A History of the American People-Paul Johnson 2009-06-30 "The creation of the United States of America is the greatest of all human adventures," begins Paul Johnson. "No other national story holds such tremendous lessons, for the American people themselves and for the rest of mankind." In his prize-winning classic, Johnson presents an in-depth portrait of American history from the first colonial settlements to the Clinton administration. This is the story of the men and women who shaped and led the nation and the ordinary people who collectively created its unique character. Littered with letters, diaries, and recorded conversations, it details the origins of their struggles for independence and nationhood, their heroic efforts and sacrifices to deal with the 'organic sin' of slavery and the preservation of the Union to its explosive economic growth and emergence as a world power. Johnson discusses contemporary topics such as the politics of racism, education, the power of the press, political correctness, the growth of litigation, and the influence of women throughout history. He sees Americans as a problem-solving people and the story of their country as "essentially one of difficulties being overcome by intelligence and skill, by faith and strength of purpose, by courage and persistence... Looking back on its past, and forward to its future, the auguries are that it will not disappoint humanity." Sometimes controversial and always provocative, A HISTORY OF THE AMERICAN PEOPLE is one author's challenging and unique interpretation of American history. Johnson's views of individuals, events, themes, and issues are original, critical, and in the end admiring, for he is, above all, a strong believer in the history and the destiny of the American people.

At Ellis Island-Louise Peacock 2007-05-22 Accounts from children, police, immigration officers, and the immigrants themselves come to life in a moving tale about the history of Ellis Island, enhanced with black-and-white photographs.

A House of Many Mansions-Kamal Salibi 1990-10-12 Today Lebanon is one of the world's most divided countries. But paradoxically the faction-ridden Lebanese, both Christians and Muslims, have never shown a keener consciousness of common identity. How can this be? In the light of modern scholarship, a famous Lebanese writer and scholar examines the historical myths on which his country's warring communities have based their conflicting visions of the Lebanese nation. He shows that Lebanon cannot afford this divisiveness, that in order to develop and maintain a sense of political unity, it is necessary to distinguish fact from fiction and then build on what is real in the common experience of both groups. Salibi offers a major reinterpretation of Lebanese history and provides remarkable insights into the dynamic of Lebanon's recent conflict. In so doing, he illuminates important facets of his country's present and future. This book also gives a masterly account of how the imagined communities that underlie modern nationalism are created and will be of interest to students of international affairs as well as Near Eastern scholars.

American Nations-Colin Woodard 2011-09-29 An illuminating history of North America's eleven rival cultural regions that explodes the red state-blue state myth. North America was settled by people with distinct religious, political, and ethnographic characteristics, creating regional cultures that have been at odds with one another ever since. Subsequent immigrants didn't confront or assimilate into an "American" or "Canadian" culture, but rather into one of the eleven distinct regional ones that spread over the continent each staking out mutually exclusive territory. In American Nations, Colin Woodard leads us on a journey through the history of our fractured continent, and the rivalries and alliances between its component nations, which conform to neither state nor international boundaries. He illustrates and explains why "American" values vary sharply from one region to another. Woodard (author of American Character: A History of the Epic Struggle Between Individual Liberty and the Common Good) reveals how intranational differences have played a pivotal role at every point in the continent's history, from the American Revolution and the Civil War to the tumultuous sixties and the "blue county/red county" maps of recent presidential elections. American Nations is a revolutionary and revelatory take on America's myriad identities and how the conflicts between them have shaped our past and are molding our future. From the Hardcover edition.

