Causes and Consequences of Income Inequality-Ms. Era Dabla-

Norris 2015-06-15 This paper analyzes the extent of income inequality from a global perspective, its drivers, and what to do about it. The drivers of inequality vary widely amongst countries, with some common drivers being the skill premium associated with technical change and globalization, weakening protection for labor, and lack of financial inclusion in developing countries. ~~We find that~~

increasing the income share of the poor and the middle class actually increases growth while a rising income share of the top 20 percent results in lower growth—that is, when the rich get richer, benefits do not trickle down. This suggests that policies need to be country specific but should focus on raising the income share of the poor, and ensuring there is no hollowing out of the middle class. To tackle inequality, financial inclusion is imperative in emerging and developing countries while in advanced economies, policies should focus on raising human capital and skills and making tax systems more progressive.

Arab Nationalism-B. Tibi 1990-06-29 In this new edition Professor Tibi analyses the impact and function of nationalism and its contribution to social and political change in the Third World, taking the rise of nationalism in the Middle East as a historical example. He concentrates on the period after the First World War, when many Arab intellectuals became disillusioned with Britain and France as a result of the occupation of their countries. Professor Tibi's careful study of the writings and influence of Sati' al-Husri illustrates the connection between modern Arab nationalism and nineteenth century German Romantic nationalism, which will be of particular interest to the English reader. Professor Tibi concludes that while nationalism has played a necessary and important role in the movement for national independence in the Middle East, it has since developed into an ideology which seems to obstruct further social and political emancipation. This book will be of particular interest to historians and social scientists as well as to specialists in the area itself.

Chaldean Magic-François Lenormant 1877

Systems Leadership-Ian MacDonald 2017-03-02 This book is concerned with how people come together to achieve a productive purpose. Human survival has always depended upon our ability to form and sustain social organisations. People have a deep need to be creative and to belong. By creating positive organisations we can fulfil these needs and build a worthwhile society. Such organisations do not occur by chance; a positive organisation is created by the hard work of leaders and members and influenced by the way the organisation is designed, especially its systems. All this needs to be based on an understanding of sound, general principles

of behaviour. This book outlines that work; how to build a positive organisation in terms of general principles and practical examples. Understanding and applying this work requires discipline (not dogma) and creativity. The authors show the significant positive results that can be achieved and detail a range of case studies. Unlike some books which are based on goals, objectives or visions this book concentrates on how this can be achieved. The authors observed and engaged with what good leaders and members actually do and have endeavoured to distil the essence of productive relationships based on core, human values. This work has been applied in businesses, social service agencies, hospitals, city governments, national governments, armies, churches, public utilities, indigenous communities, schools and other unique organisations. It is intended to help leaders create more humane and productive organisations that can both meet their objectives and improve the human condition. It does so by presenting a coherent theory exemplified by numerous cases and practical experience. As more than one leader has commented, 'this stuff actually works'. The CD supplied with the book contains 11 case studies which look at the application of systems leadership techniques in a range of organisational contexts.

Eleusis-Carl Kerényi 2020-06-16 The Sanctuary of Eleusis, near Athens, was the center of a religious cult that endured for nearly two thousand years and whose initiates came from all parts of the civilized world. Looking at the tendency to "see visions," C. Kerényi examines the Mysteries of Eleusis from the standpoint not only of Greek myth but also of human nature. Kerényi holds that the yearly autumnal "mysteries" were based on the ancient myth of Demeter's search for her ravished daughter Persephone--a search that he equates not only with woman's quest for completion but also with every person's pursuit of identity. As he explores what the content of the mysteries may have been for those who experienced them, he draws on the study of archaeology, objects of art, and religious history, and suggests rich parallels from other mythologies.

