Looking at Paper-John Slavin 2001 This is a survey of some of the various methods used to investigate papers and record the results of those investigations. It covers some of the similarities and differences in investigating works of art on paper, documents, and printed material through fibre analysis and watermarks along with their recording.

The accuracy of historical reference material, the importance of mill records as well as other archival material, and the needs for comparative material are discussed. Keeping an open mind in both the analysis and interpretation of the evidence is stressed, along with the importance of collaboration with investigators in other fields. Some aspects of papermaking and watermarking practice that seem rarely to be considered, but which can often have an important part to play in interpreting one's findings, will be highlighted.

Dreams (As I See Them)-Olga Alicia Rippo 2008-03-31 Dreaming, according to my personal and convincing analysis, is the reviewing of the previous days activities and committing them to memory. Each dream episode is symbolized by what we already have stored in our memory banks. Emotions or events will evoke a symbol that will appear in the dream along with other symbols already encoded to create a story line that seems strange, funny, or even slightly confused. The massive numbers of memories we have would be impossible to categorize separately. It is much more efficient to draw out these encoded symbols from our memory and store yesterdays memorable happenings in the same code. If we do not have a symbolic representation for something or someone, then that person, item, or activity will represent itself and create a new code. What compounds the mystery of symbolism is that each individual has established his own very personal ones throughout his own life experiences. Thus, no one is truly able to decipher another's dream. A dream can even be the result of a radio or TV story heard during sleep and absorbed into the dream. The dialogue may be repeated quite accurately but the dreamer creates his own picture images. I have experienced this quite often, waking to ask, Why did she or he say this or that? and compare the reality to my dream scenes. (Perhaps we should give credence to the possibility that we might learn during sleep while a recorded voice recites the lesson repeatedly.) On the other hand, watching a TV program that impresses or evokes certain emotions can trigger a dream later with our own symbols to create our own episode. A sound can produce a quick little dream. Instantaneously - between a click before an alarm rings and the ring itself can cause a flash of a dream according to what that sound conjured up from our memory bank. If a sound does not wake us, we will weave it into our dream story in marvelous ways. Just a touch that probably would be unexplainable unless one woke up to the ongoing sound and recognize it as having been in our dream. Recurring dreams, I am convinced, represent a certain emotion or feeling that we experienced somewhere back in time and that scene is brought forward whenever it is needed to depict that emotion. The scene is representative of a prior emotional experience and comes forth as the same scene in our dream each time that same emotion is reflected from the previous day. Thus the recurrence. Our life experiences being different, so would our storage areas be comprised of different methods of remembering. The swimming scenes that recur occasionally in my dreams are always very pleasing to me. Even though I do not swim, simply watching swimmers evokes a relaxing, soothing sensation within me. Im sure the previous day had pleasurable times that were being reflected. On the other hand, when I dream of flooding or turbulent water, a negative experience in the previous day is revived in that same nights dream as an unpleasant water scene. Actually, the last swimming episode in my life was a near disaster for me and perhaps that particular occasion was the one that influences the negative evocation of water. Yet, strangely enough, watching people swim is a pleasure to me, hence the positive sensation. Other emotions anxiety, sadness, fear, anger, joy, etc., are represented in a symbolic manner that is unique to us alone, as is the original encoded episode. We require codes or symbols as mental shorthand to store in a compact unit the massive number of thoughts, activities and emotions we experience during a lifetime. The recurrence of certain episodes or metaphors eliminates the necessity to store another code. I believe it is erroneous to infer mystical or psychological interpretations. Dreams are a natural function of the marvelous composition of the human body such as blinking, swallowing, smiling, etc. There has not been a single dream that I have been unable to reconcile with the activities

WATCHING NATURE PB-Mark S. Garland 1997-04-17 In Watching Nature, naturalist Mark Garland takes readers on field trips among the plants and animals of the cool highlands of West Virginia, the forested ridges and valleys of western Maryland and central Pennsylvania, the gently rolling Piedmont region around Washington, D.C., and the flat coastal plain extending from southern New Jersey to Virginia Beach. Anecdotes from the author's own adventures - the nocturnal sighting of a rare bird, a feast of wild mountain blueberries, a winter afternoon at the shore - uncover the surprises that even the most familiar landscape can yield. Describing seasonal events such as Potomac valley wildflowers blooming in early spring, shorebirds converging on Delaware Bay mudflats in mid-May, and monarch butterflies migrating over mountain fields in early fall, the author also provides itineraries for visiting some of his favorite spots. Complete with black-and-white watercolor illustrations, maps, an extensive bibliography, and listings of resource organizations, Watching Nature emphasizes the accessibility of the natural world.

Ed wonders if this is why he isn't allowed to eat at the table or sit on the couch with the other children. So he's determined to find his own thing to be excellent at—only to be (inadvertently) outdone by a family member every time. Praise for Excellent Ed: "A dog lover's delight." —School Library Journal "In Julia Sarcone-Roach's joyful, expressive paintings, we see Ed pondering how to demonstrate excellence. The answer is excellent, and entirely endearing." —The Wall Street Journal "A warm, welcome reminder that everyone is excellent at something." —Kirkus Reviews starred review "In a word? Excellent." —The Horn Book starred review

Lead Isotopes-B. R. Doe 2012-12-06 This series of monographs represents continuation on an inter national basis of the previous series MINERALOGIE UND PETRO GRAPHIE IN EINZELDARSTELLUNGEN, published by Springer Verlag. The voluminous results arising from recent progress in pure and applied research increase the need for authoritative reviews but the standard scientific journals are unable to provide the space for them. By their very nature, text-books are unable to consider specific topics in depth and recent research methods and results often receive only cursory treatment. Advanced reference volumes are usually too detailed except for experts in the field. It is often very expensive to purchase a symposium volume or an "Advances in . . ." for the sake of a specific review chapter surrounded by volume unrelated chapters. We hope that this monograph series will by pass these problems in fulfilling the need. The purpose of the series is to publish reviews and reports of carefully selected topics written by carefully selected authors, who are both good writers and experts in their scientific field. In general, the monographs will be concerned with the most recent research methods and results. The editors hope that the monographs will serve several functions, acting as supplements to existing text-books, guiding research workers, and providing the basis for advanced seminars. W. ANCIENT MON MISSISSIPPI VAL PB-Ephraim George Squier 1998 Originally published in 1848 as the first major work in the nascent discipline as well as the first publication of the newly established Smithsonian Institution, Ancient Monuments of the Mississippi Valley remains today not only a key document in the history of American archaeology but also the primary source of information on hundreds of mounds and earthworks in the eastern United States, most of which have now vanished. Despite adhering to the popular assumption that the moundbuilders could not have been the ancestors of the supposedly savage Native American groups still living in the region, the authors set high standards for their time. Their work provides insight into some of the conceptual, methodological, and substantive issues that archaeologists still confront. Long out of print, this 150th anniversary edition includes David J. Meltzer's lively introduction, which describes the controversies surrounding the book's original publication, from a bitter, decades-long feud between Squier and Davis to widespread debates about the links between race, religion, and human origins. Complete with a new index and bibliography, and illustrated with the original maps, plates, and engravings, Ancient Monuments of the Mississippi Valley provides a new generation with a first-hand view of this pioneer era in American archaeology.
