How to select & use Minolta SLR cameras-Carl Shipman 1980-01-01 Describes the features of various models of Minolta single-lens reflex cameras and offers tips on film handling, viewing and focusing, use of flash and filters, and general camera care

Management of the Difficult Pediatric Airway-Narasimhan Jagannathan 2019-11-30 A multidisciplinary reference guide covering critical techniques to the safe management of the challenging pediatric airway.

Art Index Retrospective- 1980

Practical Pediatric Gastrointestinal Endoscopy-George Gershman 2012-02-20 This practical step-by-step guide to performing GI endoscopy safely and effectively in children covers the use of endoscopy as both a diagnostic and a therapeutic modality. Now with an entirely new section focusing on advanced endoscopic techniques, such as such as pancreatic cysto-gastrostomy, confocal endo microscopy, and single balloon enteroscopy, the new edition gives trainees and practitioners access to the most recent, as well as the most dependable, information.

The American Journal Of Anatomy;-Wistar Institute of Anatomy and Biology 2019-03-27 This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. As a reproduction of a historical artifact, this work may contain missing or blurred pages, poor pictures, errant marks, etc. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

ERCP and EUS-Linda S. Lee 2015-06-13 This text provides a comprehensive review of ERCP and EUS and the clinical conditions for which they are employed. Presented in a case-based format with accompanying videos, it will serve as a valuable practical clinical resource for gastroenterologists with an interest in ERCP and EUS. The text highlights major techniques involved in ERCP, reviews complications and recent data on preventing post-ERCP pancreatitis, and discusses important issues in training in ERCP including use of endoscopic simulators and assessment of competency as emphasized in the new ACGME guidelines. For biliary diseases, new techniques for managing biliary stones, novel technologies for diagnosing indeterminate biliary strictures, and new devices for treating benign and malignant strictures are also highlighted. For pancreatic diseases, advances in minimally invasive endoscopic techniques for pancreatic stones and strictures, and management of the complications of pancreatitis are reviewed. Furthermore, ERCP is not limited by age, pregnancy or history of abdominal surgeries and special considerations particular to these patient populations are also discussed. The EUS chapters review the breadth of equipment available for performing EUS and EUS-FNA, detail the technique of performing EUS-FNA, and explore pertinent issues with training and assessing competency analogous to ERCP training. Valuable insights on the basics of cytopathology relevant to the endosonographer are summarized. The classic indication for EUS of staging luminal cancers is examined in detail while pancreaticobiliary indications are discussed highlighting newer adjunctive technologies including elastography and contrast-enhanced EUS. Although in its infancy, the brave new world of therapeutic EUS is explored with a focus on endoscopic necrosectomy, EUS-guided biliary and pancreatic access as well as the exciting possibilities of EUS-guided radiofrequency ablation and injection of anti-tumor agents. ERCP and EUS: A Case Based Approach will serve as a very useful resource for physicians who perform or refer patients for ERCP and EUS. It provides a concise yet comprehensive summary of the current status of ERCP and EUS that will help guide patient management and stimulate clinical research.

Illustrated Guide to Home Forensic Science Experiments-Robert Bruce Thompson 2012-08-07 Have you ever wondered whether the forensic science you've seen on TV is anything like the real thing? There's no better way to find out than to roll up your sleeves and do it yourself. This full-color book offers advice for setting up an inexpensive home lab, and includes more than 50 hands-on lab sessions that deal with forensic science experiments in biology, chemistry, and physics. You'll learn the practical skills and fundamental knowledge needed to pursue forensics as a lifelong hobby—or even a career. The forensic science procedures in this book are not merely educational, they're the real deal. Each chapter includes one or more lab sessions devoted to a particular topic. You'll find a complete list of equipment and chemicals you need for each session. Analyze soil, hair, and fibers Match glass and plastic specimens Develop latent fingerprints and reveal blood traces Conduct drug and toxicology tests Analyze gunshot and explosives residues Detect forgeries and fakes Analyze impressions, such as tool marks and footprints Match pollen and diatom samples Extract, isolate, and visualize DNA samples Through their company, The Home Scientist, LLC (thehomescientist.com/forensics), the authors also offer inexpensive custom kits that provide specialized equipment and supplies you'll need to complete the experiments. Add a microscope and some common household items and you're good to go.