Anacalypsis, an Attempt to Draw Aside the Veil of the Saitic Isis; Or, An Inquiry Into the Origin of Languages, Nations, and Religions- Godfrey Higgins 1874

Liquid Fear-Scott Nicholson 2011 When Roland Doyle wakes up in an unfamiliar motel room with a strange man's wallet in his pocket and a woman's dead body in the bathroom, he fears the worst...and that's before he finds the vial of pills labeled "take one every 4 hrs or else." Or else what? Ten years ago, Dr. Sebastian Briggs's clinical drug trial for a cutting-edge fear-response drug went horribly wrong -- or did it? It's true that one trial participant died and five others were left with no memory of what happened to them. But now several interested parties, including a major pharmaceutical company and an ambitious U.S. senator, are willing to back Briggs's continued research. All he has to do is recall his five surviving "volunteers," whose addiction to a mysterious drug has left them largely at his disposal. They will do anything necessary to keep the pills coming and to stave off the creeping phobias, intense sexual impulses, and all-consuming madness that lurk on the edges of their minds. It's easy enough for the good doctor to lure the survivors back to the remote Monkey House, where the original trials took place. But when the pills finally run out...that's when the real show begins.

Handbook of Multicultural Counseling Competencies-Jennifer A. Erickson Cornish 2010-08-13 A THOROUGH AND CONTEMPORARY EXPLORATION OF ISSUES FUNDAMENTAL TO MULTICULTURAL COMPETENCY Handbook of Multicultural Counseling Competencies draws together an expert group of contributors and from

provide a wide range of viewpoints and personal experiences to explore the identification and development of specific competencies necessary to work effectively with an increasingly diverse population. Beginning with a Foreword by Derald Wing Sue, this unique handbook offers a broad, comprehensive view of multiculturalism that is inclusive and reflective. The coverage in this important book lies beyond the scope of traditionally defined multiculturalism, with discussion of historically overlooked groups that have experienced prejudice and bias because of their size, social class, age, language, disability, or sexual orientation. This book provides readers with: Practical cases and examples to enhance skill development, promote critical thinking, and increase awareness A cross-section of diversity characteristics and best practice guidelines Examination of detailed, developmentally relevant competency categories Resources and exercises designed for practitioners at various levels of experience and expertise A forum for debate, discussion, and growth Designed to help readers enhance general multicultural competency and their ability to provide services to the populations specifically described, this thought-provoking text will prove useful in facilitating ongoing dialogues about multicultural competence in all its variations.

History of Concepts-Iain Hampsher-Monk 1998 Hoewel enorm invloedrijk in Duitstalig Europa, heeft de conceptuele geschiedschrijving (Begriffsgeschichte) tot nu toe weinig aandacht in het Engels gekregen. Dit genre van intellectuele geschiedschrijving verschilt van zowel de Franse geschiedschrijving van mentalités als de Engelstalige geschiedschrijving van verhandelingen door het concept. Aan de hand van praktische voorbeelden in de geschiedschrijving wordt deze vorm toegelicht door Bram Kempers, Eddy de Jongh en Rolf Reichardt.

Latter-day Screens-Brenda R. Weber 2019-09-13 From Sister Wives and Big Love to The Book of Mormon on Broadway, Mormons and Mormonism are pervasive throughout American popular media. In Latter-day Screens, Brenda R. Weber argues that mediated Mormonism contests and reconfigures collective notions of gender

sexuality, race, spirituality, capitalism, justice, and individualism. Focusing on Mormonism as both a meme and an analytic, Weber analyzes a wide range of contemporary media produced by those within and those outside of the mainstream and fundamentalist Mormon churches, from reality television to feature films, from blogs to YouTube videos, and from novels to memoirs by people who struggle to find agency and personhood in the shadow of the church's teachings. The broad archive of mediated Mormonism contains socially conservative values, often expressed through neoliberal strategies tied to egalitarianism, meritocracy, and self-actualization, but it also offers a passionate voice of contrast on behalf of plurality and inclusion. In this, mediated Mormonism and the conversations on social justice that it fosters create the pathway toward an inclusive, feminist-friendly, and queer-positive future for a broader culture that uses Mormonism as a gauge to calibrate its own values.

Memory Boxes-Heta Aali 2014-07-31 This volume discusses a practical approach to cultural transfer and exchange through the concept of »memory box«. Ideas of displacement, transfer, and cultural memory are explored through case studies from Scotland to Italy and Germany and from Finland and France to the American colonies. The authors develop an understanding of memory boxes as cultural constructions that are involved in the process of making and disputing memory - but which, simultaneously, are important agents for cultural transfer over space and time. This book emphasises »memory box« as an idea that allows us to study the cultural processes of transfer in conjunction with cultural memory.

