Motivational Interviewing and Stages of Change-Kathyleen M. Tomlin 2005-04-28 Motivational Interviewing and Stages of Change without CE Hours Test

Quantum Change-William R. Miller 2011-10-21 Most of us walk through each day expecting few surprises. If we want to better ourselves or our lives, we map out a path of gradual change, perhaps in counseling or psychotherapy. Psychologists William Miller and Janet C'de Baca were longtime scholars and teachers of traditional approaches to self-improvement when they became intrigued by a different sort of change that was sometimes experienced by people they encountered--something often described as "a bolt from the blue" or "seeing the light." And when they placed a request in a local newspaper for people's stories of unexpected personal transformation, the deluge of responses was astounding. These compelling stories of epiphanies and sudden insights inspired Miller and C'de Baca to examine the experience of "quantum change" through the lens of scientific psychology. Where does quantum change come from? Why do some of us experience it, and what kind of people do we become as a result? The answers that this book arrives at yield remarkable insights into how human beings achieve lasting change--sometimes even in spite of ourselves.

Mental Disorders, Medications, and Clinical Social Work-Sonia G. Austrian 2005-02-16 Written for social workers by a social worker, Mental Disorders, Medications, and Clinical Social Work discusses the etiology, epidemiology, assessment, and intervention planning for common mental disorders. Austrian's discussion of effective intervention(s) for a particular client also stresses the importance of working with families in treating disorders. In addition to information on new medications, biochemical data on the causes of disease, and diagnostic tests, the revised third edition discusses therapies such as motivational interviewing, cognitive-behavioral, interpersonal, and dialectic.

Kindred-Octavia E. Butler 2004-02-01 The visionary author's masterpiece pulls us—along with her Black female hero—through time to face the horrors of slavery and explore the impacts of racism, sexism, and white supremacy then and now. Dana, a modern black woman, is celebrating her twenty-sixth birthday with her new husband when she is snatched abruptly from her home in California and transported to the antebellum South. Rufus, the white son of a plantation owner, is drowning, and Dana has been summoned to save him. Dana is drawn back repeatedly through time to the slave quarters, and each time the stay grows longer, more arduous, and more dangerous until it is uncertain whether or not Dana's life will end, long before it has a chance to begin.

early days, Barack Obama “guides us straight to the intersection of the most serious questions of identity, class, and race” (The Washington Post Book World). “Quite extraordinary.”—Toni Morrison In this lyrical, unsentimental, and compelling memoir, the son of a black African father and a white American mother searches for a workable meaning to his life as a black American. It begins in New York, where Barack Obama learns that his father—a figure he knows more as a myth than as a man—has been killed in a car accident. This sudden death inspires an emotional odyssey—first to a small town in Kansas, from which he retraces the migration of his mother’s family to Hawaii, and then to Kenya, where he meets the African side of his family, confronts the bitter truth of his father’s life, and at last reconciles his divided inheritance. Praise for *Dreams from My Father* “Beautifully crafted . . . moving and candid . . . This book belongs on the shelf beside works like James McBride’s *The Color of Water* and Gregory Howard Williams’s *Life on the Color Line* as a tale of living astride America’s racial categories.”—Scott Turow “Provocative . . . Persuasively describes the phenomenon of belonging to two different worlds, and thus belonging to neither.”—The New York Times Book Review “Obama’s writing is incisive yet forgiving. This is a book worth savoring.”—Alex Kotlowitz, author of *There Are No Children Here* “One of the most powerful books of self-discovery I’ve ever read, all the more so for its illuminating insights into the problems not only of race, class, and color, but of culture and ethnicity. It is also beautifully written, skillfully layered, and paced like a good novel.”—Charlayne Hunter-Gault, author of *In My Place* “*Dreams from My Father* is an exquisite, sensitive study of this wonderful young author’s journey into adulthood, his search for community and his place in it, his quest for an understanding of his roots, and his discovery of the poetry of human life. Perceptive and wise, this book will tell you something about yourself whether you are black or white.”—Marian Wright Edelman

deepen personal relationships, alleviate conflict, communicate across differences, and promote positive change. Motivational Interviewing for Health Care Professionals-Bruce A. Berger 2019-12-16 This highly anticipated second edition features two all-new chapters, including The Human Brain and Social Threat: Impact on Patients and Health Care Professionals and How Do I Know What Skill to Use? Both chapters result from what the authors have learned from their interactions over the past six years with their students and health care professionals. The authors have applied motivational interviewing to the complex behavior change that is central to patients being able to manage chronic illnesses such as diabetes, high blood pressure, high cholesterol, and osteoporosis.. This book identifies critical interactional dynamics to assist health care providers (HCP's) in developing a conversational "flow" with the patient. How does empathic understanding create a relationship that allows patients to discuss barriers (and benefits) to managing their illnesses? How can the HCP guide patients to choices they can make to manage their illnesses? How do we encourage patients to talk about how they make sense of their illnesses and what is happening to them? Using MI will enable you to communicate with your patients in a clear, concise, and sensible way that helps open your patients to the possibility of behavior change.
