Antistatic Sprays-National Aeronautics and Space Adm Nasa 2018-10-25 Antistatic sprays from several different manufacturers are examined. The sprays are examined for contamination potential (i.e., outgassing and nonvolatile residue), corrosiveness on an aluminum mirror surface, and electrostatic effectiveness. In addition, the chemical composition of the antistatic sprays is determined by infrared spectrophotometry, mass spectrometry, and ultraviolet spectrophotometry. The results show that 12 of the 17 antistatic sprays examined have a low contamination potential. Of these sprays, 7 are also noncorrosive to an aluminum surface. And of these, only 2 demonstrate good electrostatic properties with respect to reducing voltage accumulation; these sprays did not show a fast voltage dissipation rate however. The results indicate that antistatic sprays can be used on a limited basis where contamination potential, corrosiveness, and electrostatic effectiveness is not critical. Each application is different and proper evaluation of the situation is necessary. Information on some of the properties of some antistatic sprays is presented in this document to aid in the evaluation process. Ming, James E. Goddard Space Flight Center

Good Derivatives-Richard L Sandor 2012-04-06 Through the eyes of an inventor of new markets, Good Derivatives: A Story of Financial and Environmental Innovation tells the story of how financial innovation – a concept that is misunderstood and under attack - has been a positive force in the last four decades. If properly designed and regulated, these “good derivatives” can open vast possibilities to address a variety of global problems. Filled with provocative ideas, fascinating stories, and valuable lessons, it will provide both an insightful interpretation of the last forty years in capital and environmental markets and a vision of world finance for the next forty years. As a young economist at the Chicago Board of Trade, Richard Sandor helped create interest rate futures, a development that revolutionized worldwide finance. Later, he pioneered the use of emissions trading to reduce acid rain, one of the most successful environmental programs ever. He will provide unique insights into the process of creating these new financial products. Covering successes and failures, the story describes the tireless process of inventing, educating and creating support for these new inventions in places like Chicago, New York, London, Paris and how it is unfolding today in Mumbai, Shanghai and Beijing. The book will tell the story of the creation of the Chicago Climate Exchange and its affiliated exchanges (European Climate Exchange, Chicago Climate Futures Exchange and Tianjin Climate Exchange, located in China). The lessons learned in these markets can play a critical role in effectively addressing global climate change and other pressing environmental issues. The author argues that market-based trading systems are a far more effective means of reducing pollutants than “command-and-control”. Environmental markets may ultimately help to find solutions to issues such as rainforest destruction, water problems and biodiversity threats. Written in an engaging, narrative style, Good Derivatives will be of interest to both practitioners and general readers who want to better understand the creative process of financial innovation. In the middle of so much distrust of markets, it is also a recipe of how transparent, well-regulated markets can be a force for good in the environmental, health, and social areas.

The Pride of Price Hill-Bill Koch 2002 In The Dawn of Queen City athletic time, what would become known all over Ohio as 'The Pit' was exactly that -- a dusty cow pasture on Cincinnati's West Side adorned with a manhole on the 50-yard line. It was the only known playing field in Ohio where a manhole was the home field advantage, and its sewer-lid icon became a kind of trademark for the school's rough-and-ready working-class play. From that inauspicious beginning nearly eighty years ago was born one of the Midwest's most storied prep traditions: Elder High School athletics. In its steady procession of stellar teams and athletes, Elder became a West Side phenomena. Along the way, this all-boys parochial school, nestled in a residential corner of blue-collar Price Hill, acquired a following of loyalists found in no other school in Cincinnati, maybe in no other school anywhere. This is the mystique that created back-to-back basketball state titles, a cross country dynasty, an un-precedented eleven baseball championships, and a football team with a national ranking. Its football field was named by USA Today as one of the best places in America to watch high school football, and its graduates have populated programs from Division I all the way to the professional ranks. With over 250 photographs, The Pride of Price Hill is, finally, a story about an old-fashioned neighborhood -- a neighborhood most of us wish we inhabited. Over 400 photographs.
