Crossing Borders in Community Interpreting-Carmen Valero Garcés 2008 At conferences and in the literature on community interpreting there is one burning issue that reappears constantly: the interpreter s role. What are the norms by which the facilitators of communication shape their role? Is there indeed only one role for the community interpreter or are there several? Is community interpreting aimed at facilitating communication, empowering individuals by giving them a voice or, in wider terms, at redressing the power balance in society? In this volume scholars and practitioners from different countries address these questions, offering a representative sample of ongoing research into community interpreting in the Western world, of interest to all who have a stake in this form of interpreting. The opening chapter establishes the wider contextual and theoretical framework for the debate. It is followed by a section dealing with codes and standards and then moves on to explore the interpreter s role in various different settings: courts and police, healthcare, schools, occupational settings and social services.

Multilingual Corpora and Multilingual Corpus Analysis-Thomas Schmidt 2012 This volume deals with different aspects of the creation and use of multilingual corpora. The term 'multilingual corpus' is understood in a comprehensive sense, meaning any systematic collection of empirical language data enabling linguists to carry out analyses of multilingual individuals, multilingual societies or multilingual communication. The individual contributions are thus concerned with a variety of spoken and written corpora ranging from learner and attrition corpora, language contact corpora and interpreting corpora to comparable and parallel corpora. The overarching aim of the volume is first to take stock of the variety of existing multilingual corpora, documenting possible corpus designs and uses, second to discuss methodological and technological challenges in the creation and analysis of multilingual corpora, and third to provide examples of linguistic analyses that were carried out on the basis of multilingual corpora.

Cross-Cultural Health Translation-Meng Ji 2019-06-04 Health translation represents a critical yet underexplored research field in Translation Studies. High-quality health translation represents an integral part in the development of multicultural health resources. The empirical study and evaluation of health translations, and the establishment of effective health translation methods and models, holds the key to the success of multicultural health communication and promotion. Chapters in this book aim to fill in a persistent knowledge gap in current multicultural health research, that is, culturally effective and user-oriented healthcare translation. Research presented in this book points to an important opportunity to improve and enhance current multicultural healthcare services based on empirical, evidence-based health translation studies. Health translation provides a powerful intervention tool to engage with migrants with diverse language, cultural backgrounds and health literacy levels. This book provides much-needed reading in the emerging research field of healthcare translation. It makes useful and original contributions to this emerging research field through the exploration of culturally effective health translation methods, approaches and models, as well as the development and evaluation of digital health translation resources and tools.

Multilingual Practices in Language History-Päivi Pahta 2017-12-18 Texts of the past were often not monolingual but were produced by and for people with bi- or multilingual repertoires; the communicative practices witnessed in them therefore reflect ongoing and earlier language contact situations. However, textbooks and earlier research tend to display a monolingual bias. This collected volume on multilingual practices in historical materials, including code-switching, highlights the importance of a multilingual approach. The authors explore multilingualism in hitherto neglected genres, periods and areas, introduce new methods of locating and analysing multiple languages in various sources, and review terminology, theories and tools. The studies also revisit some of the issues already introduced in previous research, such as Latin interacting with European vernaculars and the complex relationship between code-switching and lexical borrowing. Collectively, the contributors show that multilingual practices share many of the same features regardless of time and place, and that one way or the other, all historical texts are multilingual. This book takes the next step in historical multilingualism studies by establishing the relevance of the multilingual approach to understanding language history.

Translanguaging with Multilingual Students-Ofelia García 2016-06-10 Looking closely at what happens when translanguaging is actively taken up to teach emergent bilingual students across different contexts, this book focuses on how it is already happening in classrooms as well as how it can be implemented as a pedagogical orientation. It extends theoretical understandings of the concept and highlights its promises and challenges. Using a Transformative Action Research design, six empirically grounded ethnographic case studies describe how translanguaging is used in lesson designs and in the spontaneous moves made by teachers and students during specific teaching moments. The cases shed light on two questions: How, when, and why is translanguaging taken up or resisted by students and teachers? What does its use mean for them? Although grounded in a U.S. context, and specifically in classrooms in New York State, Translanguaging with Multilingual Students links findings and theories to different global contexts to offer important lessons for educators worldwide.