Soulful Corporations-Shashank Shah 2013-09-02 In the light of multiple corporate debacles, financial crises and environmental disasters across the globe, the need for corporate goals to transition from simply maximising shareholder wealth to optimising stakeholder welfare is being echoed in various quarters. This book makes a distinct contribution by looking at Corporate Social Responsibility (CSR) from a values-based perspective with a focus on providing a balance between corporate success and social well-being. The book emphasizes that corporations need to redefine their

purposes to co-create long-term, sustainable and win-win solutions for multiple stakeholders through mutually-fulfilling and value-adding collaborative efforts. Through the ideal of 'A Soulful Corporation', the book proposes a new story where corporations, as associations of individuals, can identify their 'collective spirits' in terms of environmentally-aware, socially-inclusive and financially-rewarding missions. Some of the unique features of the book include:

- A detailed study of the evolution of CSR from the ancient to contemporary times
- Insights gained through empirical research and personal interviews with over 100 industry captains, CEOs, MDs and heads of the CSR function across companies and industries
- Case studies on CSR practices and processes in leading Indian companies including the Tata Group, TVS Motor, HUL, Wipro, L&T, Bharat Petroleum, HDFC Bank, Birla Group, Reliance Industries and others.
- Cases on unique social welfare projects in the areas of education, healthcare and drinking water supply
- A 'Society and Local Community Welfare Framework' and a '12-point Agenda for Affirmative Action' that propose policy recommendations and provide corporations with a roadmap for their CSR journey in the light of the mandatory CSR spending introduced by the Government of India.

The book has relevance to multiple stakeholders: students, academics, CSR researchers, policy-makers, industry captains, business managers and entrepreneurs.

The Ways of the World-David Harvey 2016-02-05 David Harvey is one of most famous Marxist intellectuals in the past half century, as well as one of the world's most cited social scientists. Beginning in the early 1970s with his trenchant and still-relevant book Social Justice and the City and through this day, Harvey has written numerous books and dozens of influential essays and articles on topics across issues in politics, culture, economics, and social justice. In The Ways of the World, Harvey has gathered his most important essays from the past four decades. They form a career-spanning collection that tracks not only the development of Harvey over time as an intellectual, but also a dialectical vision that gradually expanded its reach from the slums of Baltimore to global

environmental degradation to the American imperium. While Harvey's coverage is wide-ranging, all of the pieces tackle the core concerns that have always animated his work: capitalism past and present, social change, freedom, class, imperialism, the city, nature, social justice, postmodernity, globalization, and the crises that inhere in capitalism. A career-defining volume, *The Ways of the World* will stand as a comprehensive work that presents the trajectory of Harvey's lifelong project in full.

The Analysis of Tidal Stream Power-Jack Hardisty 2009-02-17 This text integrates a wide range of research and tidal resource theory and data to present a detailed analysis of the physics and oceanography of tidal stream power devices together with a world wide resource analysis. Clearly structured throughout the book is divided into two distinct parts. Part One provides the theoretical background to the subject and deals with the historical development of the harmonic method for the synthesis of tidal currents; the principles of fluid and tidal flow and the principles of device ducts, turbines and electrical systems. A review and analysis of more than forty tidal stream power proposals is also discussed. Part Two provides a comprehensive overview of current practice. The economic modelling of tidal stream power installations is covered with more than three hundred current meter records from around the world used to analyse the potential and cost of tidal stream power on a global basis. **Hallmark Features:** reviews the tidal resources around the world complete analysis of tidal stream power systems includes historical information on tidal science and biographical information on major figures concentrates on engineering physical geography rather than engineering specifics includes a website with a wide range of computer models, data and simulations