Molecular Microbial Ecology Manual-Antoon D. L. Akkermans 2014-01-13 For a long time microbial ecology has been developed as a distinct field within Ecology. In spite of the important role of microorganisms in the environment, this group of 'invisible' organisms remained unaccessible to other ecologists. Detection and identification of microorganisms remain largely dependent on isolation techniques and characterisation of pure cul tures. We now realise that only a minor fraction of the microbial com munity can be cultivated. As a result of the introduction of molecular methods, microbes can now be detected and identified at the DNA/RNA level in their natural environment. This has opened a new field in ecology: Molecular Microbial Ecology. In the present manual we aim to introduce the microbial ecologist to a selected number of current molecular techniques that are relevant in micro bial ecology. The first edition of the manual contains 33 chapters and an equal number of additional chapters will be added this year. Since the field of molecular ecology is in a continuous progress, we aim to update and extend the Manual regularly and will invite anyone to depo sit their new protocols in full detail in the next edition of this Manual. We hope this book finds its place where it was born: at the lab bench! Antoon D.L. Akkermans, Jan Dirk van Elsas and Frans J. de Bruijn March 1995 Molecular Microbial Ecology Manual 1.3.6: 1-8, 1996. © 1996 Kluwer Academic Publishers.

Leica M Photography-Brian Bower 1998 A user's guide to the Leica "M"camera. It includes advice on film, exposure, printing and accessories, together with a chapter on buying Leicas second-hand. The book is illustrated throughout with photographs demonstrating the range of the camera's possibilities.

Basic Geological Mapping-John W. Barnes 2013-04-03 Designed to be carried in the field, this pocket-sized how-to book is a practical guide to basic techniques in mapping geological structures. In addition to including the latest computerised developments, the author provides succinct information on drawing cross-sections and preparing and presenting 'fair copy' maps and geological diagrams. Contains a brief chapter on the essentials of report writing and discusses how to keep adequate field notebooks. A checklist of equipment needed in the field can be found in the appendices. Quote from 3rd edition "provides a wealth of good advice on how to measure, record and write reports of geological field observations" The Naturalist

Handbook of Vascular Biometrics-Andreas Uhl 2020

Proceedings of First International Conference on Information and Communication Technology for Intelligent Systems-Suresh Chandra Satapathy 2016-06-30 This volume contains 59 papers presented at ICTIS 2015: International Conference on Information and Communication Technology for Intelligent Systems. The conference was held during 28th and 29th November, 2015, Ahmedabad, India and organized communally by Venus International College of Technology, Association of Computer Machinery, Ahmedabad Chapter and Supported by Computer Society of India Division IV – Communication and Division V – Education and Research. This volume contains papers mainly focused on ICT for Computation, Algorithms and Data Analytics etc.

Leica Reflex Photography-Brian Bower 1997 This is a revised and updated edition of an established guide and reference for Leica SLR (single lens reflex) camera users. Covering the Leica R8 and other cameras, lenses and accessories introduced since its original publication, the book also includes practical information for those wishing to improve their photographic technique.

A Requiem for a Brand-Pradip Chanda 2010 Drawing from his extensive business management experience, Pradip Chand turns traditional wisdom on its head when he proposes that Brand Loyalty is inversely proportional to the income and education levels of the 'knowledge consumer'. He examines how and why brands become strategic assets, traces the evolution of the knowledge consumer and what can companies do to protect equity of the brands they have nurtured over the decades. A new approach to building a Brand Loyalty that gives marketers a competitive edge in today's high-tech, high-stake brand-hostile environment. The book combines the knowledge with engaging real life case studies and proven examples.

The British Journal of Photography- 1996

Olympus OM's-Milton Heiberg 1980

Gastrointestinal Interventional Endoscopy-Mihir S. Wagh 2019-11-16 This volume provides a concise yet comprehensive overview of advanced techniques in interventional endoscopy beyond ERCP and EUS. Comprised of sections on endoscopic resection (including EMR, ESD, STER and EFTR), bariatric endoscopy, endoscopic myotomy (POEM, GPOEM, ZPOEM and PREM), endoscopic anti-reflux therapies, endoscopic tissue apposition, and advances in interventional EUS, the text highlights indications and technical details, assesses safety and efficacy, and provides quality metrics and training pathways for these endoscopic procedures. The book is also accompanied by multiple photos and videos illustrating these endoscopic techniques. Written by world renowned experts in the field, Gastrointestinal Interventional Endoscopy: Advanced Techniques is a valuable resource for gastroenterologists and surgeons interested in the latest advances in interventional endoscopy.