A Short History of Nearly Everything-Bill Bryson 2012-05-15 One of the world's most beloved and bestselling writers takes his ultimate journey -- into the most intriguing and intractable questions that science seeks to answer. In A Walk in the Woods, Bill Bryson trekked the Appalachian Trail -- well, most of it. In In A Sunburned Country, he confronted some of the most lethal wildlife Australia has to offer. Now, in his biggest book, he confronts his greatest challenge: to understand -- and, if possible, answer -- the oldest, biggest questions we have posed about the universe and ourselves. Taking as territory everything from the Big Bang to the rise of civilization, Bryson seeks to understand how we got from there being nothing at all to there being us. To that end, he has attached himself to a host of the world's most advanced (and often obsessed) archaeologists, anthropologists, and mathematicians, travelling to their offices, laboratories, and field camps. He has read (or tried to read) their books, pestered them with questions, apprenticed himself to their powerful minds. A Short History of Nearly Everything is the record of this quest, and it is a sometimes profound, sometimes funny, and always supremely clear and entertaining adventure in the realms of human knowledge, as only Bill Bryson can render it. Science has never been more involving or entertaining. From the Hardcover edition.

American Heritage History of Young America: 1783-1860-Francis Russell 2018-01-03 Young America is a star-spangled account of the perilous, exuberant, dissension-filled first six decades of the United States. The book opens with George Washington's triumphant journey to New York City for his inauguration as first president of the United States. It ends with Abraham Lincoln's solemn farewell to Springfield as he takes a train to Washington to become the sixteenth - and almost the last - president of a country torn by the secession of seven of its states. In between, historian Francis Russell vividly details the events that first molded the American way of life and gave the young nation the will and ability to survive.

American Buffalo-Steven Rinella 2008-12-02 From the host of the Travel Channel's "The Wild Within." A hunt for the American buffalo—an adventurous, fascinating examination of an animal that has haunted the American imagination. In 2005, Steven Rinella won a lottery permit to hunt for a wild buffalo, or American bison, in the Alaskan wilderness. Despite the odds—there's only a 2 percent chance of drawing the permit, and fewer than 20 percent of those hunters are successful—Rinella managed to kill a buffalo on a snow-covered mountainside and then raft the meat back to civilization while being trailed by grizzly bears and suffering from hypothermia. Throughout these adventures, Rinella found himself contemplating his own place among the 14,000 years' worth of buffalo hunters in North America, as well as the buffalo's place in the American experience. At the time of the Revolutionary War, North America was home to approximately 40 million buffalo, the largest herd of big mammals on the planet, but by the mid-1890s only a few hundred remained. Now that the buffalo is on the verge of a dramatic ecological recovery across the West, Americans are faced with the challenge of how, and if, we can dare to share our land with a beast that is the embodiment of the American wilderness. American Buffalo is a narrative tale of Rinella's hunt. But beyond that, it is the story of the many ways in which the buffalo has shaped our national identity. Rinella takes us across the continent in search of the buffalo's past, present, and future: to the Bering Land Bridge, where scientists search for buffalo bones amid artifacts of the New World's earliest human inhabitants; to buffalo jumps where Native Americans once ran buffalo over cliffs by the thousands; to the Detroit Carbon works, a "bone charcoal" plant that made fortunes in the late 1800s by turning millions of tons of buffalo bones into bone meal, black dye, and fine china; and even to an abattoir turned fashion mecca in Manhattan's Meatpacking District, where a depressed buffalo named Black Diamond met his fate after serving as the model for the American nickel. Rinella's erudition and exuberance, combined with his gift for storytelling, make him the perfect guide for a book that combines outdoor adventure with a quirky blend of facts and observations about history, biology, and the natural world. Both a captivating narrative and a book of environmental and historical significance, American Buffalo tells us as much about ourselves as Americans as it does about the creature who perhaps best of all embodies the American ethos.

Why the West Rules - For Now-Ian Morris 2011-01-14 Why does the West rule? In this magnum opus, eminent Stanford polymath Ian Morris answers this provocative question, drawing on 50,000 years of history, archeology, and the methods of social science, to make sense of when, how, and why the paths of development differed in the East and West — and what this portends for the 21st century. There are two broad schools of thought on why the West rules. Proponents of "Long-Term Lock-In" theories such as Jared Diamond suggest that from time immemorial, some critical factor — geography, climate, or culture perhaps — made East and West unalterably different, and determined that the industrial revolution would happen in the West and push it further ahead of the East. But the East led the West between 500 and 1600, so this development can't have been inevitable; and so proponents of "Short-Term Accident" theories argue that Western rule was a temporary aberration that is now coming to an end, with Japan, China, and India resuming their rightful places on the world stage. However, as the West led for 9,000 of the previous 10,000 years, it wasn't just a temporary aberration. So, if we want to know why the West rules, we need a whole new theory. Ian Morris, boldly entering the turf of Jared Diamond and Niall Ferguson, provides the broader approach that is necessary, combining the textual historian's focus on context, the anthropological archaeologist's awareness of the deep past, and the social scientist's comparative methods to make sense of the past, present, and future — in a way no one has ever done before. From the Hardcover edition.