Does Atlas Shrug?-Joel Slemrod 2000 Since the introduction of the income tax in 1913, controversy has raged about how heavily to tax the rich. Opponents of high tax rates claim that heavy assessments have negative incentives on the productivity of some of our most talented citizens; supporters stress the importance of the rich shouldering their "fair share," and decry the loopholes that permit many to escape their obligations. hard evidence about the actual impact of taxes on the behavior of the affluent. This book presents evidence by leading economists of the effects of taxes on the formation of businesses, the supply of labor, the form of executive compensation, the accumulation of wealth, the allocation of portfolios, and the realization of capital gains. Among its findings are that the labor supply of the rich remained unchanged in the face of large tax cuts in 1986, and that in late 1992 executives exercised billions of dollars' worth of stock options in order to beat the tax increases expected in 1993. The book also presents a history of efforts to tax the rich, a demographic snapshot of the financially affluent, and a road map to widely used tax-avoidance strategies. Does Atlas Shrug? will be of great interest to policymakers and interested citizens who want to know how much tax revenue could really be gained by increasing tax rates on the rich, or whether low capital gains tax rates really spur economic growth.

Perspectives on Hittite Civilization-Hans Gustav Güterbock 1997

The thirty-three articles in this collection (originally published between 1948 and 1992) were chosen from the corpus of bibliographical items authored by Hans Gustav Gueterbock over a span of more than sixty years. They give a rich and varied picture of ancient Hittite culture by one who literally grew up with the new discipline and experienced firsthand its most dramatic discoveries. Both the choice of articles and their sequence in this volume were selected by Professor Gueterbock. Articles deal with almost every conceivable aspect of ancient Hittite culture: history, literature, divination, mythology/theology, religious ceremonies, architecture, ethnic diversity, law, diplomacy, social structure, and administration. This diversity demonstrates Gueterbock's proficiency in all areas of Hittitological research.

domestic. They examine topics critical to the area such as travel, migration, economic opportunity, and tourism. They look at the growth of Florida and the Caribbean and the attendant pressures on the environment, culture, urban development, and the movement of peoples, both forced and voluntary. The Florida and the Caribbean Open Books Series gathers the rich data available in these architectural, archaeological, cultural, and historical works, as well as the travelogues and naturalists' sketches of the area in prior to the twentieth century, making it accessible for scholars and the general public alike. The Florida and the Caribbean Open Books Series is made possible through a grant from the National Endowment for the Humanities and the Andrew W. Mellon Foundation, under the Humanities Open Books program.

Spaces of Experience-Charlotte Klouk 2009-01-01 This fascinating study of art gallery interiors examines the changing ideals and practices of galleries in Europe and North America from the 18th to the late 20th century. It offers a detailed account of the different displays that have been created—the colors of the background walls, lighting, furnishings, the height and density of the art works on show—and it traces the different scientific, political and commercial influences that lay behind their development. Charlotte Klouk shows that scientists like Hermann von Helmholtz and Wilhelm Wundt advanced theories of perception that played a significant role in justifying new modes of exhibiting. Equally important for the changing modes of exhibition in art galleries was what Michael Baxandall has called “the period eye,” a way of seeing informed by the impact of new fashions in interior decoration and by department store and shop window displays. The history of museum interiors, she argues, should be appreciated as a revealing chapter in the broader history of experience.

Principles of Space Anthropology-Cameron M. Smith 2019-09-16 This book shows how anthropology can provide an innovative perspective on the human movement into space. It examines adaptation to space on timescales of generations, rather than merely months or years, and uses evolutionary adaptation as a guiding theme. Employing the lessons of evolutionary adaptation, Principles of Extraterrestrial Anthropology recommends evolutionarily-sound strategies of space settlement, covering

genetics at the organismal and population levels. The author organizes the concept of cultural adaptation to environments beyond Earth according to observed patterns in human adaptation on Earth. He uses original artwork and tables to help convey complex information in a form accessible to undergraduate and graduate students. Though primarily written to engage students interested in space settlement and exploration, who will eventually build a full anthropology of space settlement, *Principles of Extraterrestrial Anthropology* is engaging to anthropologists across sub-disciplines, as well as scholars interested in the human dimensions of space exploration and settlement. Just as the term exobiology was invented only a few decades ago to shape the field of space life studies, exoanthropology is outlined to assist in the perpetuation of Earth life through human space settlement. The Olympics in East Asia-William W. Kelly 2011-02

