Snowstruck-Jill Fredston 2007-01-08 Every year around the globe, people cross paths with avalanches-some massive, some no deeper than a pizza box-often with deadly results. Avalanche expert Jill Fredston stalks these so-called freaks of nature, forecasting where and when they will strike, deliberately triggering them with explosives, teaching potential victims how to stay alive, and leading rescue efforts when tragedy strikes. Having spent decades trying to keep avalanches and people apart, Fredston brings them together unforgettably in Snowstruck. From a rare store of personal experience, she conveys a panorama of perspectives: a skier making what may prove his final decision, a victim buried so tightly that he can't move a finger, rescuers racing both time and weather, forecasters treading the line between reasonable risk and danger. Seamlessly interweaving these accounts, Fredston brings to life the awesome forces of nature that can turn the mountains deadly-and the equally inexorable forces of human nature that lure us time and again into treacherous terrain.

Nations Under God-Luke M Herrington 2015-08-16 'Nations under God: The Geopolitics of Faith in the Twenty-First Century' is a timely contribution to the on-going discussion on religion and politics. The volume brings together over thirty leading scholars from a variety of disciplines such as political science, international relations theory, sociology, theology, anthropology, and geography. Utilising case studies, empirical investigations, and theoretical examinations, this book focuses on the complex roles that religions play in world affairs. It seeks to move beyond the simplistic narratives and overly impassioned polemics which swamp the discourse on the subject in the media, on the internet, and in popular nonfiction, by acting as a vessel for scholarly research on religion. The book presents a balanced analysis of the multifaceted roles taken on by religions, and religious actors, in global politics. Contributors: Stephen Dawson, Jodok Troy, Gertjan Dijkink, John A. Rees, Mark S. Cladis, Fabio Petito, Linda Woodhead, Jonathan Fox, Brendan Sweetman, Don Handelman, Scott W. Braxton Bragg-Earl J. Hess 2016-09-02 As a leading Confederate general, Braxton Bragg (1817-1876) earned a reputation for incompetence, for wantonly shooting his own soldiers, and for losing battles. This public image established him not only as a scapegoat for the South's military failures but also as the chief whipping boy of the Confederacy. The strongly negative opinions of Bragg's contemporaries have continued to color assessments of the general's military career and character by generations of historians. Rather than take these assessments at face value, Earl J. Hess's biography offers a much more balanced account of Bragg, the man and the officer. While Hess analyzes Bragg's many campaigns and battles, he also emphasizes how his contemporaries viewed his successes and failures and how these reactions affected Bragg both personally and professionally. The testimony and opinions of other members of the Confederate army—including Bragg's superiors, his fellow generals, and his subordinates—reveal how the general became a symbol for the larger military failures that undid the Confederacy. By connecting the general's personal life to his military career, Hess positions Bragg as a figure saddled with unwarranted infamy and humanizes him as a flawed yet misunderstood figure in Civil War history.

First Impressions-Marilyn Sachs 2015-03-31 " I read on. And then it happens. On page 89. Mary is humiliated, and I know I have to step in. There she is, in an ill-fitting, wine-colored gown that doesn't do anything for her mousy complexion, gathering up her music, when I pass by, and spill my glass of punch right on her dress. I turn, and there is Kevin, dressed in a scarlet coat and all the rest of the uniform of a British Soldier, circa 1811. 'What are you doing here?' I ask. 'Well, this is the part I'm up to in the book.'" The smart middle child in a blue-collar family identifies with Mary, the middle child in Jane Austen's Pride and Prejudice. When Alice enters Mary's world and makes changes in both their lives, she learns that first impressions aren't always right.