The End of Policing-Alex S. Vitale 2017-10-10 LOS ANGELES TIMES BESTSELLER The problem is not overpolicing, it is policing itself. Why we need to defund the police and how we get there. Recent weeks have seen an explosion of protest against police brutality and repression. Among activists, journalists and politicians, the conversation about how to respond and improve policing has focused on accountability, diversity, training, and community relations. Unfortunately, these reforms will not produce results, either alone or in combination. The core of the problem must be addressed: the nature of modern policing itself. This book attempts to spark public discussion by revealing the tainted origins of modern policing as a tool of social control. It shows how the expansion of police authority is inconsistent with community empowerment, social justice— even public safety. Drawing on groundbreaking research from across the world, and covering virtually every area in the increasingly broad range of police work, Alex Vitale demonstrates how law enforcement has come to exacerbate the very problems it is supposed to solve. In contrast, there are places where the robust implementation of policing alternatives—such as legalization, restorative justice, and harm reduction—has led to a decrease in crime, spending, and injustice. The best solution to bad policing may be an end to policing.

Cameos from English History, from Rollo to Edward II.-Charlotte Mary Yonge 1869

Nothing Like It In the World-Stephen E. Ambrose 2000-08-29 In this account of an unprecedented feat of engineering, vision, and courage, Stephen E. Ambrose offers a historical successor to his universally acclaimed *Undaunted Courage*, which recounted the explorations of the West by Lewis and Clark. *Nothing Like It in the World* is the story of the men who built the transcontinental railroad -- the investors who risked their businesses and money; the enlightened politicians who understood its importance; the engineers and surveyors who risked, and lost, their lives; and the Irish and Chinese immigrants, the defeated Confederate soldiers, and the other laborers who did the backbreaking and dangerous work on the tracks. The Union had won the Civil War and slavery had been abolished, but Abraham Lincoln, who was an early and constant champion of railroads, would not live to see the great achievement. In Ambrose's hands, this enterprise, with its huge expenditure of brainpower, muscle, and sweat, comes to life. The U.S. government pitted two companies -- the Union Pacific and the Central Pacific Railroads -- against each other in a race for funding, encouraging speed over caution. Locomotives, rails, and spikes were shipped from the East through Panama or around South America to the West or lugged across the country to the Plains. This was the last great building project to be done mostly by hand: excavating dirt, cutting through ridges, filling gorges, blasting tunnels through mountains. At its peak, the workforce -- primarily Chinese on the Central Pacific, Irish on the Union Pacific -- approached the size of Civil War armies, with as many as fifteen thousand workers on each line. The Union Pacific was led by Thomas "Doc" Durant, Oakes Ames, and Oliver Ames, with Grenville Dodge -- America's greatest railroad builder -- as chief engineer. The Central Pacific was led by California's "Big Four": Leland Stanford, Collis Huntington, Charles Crocker, and Mark Hopkins. The surveyors, the men who picked the route, were latter-day Lewis and Clark types who led the way through the wilderness, living off buffalo, deer, elk, and antelope. In building a railroad, there is only one decisive spot -- the end of the track. Nothing like this great work had been seen in the world when the last spike, a golden one, was driven in at Promontory Summit, Utah, in 1869, as the Central Pacific and the Union Pacific tracks were joined. Ambrose writes with power and eloquence about the brave men -- the famous and the unheralded, ordinary men doing the extraordinary -- who accomplished the spectacular feat that made the continent into a nation.

