In *The Nikon Autofocus System, 2nd Edition*, photographer Mike Hagen, author of the bestselling *The Nikon Creative Lighting System*, takes his deep knowledge of Nikon technology and concentrates on its focus features. In this book, which covers all current Nikon DSLR models (including the D5 and D500), Hagen fully explains how Nikon autofocus works, including detailed discussions of all the autofocus modules, drive systems, and camera buttons and menus. He also devotes an entire chapter to explore how focus works with Nikon's lenses.

Armed with this general knowledge, Hagen then dives deep and offers camera setups, settings, and best practices for specific field techniques that address the photographic genres that are notoriously challenging for focus: action and sports (indoor and outdoor), wildlife (including birds in flight), and macro photography. He also covers genres such as portrait, landscape, underwater, low-light, and street photography. Hagen not only advises on the best ways to set up the camera and focus systems, he gives helpful tips and tricks throughout the book.

*The Nikon Autofocus System* also covers:

- Live view autofocus methods and settings
- Achieving great focus in video
- AF tracking
- AF shooting styles, such as back-button AF and shutter-release AF
- HDR, panoramas, and other techniques for shooting with a tripod
- An entire chapter on additional terms and techniques, such as hyperfocal distance, calibrating lenses, focus and flash photography, and more

Shaped By War-Don McCullin 2020-01-16 No other photographer in modern times has recorded war and its aftermath as widely and unsparingly as Don McCullin. After a childhood in London during the Blitz, and after the hardships of evacuation, McCullin feels his life has indeed been shaped by war. From the building of the Berlin Wall at the height of the Cold War to El Salvador and Kurdistan, McCullin has covered the major conflicts of the last fifty years, with the notable exception of the Falklands, for which he was denied access. His pictures from the Citadel in Hue and in the ruins of Beirut are among the most unflinching records of modern war. The publication of many of his greatest stories in the Sunday Times magazine did much to raise the consciousness of a generation, even if he himself now fears that photographs cannot prevent history from repeating itself. The brutality of conflict returns over and over again. McCullin here voices his despair. McCullin recounts the course of his professional life in a series of devastating texts on war, the events and the power of photography. The conclusion of the book marks McCullin's retreat to the Somerset landscape surrounding his home, where the dark skies over England remind him yet again of images of war. Despite the sense of belonging and even contentment, for him there is no final escape.

In Time O' Strife-Joe Corrie 2013-12-16 There's nae power on earth can crush the men who can sing on a day like this. A powerful re-imagining of Joe Corrie's neglected classic about a Fife mining community during the General Strike. To raise funds for the soup kitchens feeding the miners and their starving families, Corrie wrote In Time O' Strife in 1926 whilst on strike himself, exposing the brutal lives of a family staring hunger and defeat in the face. Some 87 years later, Graham McLaren has adapted, designed and directed this rarely performed classic play. Created by Graham McLaren (Men Should Weep, A Christmas Carol), the production uses fragments of Corrie's other plays, poems and songs, celebrating his ability as a writer and his contribution to Scottish culture. This edition pairs Corrie's original text with the script created by McLaren's adaptation process.

Statistics-Frederick L. Coolidge 2020-01-10 The Fourth Edition of Statistics: A Gentle Introduction shows students that an introductory statistics class doesn't need to be difficult or dull. Author Fred Coolidge minimizes students' anxieties about math by explaining the concepts of statistics in plain language first, before addressing the math. Each formula within the text has a step-by-step example to demonstrate the calculation so students can follow along. Only those formulas that are important for final calculations are included in the text so students can focus on the concepts, not the numbers. A wealth of real-world examples and applications gives a context for statistics in the real world and how it helps us solve problems and make informed choices. New to the Fourth Edition are sections on working with big data, new coverage of alternative non-parametric tests, beta coefficients, and the "nocebo effect," discussions of p values in the context of research, an expanded discussion of confidence intervals, and more exercises and homework options under the new feature "Test Yourself."