British Journal of Photography- 1996

Concepts of Biology-Samantha Fowler 2018-01-07 Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand.We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

American Cinematographer Manual-Stephen H. Burum 2007 This newly revised edition of the American Cinematographer Film Manual, edited by Stephen Burum, ASC, continues to be the standard, providing fully updated, comprehensive coverage of cinematography from production to post.

QST.- 1968

Current Protocols Essential Laboratory Techniques-Sean R. Gallagher 2012-03-19 The latest title from the acclaimed Current Protocols series, Current Protocols Essential Laboratory Techniques, 2e provides the new researcher with the skills and understanding of the fundamental laboratory procedures necessary to run successful experiments, solve problems, and become a productive member of the modern life science laboratory. From covering the basic skills such as measurement, preparation of reagents and use of basic instrumentation to the more advanced techniques such as blotting, chromatography and real-time PCR, this book will serve as a practical reference manual for any life science researcher. Written by a combination of distinguished investigators and outstanding faculty, Current Protocols Essential Laboratory Techniques, 2e is the cornerstone on which the beginning scientist can develop the skills for a successful research career.

Self-Expandable Stents in the Gastrointestinal Tract-Richard Kozarek 2012-07-25 Self-expandable stents were initially placed for the treatment of cardiovascular diseases but now play an integral role in the relief of benign and malignant obstruction of the gastrointestinal tract and biliary system. Self-Expandable Stents in the Gastrointestinal Tract will familiarize the reader with the indications, techniques, and outcome following placement of expandable metal stents within the gastrointestinal tract. The volume covers all aspects of expandable stents including their composition, tissue responses, and placement techniques. In addition, placement using endoscopic and radiologic techniques is discussed. Unique illustrations allow the reader to gain knowledge that will improve their ability to care for their patients. The volume will serve as a comprehensive reference for all aspects of expandable stents. Self-Expandable Stents in the Gastrointestinal Tract will be extremely useful for physicians in the field of gastroenterology, endoscopy, and radiology, as well as gastrointestinal and thoracic surgeons whether they are in training or practice.

Difficult Airway Management-Mansukh Popat 2009-04-02 This pocketbook serves as a concise and practical manual for the management of the difficult airway in clinical practice.

Practical Colonoscopy-Jerome D. Waye 2013-04-02 Colonoscopy: Tips and Tricks is a practical guide to thefundamentals of this very common medical procedure. Specialistswill also find it a useful refresher tool and trainees ingastroenterology and practicing endoscopist doctors will find it anindispensable resource. Simply split into four sections,Pre-procedure, Basic Procedure, Operative Procedures andPost-procedure, the reader will be taken through the basics ofperforming colonoscopy in a step-by-step fashion, with fullattention given to setting up the colonoscopy setting and preparingthe patient as well as the fundamentals behind the differentprocedures themselves. Authored by one the world's leadingexpert in colonoscopy, Jerry Waye, along with an up and coming Gfellow at Mount Sinai. Complete with a companionwebsite featuring approximately 40 video clips of colonoscopyprocedures being performed by leading experts.

Mixed Reality and Gamification for Cultural Heritage-Marinos Ioannides 2017-04-26 This volume on virtual and augmented reality (VR/AR) and gamification for cultural heritage offers an insightful introduction to the theories, development, recent applications and trends of the enabling technologies for mixed reality and gamified interaction in cultural heritage and creative industries in general. It has two main goals: serving as an introductory textbook to train beginning and experienced researchers in the field of interactive digital cultural heritage, and offering a novel platform for researchers in and across the culturally-related disciplines. To this end, it is divided into two sections following a pedagogical model developed by the focus group of the first EU Marie S. Curie Fellowship Initial Training Network on Digital Cultural Heritage (ITN-DCH): Section I describes recent advances in mixed reality enabling technologies, while section II presents the latest findings on interaction with 3D tangible and intangible digital cultural heritage. The sections include selected contributions from some of the most respected scholars, researchers and professionals in the fields of VR/AR, gamification, and digital heritage. This book is intended for all heritage professionals, researchers, lecturers and students who wish to explore the latest mixed reality and gamification technologies in the context of cultural heritage and creative industries. It pursues a pedagogic approach based on trainings, conferences, workshops and summer schools that the ITN-DCH fellows have been following in order to learn how to design next-generation virtual heritage applications, systems and services.