The Truth about Crime-Jean Comaroff 2016-12-05 In this book, renowned anthropologists Jean and John L. Comaroff make a startling but absolutely convincing claim about our modern era: it is not by our arts, our politics, or our science that we understand ourselves—it is by our crimes. Surveying an astonishing range of forms of crime and policing—from petty thefts to the multibillion-dollar scams of too-big-to-fail financial institutions to the collateral damage of war—they take readers into the disorder of the late modern world. Looking at recent transformations in the triangulation of capital, the state, and governance that have led to an era where crime and policing are ever more complicit, they offer a powerful meditation on the new forms of sovereignty, citizenship, class, race, law, and political economy of representation that have arisen. To do so, the Comaroffs draw on their vast knowledge of South Africa, especially, and its struggle to build a democracy founded on the rule of law out of the wreckage of long years of violence and oppression. There they explore everything from the fascination with the supernatural in policing to the extreme measures people take to prevent home invasion, drawing illuminating comparisons to the United States and United Kingdom.

Going beyond South Africa, they offer a global criminal anthropology that attests to criminality as the constitutive fact of contemporary life, the vernacular by which politics are conducted, moral panics voiced, and populations ruled. The result is a disturbing but necessary portrait of the modern era, one that asks critical new questions about how we see ourselves, how we think about morality, and how we are going to proceed as a global society.

Unmanned Aircraft Systems in the Cyber Domain-Randall Nichols 2019-07-26 Unmanned Aircraft Systems are an integral part of the US national critical infrastructure. The authors have endeavored to bring a breadth and quality of information to the reader that is unparalleled in the unclassified sphere. This textbook will fully immerse and engage the reader / student in the cyber-security considerations of this rapidly emerging technology that we know as unmanned aircraft systems (UAS). The first edition topics covered National Airspace (NAS) policy issues, information security (INFOSEC), UAS vulnerabilities in key systems (Sense and Avoid / SCADA), navigation and collision avoidance systems, stealth design, intelligence, surveillance and reconnaissance (ISR) platforms; weapons systems security; electronic warfare considerations; data-links, jamming, operational vulnerabilities and still-emerging political scenarios that affect US military / commercial decisions. This second edition discusses state-of-the-art technology issues facing US UAS designers. It focuses on counter unmanned aircraft systems (C-UAS) - especially research designed to mitigate and terminate threats by SWARMS. Topics include high-altitude platforms (HAPS) for wireless communications; C-UAS and large scale threats; acoustic countermeasures against SWARMS and building an Identify Friend or Foe (IFF) acoustic library; updates to the legal / regulatory landscape; UAS proliferation along the Chinese New Silk Road Sea / Land routes; and ethics in this new age of autonomous systems and artificial intelligence (AI).

Twenty Thousand Leagues Under the Sea-Jules Verne 1887

The Invention of the Jewish People-Shlomo Sand 2020-04-14 A

historical tour de force that demolishes the myths and taboos that have surrounded Jewish and Israeli history, The Invention of the Jewish People offers a new account of both that demands to be read

and reckoned with. Was there really a forced exile in the first century, at the hands of the Romans? Should we regard the Jewish people, throughout two millennia, as both a distinct ethnic group and a putative nation--returned at last to its Biblical homeland? Shlomo Sand argues that most Jews actually descend from converts, whose native lands were scattered far across the Middle East and Eastern Europe. The formation of a Jewish people and then a Jewish nation out of these disparate groups could only take place under the sway of a new historiography, developing in response to the rise of nationalism throughout Europe. Beneath the biblical back fill of the nineteenth-century historians, and the twentieth-century intellectuals who replaced rabbis as the architects of Jewish identity, *The Invention of the Jewish People* uncovers a new narrative of Israel's formation, and proposes a bold analysis of nationalism that accounts for the old myths. After a long stay on Israel's bestseller list, and winning the coveted Aujourd'hui Award in France, *The Invention of the Jewish People* is finally available in English. The central importance of the conflict in the Middle East ensures that Sand's arguments will reverberate well beyond the historians and politicians that he takes to task. Without an adequate understanding of Israel's past, capable of superseding today's opposing views, diplomatic solutions are likely to remain elusive. In this iconoclastic work of history, Shlomo Sand provides the intellectual foundations for a new vision of Israel's future.