The First Americans-James Adovasio 2009-01-16 J. M. Adovasio has spent the last thirty years at the center of one of our most fiery scientific debates: Who were the first humans in the Americas, and how and when did they get there? At its heart, The First Americans is the story of the revolution in thinking that Adovasio and his fellow archaeologists have brought about, and the firestorm it has ignited. As he writes, "The work of lifetimes has been put at risk, reputations have been damaged, an astounding amount of silliness and even profound stupidity has been taken as serious thought, and always lurking in the background of all the argumentation and gnashing of tenets has been the question of whether the field of archaeology can ever be pursued as a science."
Design of 2.4 GHZ CMOS Frontend for Bluetooth-Florian Krug 2001-06-05 Inhaltsangabe:Abstract: The Bluetooth wireless technology is the worlds new short-range RF transmission standard for small form factor, low-cost, short-range radio links between portable or desktop devices. The technology promises to eliminate the confusion of cables, connectors and protocols confounding communications between today high tech products. In the first step a 2.45 GHz Low Noise Amplifier (LNA), intended for use in a Bluetooth receiver, has been designed in a standard 0.18 um CMOS process. The amplifier provides a simulated switchable forward voltage gain of +16 / -7.7 dB with a simulated noise Figure (NF) of only 3 dB while drawing 2.8 mA from a 1.8 V supply. The die area of the LNA (pads included) is 0.79 mm2. In the second step a 2.45 GHz Power Amplifier (PA), also intended for the Bluetooth standard, has been designed in the same 0.18 um CMOS process as for the LNA. The class-A PA achieves a simulated forward gain (S21) of 23 dB and a simulated output 1 dB compression point (P1dB) of 5.5 dBm, with a power-added efficiency (PAE) of 23 % while drawing 15.8 mA from a 1.8 V supply. The die area of the PA (pads included) is 2.1 mm2. Thermodynamics: Fundamentals and Applications for Chemical Engineers-Miguel T. Fleischer 2017-12-29 Thermodynamics: Fundamentals and Applications for Chemical Engineers explores the concepts and properties of thermodynamics and illustrates how they can be applied to solve practical problems. The book introduces the fundamentals of thermodynamics for multi-phase, multi-component systems, providing a framework for dealing with problems in chemical engineering including mixing, compressing, and distilling fluids. The first eight chapters of Thermodynamics focus on single-component thermodynamics, introducing important concepts that will be referenced throughout subsequent chapters. Later chapters introduce modeling for multi-component systems. Topics covered include: properties as a function of state variables; first and second law of thermodynamics; power cycles, combustion, refrigeration cycles, and heat pumps; equilibrium phase relationships; correlations and calculations of vapor-liquid equilibrium data; elementary theories of solutions; and the efficiency of multicomponent separation and reaction processes. The Second Law of Thermodynamics, availability concepts, and process efficiency receive extensive coverage. The clear, well-organized sequence of the chapters helps students successfully learn and retain information. Each of the fifteen chapters includes updated sample problems that underline key principles and problem-solving steps. The book has numerous appendixes for quick reference on everything from conversion factors to Francis constants, and from properties of pure substances to thermodynamics tables and Diagrams. Thermodynamics can be used by chemical, petroleum, and mechanical engineering departments in introductory and intermediate courses on engineering thermodynamics and thermodynamics fundamentals. Born and raised in Chile, Miguel T. Fleischer earned his M.S. and Ph.D. in chemical engineering from the University of Houston where he is an adjunct professor and the undergraduate program director of the Chemical and Biomolecular Engineering Department. Dr. Fleischer worked at Royal Dutch Shell for more than 26 years in research and development, manufacturing, finance, and management. He began teaching when he was an undergraduate student in Chile where he developed a program sponsored by Universidad CatÓlica de Chile to prepare high school students for college. He was the co-owner and CEO of Fleischer International Trading, a private enterprise that imported and distributed wines from all over the world for 13 years. He continued teaching while he was a graduate student at the University of Houston. He has received the Outstanding Lecturer award of the Cullen College of Engineering four times, the University's Teaching Excellence Award, the Cullen College of Engineering's Career Teaching Award, and the Cullen College of Engineering's Distinguished Engineering Alumni Award.
