to suit every would-be-buyer, from the taxi driver through the family motorist and on to those who were willing and able to pay for luxury and performance. This book covers: design, development and manufacture of all models of W124 including estates, cabriolets and the stylish coupe range; engines and performance; special editions and AMG models and, finally, buying and owning a W124 today. Superbly illustrated with 264 colour photographs.

The Talmud in Dispute During the High Middle Ages-Fidora, Alexander 2019-12-17 The Christian discovery of the Babylonian Talmud is a significant landmark in the long and complex history of anti-Jewish polemic. While the Talmudic corpus developed in the same period as early Christianity, this post-biblical text was largely unknown to the Christians. Full awareness of the Talmud among Christian authors did not arise until the late 1230s, when the Jewish convert Nicholas Donin presented a Latin translation of Talmudic fragments to Pope Gregory IX. Though the Talmud was subsequently put on trial (1240) and burnt (1241/2) in Paris, the controversy surrounding it continued over the following years, as Pope Innocent IV called for a revision of its condemnation. The textual basis for this revision is the Extractions de Talmud, that is, a Latin translation of 1.922 Talmudic fragments. The articles in this volume shed new light on this monumental translation and its historical context. They also offer critical editions of related texts, such as Donin's anti-Talmudic polemic. Authors of the contributions are: Wout van Bekkum, Piero Capelli, Ulisse Cecini, Enric Cortés, Óscar de la Cruz Palma, Federico Dal Bo, Alexander Fidora, Görg K. Hasselhoff, Moisés Orfali, Ursula Ragacs and Eulàlia Vernet i Pons.

Carlo Sigonio-William McCuaig 2014-07-14 William McCuaig explores the intellectual turbulence of the late Italian Renaissance through a full examination of the work of one scholar—the humanist Carlo Sigonio (1523-84), whose insistence on critical methods for reconstructing the past revolutionized the study of ancient Roman history and the Italian Middle Ages. An internationally published scholar caught in the political tension of the Counter-Reformation, Sigonio was harshly censored by ecclesiastical authorities in Rome, who opposed his application of critical methods to the history of the post-classical world. McCuaig traces Sigonio's interactions with his opponents and supporters, both academic and clerical, to provide a fascinating and detailed portrait of a cultural milieu. On a general level, this study of Sigonio's works helps explain how the republican ethos of the Italian Renaissance came to an end and how the modern study of ancient history evolved in Italy and France after 1550. Among many topics, this book emphasizes Sigonio's contributions to social history, and points to parallels between the changing social stratifications of ancient Rome and those of early modern Italy. Interdisciplinary in its approach, the work also touches upon the history of education, political theory, the book trade, and historiography. Originally published in 1989. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.