Airway Management-Zahid Hussain Khan 2014-08-19 Because of his international prominence, Professor Khan has been able to gather an enviable list of experts in the field to contribute their experience with airway management in a multitude of clinical settings. The critical appraisal of the airway authored by the editor, Professor Khan, sets the stage for the important preoperative tests that may alert the clinician of the potential for a difficult airway so that appropriate plans can be made. The formidable "guest list" of authors spans the world and encompasses clinicians from Malaysia, the United States, Pakistan, India, Denmark, Singapore, Germany, Canada and Iran. What is equally remarkable is the list of topics discussed in the textbook and the varied clinical settings in which airway management is likely to pose particular and unique challenges: pediatrics; patients with cervical spine injury and those with traumatic brain injury; ambulatory surgery; patients with obstructive sleep apnea and obstetric patients. The book also addresses the latest in technological advances that can aid the clinician in diagnosing and managing the difficult airway, such as ultrasonography and also describes surgical approaches to managing the difficult airway, such as cricothyrotomy. Finally, underscoring the truly international appeal of the textbook and acknowledging the potential technological limitations of the developing world, a chapter is dedicated to the use of indigenous devices in managing the difficult airway.

Photographer's Guide to the Nikon Coolpix P900-Alexander S. White 2015-06-22 This book, by Alexander S. White, is a complete, clearly written guide to the operation of the Nikon Coolpix P900 digital camera. The book explains all shooting modes, menus, functions, and controls of this superzoom camera, accompanied by more than 350 full-color illustrations and sample photographs. The guide shows beginning and intermediate photographers how to use the camera's many options to get the results they want. The book explains topics such as autofocus, manual focus, HDR (High Dynamic Range) photography, ISO, memory cards, and flash modes. It includes a discussion of techniques for using the P900's phenomenal zoom lens, with a maximum optical focal length of 2000mm, to full advantage. The book also discusses the camera's features for image transfer and remote control through the P900's built-in Wi-Fi network, as well as its features for adding location data to images. The book includes sample images taken with the creative settings of the camera, including the Picture Control options, which alter the color processing of images; the Scene and Special Effects shooting modes, with settings optimized for subjects such as landscapes, birds, pets, sunsets, and action shots; and the camera's features for burst shooting and time-lapse photography. In addition, the book provides introductions to topics such as infrared photography, street photography, and macro photography. The book also explains the video features of the P900, which can shoot HD video with stereo sound and can record high-speed video at rates up to 4 times normal speed. In addition, the book describes procedures for playing back images and videos in the camera and for using the Filter Effects option to add special effects to images after they have been captured. In three appendices, the book discusses accessories for the Coolpix P900, including cases, external flash units, and charging and power options. The appendices include a list of useful web sites and other resources, as well as a section with "quick tips" to help users take advantage of the camera's features in the most efficient ways possible.

OR 2.0 Context-Aware Operating Theaters, Computer Assisted Robotic Endoscopy, Clinical Image-Based Procedures, and Skin Image Analysis-Danail Stoyanov 2018-10-01 This book constitutes the refereed joint proceedings of the First International Workshop on OR 2.0 Context-Aware Operating Theaters, OR 2.0 2018, 5th International Workshop on Computer Assisted Robotic Endoscopy, CARE 2018, 7th International Workshop on Clinical Image-Based Procedures, CLIP 2018, and the First International Workshop on Skin Image Analysis, ISIC 2018, held in conjunction with the 21st International Conference on Medical Imaging and Computer-Assisted Intervention, MICCAI 2018, in Granada, Spain, in September 2018. The 11 full papers presented at OR 2.0 2018, the 5 full papers presented at CARE 2018, the 8 full papers presented at CLIP 2018, and the 10 full papers presented at ISIC 2018 were carefully reviewed and selected. The OR 2.0 papers cover a wide range of topics such as machine vision and perception, robotics, surgical simulation and modeling, multi-modal data fusion and visualization, image analysis, advanced imaging, advanced display technologies, human-computer interfaces, sensors. The CARE papers cover topics to advance the field of computer-assisted and robotic endoscopy. The CLIP papers cover topics to fill gaps between basic science and clinical applications. The ISIC papers cover topics to facilitate knowledge dissemination in the field of skin image analysis, as well as to host a melanoma detection challenge, raising awareness and interest for these socially valuable tasks.

Platinum and Palladium Printing-Dick Arentz 2013-01-17 First Published in 2005. Routledge is an imprint of Taylor & Francis, an informa company.

American Photographer- 1986