History of Morgan's Cavalry-Basil Wilson Duke 1867

A School History of the United States-John Bach McMaster 1897 Things unknown in 1763.--Had a traveler landed on our shores in 1763 and made a journey through the English colonies in America, he would have seen a country utterly unlike the United States of today. The entire population, white man and black, freeman and slave, was not so great as that of New York or Philadelphia or Chicago in our time. If we were to write a list of all the things we now consider as real necessities of daily life and mark off those unknown to the men of 1763, not one quarter would remain. No man in the country had ever seen a stove, or a furnace, or a friction match, or an envelope, or a piece of mineral coal. From the farmer we should have to take the reaper, the drill, the mowing machine, and every kind of improved rake and plow, and give him back the scythe, the cradle, and the flail.

Stamped from the Beginning-Ibram X. Kendi 2016-04-12 The National Book Award winning history of how racist ideas were created, spread, and deeply rooted in American society. Some Americans insist that we're living in a post-racial society. But racist thought is not just alive and well in America -- it is more sophisticated and more insidious than ever. And as award-winning historian Ibram X. Kendi argues, racist ideas have a long and lingering history, one in which nearly every great American thinker is complicit. In this deeply researched and fast-moving narrative, Kendi chronicles the entire story of anti-black racist ideas and their staggering power over the course of American history. He uses the life stories of five major American intellectuals to drive this history: Puritan minister Cotton Mather, Thomas Jefferson, abolitionist William Lloyd Garrison, W.E.B. Du Bois, and legendary activist Angela Davis. As Kendi shows, racist ideas did not arise from ignorance or hatred. They were created to justify and rationalize deeply entrenched discriminatory policies and the nation's racial inequities. In shedding light on this history, *Stamped from the Beginning* offers us the tools we need to expose racist thinking. In the process, he gives us reason to hope.

World History Enters a New Epoch-Lyndon H. Larouche, Jr. 2016-09-16 A Different Quality of Thinking Below are edited excerpts of the Sept. 12 LaRouche PAC Policy Committee discussion of its 9/11 Weekend "Living Memorial" Events in the New York area. Diane Sare: Good afternoon, and welcome to the weekly LaRouche PAC Policy Committee discussion. I am Diane Sare; Matt Ogden is not with us today, and we are filming from the Manhattan Project. We have here in our studio Mike Steger from San Francisco; Keshia Rogers, from Houston, Texas; Bill Roberts from Detroit, Michigan, and sometimes Manhattan; and joining us over Google Hangouts, live, Dave Christie, from Seattle, Washington; and Rachel Brinkley, back in Boston, Massachusetts, although she's been here with us for a number of days. And I can just say that the occasion that brings us together is that this weekend has been the fifteenth anniversary of the most hideous terrorist attacks on our nation, which were particularly hard-felt in Manhattan with the attacks on the World Trade Center in New York City and the Pentagon on Sept. 11, 2001. And as our viewers know, Mr. LaRouche has made a very strong point that we have yet to secure justice in that case, where you had close to 3,000 Americans murdered on that day, and thousands more have died in wars based on lies in the so-called "War on Terror," not to mention millions of people who have been killed and displaced globally as a result of these wars. And what we've experienced over these days thus far, with so far three performances of the Mozart Requiem which were sponsored by the Foundation for the Revival of Classical Culture and which the Schiller Institute Community Chorus participated in, is, I think, a States which is urgently important at this time, as we are on the brink of the biggest blowout of the trans-Atlantic financial system that anyone can imagine, as well as being on the brink of a Renaissance greater than anyone can imagine, developing from the new paradigm as led by leaders like Presidents Putin of Russia and Xi Jinping of China. I will not say more, but open the discussion here for people who have been a part of this process in other spots. Michael Steger: Well, I can say, coming in from San Francisco and only getting a sense of just the concerts, - but I think the process building up into it was also fairly substantial. And as Lyn [LaRouche] said, the people who would be most touched would be the people who were brought into the process of the choruses and the whole idea of making an intervention into the culture around the concerts. But you have to say, there were over 1,100 people in a Manhattan church on Saturday. There were events happening under other auspices, and the reports we got were that they were far less substantial and thoughtful. But what really is the meaning of this process? For the chorus's 80-100 plus people on Saturday and on Sunday? one of the firefighters of the Sunday Mass, - we participated at the Co-Cathedral of St. Joseph in Brooklyn. They do a Mass every year for the firefighters. There were twenty-four of them from this battalion that gave their lives in the Towers. And so they had one of the leaders of that battalion speaking in honor of them, and saying that we will never forget what they did. You heard the overtones of the Gettysburg Address. And it was very emotional. There weren't very many dry eyes in the house, including the chorus and orchestra and everybody else participating, - let alone the families of the fallen. They brought in flags representing each of their firefighters that fell on that day. As we discussed earlier, these people were murdered; this was a murder against the American people en masse. But once these remarks were done, and our chorus was brought forward to sing, - you have the whole orchestra, the whole performance, and John Sigerson, our conductor, had to make a decision: Are we going to continue that intense emotion of the memory of these people who had fallen?

