PowerBuilder 9-Bill Green 2003 Annotation Advanced guide to distributed applications using PowerBuilder 9. This book addresses development Web and Intranet-based systems, including Web Services, Portals, Application-Servers, XML, and Mobile Access. Content provides both specific implementation techniques and architectural patterns for distributed application development. PowerBuilder 9, to be released Q4 2002, introduces many highly-anticipated distributed development features including support for Web Services and Java application servers. Version 9 of PowerBuilder introduces many features designed specifically to blend the traditional strength of PowerBuilder as a rapid Client/Server application development tool with the new emerging models for distributed application development. PowerBuilder developers need PowerBuilder-specific information on interacting with Java application servers, such as WebSphere, WebLogic, and Sybases Enterprise Application Server (EAServer), and Web Service development. This book presents the new capabilities of PowerBuilder 9 along with the architecture and patterns required to create distributed systems in PowerBuilder. William Green and his team of writers are among the most prominent members of the Sybase community, having helped found TeamSybase in 1994. They have written and served on the advisory boards for every major PowerBuilder publication and have authored three books -- PowerBuilder 5 Object-Oriented Design and Development, PowerBuilder Foundation Class (PFC), and Secrets of the PowerBuilder Masters. They respond to several hundred newsgroups and listserv postings daily. They are active consultants implementing PowerBuilder-based solutions and serve on key community advisory panels within Sybase.

Writing a Professional Life-Gerald J. Savage 2001 This is the first collection of narratives by practicing technical communicators telling their own personal stories about the workplace and their lives on the job. The authors portray a wide range of jobs: writers, editors, interface designers, marketing writers, and trainers working in 9 different technical fields, including software, R&D, engineering, medicine, transportation, and telecommunications. The stories vividly demonstrate the unique power of narrative as a teaching and learning tool. Unlike fabricated cases, these real-life narratives show new and veteran technical writers at work on the job, dealing with tasks, clients, and co-workers, and revealing their insights, values, and attitudes about their work. The stories also show the skills required in the profession and the ethical and other issues raised in the course of the workday. For anyone interested in technical communication and professional writing.
