Lost Railway Journeys from Around the World-Anthony Lambert 2018-11-13 From the great cathedral-like railways stations of the steam age to obscure lines built through spectacular landscapes to open up countries before the advent of motorised road transport, this book is a celebration of our lost railway heritage and the lines that can no longer be travelled. Through stunning images, Lost Railway Journeys from Around the World evokes the romance and drama of these journeys, taking the reader as close as they can possibly get to this lost world of dining cars, sleeping cars, station porters and international rail travel. Organised by continent, all of these routes have stories to tell and the lost journeys are captured in the old postcards and posters that accompany photographs drawn from collections and archives across the world.

Bibliomania, Or Book Madness-Thomas Frognall Dibdin 1842

Start-up Nation-Dan Senor 2011-09-07 START-UP NATION addresses the trillion dollar question: How is it that Israel-- a country of 7.1 million, only 60 years old, surrounded by enemies, in a constant state of war since its founding, with no natural resources-- produces more start-up companies than large, peaceful, and stable nations like Japan, China, India, Korea, Canada and the UK? With the savvy of foreign policy insiders, Senor and Singer examine the lessons of the country's adversity-driven culture, which flattens hierarchy and elevates informality-- all backed up by government policies focused on innovation. In a world where economies as diverse as Ireland, Singapore and Dubai have tried to re-create the "Israel effect", there are entrepreneurial lessons well worth noting. As America reboots its own economy and can-do spirit, there's never been a better time to look at this remarkable and resilient nation for some impressive, surprising clues.

Each chapter in the book is appended with transformation exercises that further explicate the concepts.

Enriching Production-Åke Sandberg 1995 This text aims to present and discuss the innovative Volvo Uddevalla plant, comparing it to other plants - Japanese lean ones and others. The starting point for the book is Volvo's dramatic decision to close its Uddevalla and Kalmar plants, and the debate that followed this decision, both in Sweden and abroad. Both plants were pioneers of the possibilities to unite productivity and the good work, but, following the announcement of their closure, researchers and practitioners in the field of industrial organization from many countries asked why they closed, how they compared with other production concepts, and whether we now see an end of an alternative to Japanese lean production.