Over the Seas for Uncle Sam-Elaine Sterne 1918 A collection of stories told by some of the sailors in a naval hospital, relating their own experiences.

Out Of Africa-Isak Dinesen 2014-06-03 In *Out of Africa*, author Isak Dinesen takes a wistful and nostalgic look back on her years living in Africa on a Kenyan coffee plantation. Recalling the lives of friends and neighbours—both African and European—Dinesen provides a first-hand perspective of colonial Africa. Through her obvious love of both the landscape and her time in Africa, Dinesen's meditative writing style deeply reflects the themes of loss as her plantation fails and she returns to Europe. Out of Mind, Out of Sight-Sally J. Ling 2013-01-28 KINDLE BOOK REVIEW, 2014 KINDLE BOOK AWARDS SEMIFINALIST Out of Mind, Out of Sight is a revealing history of the Florida State Hospital at Chattahoochee from construction of its original buildings in 1834 as part of the Chattahoochee Federal Arsenal during the Second Seminole War, to its current role-treating individuals who have been civilly and forensically committed. To put the Florida State Hospital at Chattahoochee in perspective, the story is set against a backdrop of the evolution of institutionalized mental health care both in the U.S. and Florida where new emerging treatments-insulin, Metrozol and electroconvulsive (ECT) shock therapies, as well as lobotomies-became part of patient treatment plans. For years, the Florida State Hospital at Chattahoochee had quite a reputation-most of it bad; but, the institution was not alone. For decades throughout the country, state facilities earned shocking reputations for their inadequate care and mistreatment of the mentally ill. Even more chilling was the incarceration of thousands of men and women who were not mentally ill at all, but due to ignorance and prejudice on the part of the public, medical profession, and court system, were confined for epilepsy, sunbathing nude, smoking, menopause or other "egregious" offenses. Some may wonder why an account of the obscure facility at Chattahoochee is important. The answer lies in its dual role as historic physical facility and evolving mental institution that, when combined, paint a poignant portrait of Florida-its history, its laws and its people; and it is incumbent upon historians to preserve this picture-the good, the bad, and the ugly-for generations to come.

The Odyssey of a Partisan-Joseph L. Zygielbaum 2009-01-14 This is the amazing and inspiring true story of a Polish Jewish Partisan leader and Soviet captive during World War II. Joseph L. Zygielbaum fought the Nazis under the Polish and Soviet flags and alongside the American Office of Strategic Services. These memoirs reveal his heroism in the face of personal tragedy and place him squarely in the heart of Holocaust history. Zygielbaum, the son of the famed Polish martyr Szmul Zygielbaum, begins with a description of his childhood and then takes the reader through an odyssey spanning horrendous events from 1939 to 1945 and the battlefields of Eastern and Northern Europe. A reserve officer in the Polish army at 19 years old, Zygielbaum witnesses the German and Russian invasion of his homeland. He swiftly becomes a Partisan leader. After his wife and toddler son are murdered by the Nazis, he undertakes ever more risky missions and is captured by the Russians, narrowly escaping execution as a spy. He relates his many experiences in the USSR, culminating in his being impressed into the Red Army to fight the Germans. As a special forces fighter, he is deployed into many battle zones. Close to the end of the war, he escapes and returns to Poland, where he meets and marries his new love and emigrates with her to the United States. Zygielbaum's book was published after his death in 1995 by his sons, long after he had completed a noted career in the early American space program. The story relates many everyday aspects of life as a Partisan and as a Soviet soldier, amid the ever-present terror of the war and the tragedy all around.

The Ashakiran Tape-Jurgen Fauth 2015-09-14 From the author of the historical thriller *Kino*, a "fast, complex, exhilarating roadster ride through history and time" (Frederick Barthelme) comes a gripping psychedelic mystery steeped in sex, drugs, and rock 'n' roll. When legendary improvisational rock band Phish returns to the stage after a five-year breakup, longtime fan and hardboiled hippie sleuth Quentin Pfeiffer has to be there - even though he is older, wiser, and the father of an adorable baby daughter now. But not everything is sunshine and rainbows in the freewheeling circus surrounding the band's summer tour: after the millionaire skipper of a drug-drenched luxury yacht goes missing, Q and his crew are drawn into a dangerous intrigue of dreadlocked dames, shady tape collectors, and spun-out wookies chasing after the long-lost recording of a mysterious late-night jam. Inspired by Raymond Chandler and set during a series of concerts at Long Island's Jones Beach amphitheater, *The Ashakiran Tape* takes readers deep into the spiraling ecstasy of Phish's epic shows and the seductive underworld of the obsessive fans following them. Praise for *Kino*: "Kino is an intoxicating Euro-brew, written with enormous skill and dedication." - Frederick Barthelme "A debut of great intellectual force." - Teddy Wayne "A delirious melange of conspiracy, magic, sex, history, bad behavior, and cinema, *Kino* is a stellar entertainment, and Jurgen Fauth is a writer of rare, sinister imagination." - Owen King

Unix-Brian W. Kernighan 2019-10-18 "The fascinating story of how Unix began and how it took over the world. Brian Kernighan was a member of the original group of Unix developers, the creator of several fundamental Unix programs, and the co-author of classic books like "The C Programming Language" and "The Unix Programming Environment."--

A Really Short History of Nearly Everything-Bill Bryson 2020-10-29 Adapted from *A Short History of Nearly Everything*, this stunningly illustrated book from the extraordinary Bill Bryson takes us from the Big Bang to the dawn of science, and everything in between. Perfect for ages 8 to 80. Ever wondered how we got from nothing to something? Or thought about how we can weigh the earth? Or wanted to reach the edge of the universe? Uncover the mysteries of time, space and life on earth in this extraordinary book - a journey from the centre of the planet to the dawn of the dinosaurs, and everything in between. And discover our own incredible journey, from single cell to civilisation, including the brilliant (and sometimes very bizarre) scientists who helped us find out the how and why. ***** Reviews for *A Short History of Nearly Everything*: 'It's the sort of book I would have devoured as a teenager. It might well turn unsuspecting young readers into scientists.' Evening Standard 'I doubt that a better book for the layman about the findings of modern science has been written' Sunday Telegraph 'A thoroughly enjoyable, as well as educational, experience. Nobody who reads it will ever look at the world around them in the same way again' Daily Express 'The very book I have been looking for most of my life' Daily Mail *History Under Your Feet*-Ratnakar Sadasyula 2015-08-15 Are you aware that there is a Great Wall of India built by Rana Kumbha at the Fort of Kumbalgarh?Or that Rash Behari Bose was the first to introduce Indian curry into Japan?Or of the Naval Ratings Mutiny that rocked the British empire?India is a nation where history literally lies under your feet, where every rock, nook and corner, has a story to tale.*History Under Your Feet* aims to look at the history behind some places and persons in India.
