A Manual for Teaching English in China-Bill Burkett 2009-05 Come with us now to the first day of class to teach English in China. Both students and teacher's hearts pound with anticipation as students file into the room, chatting and pretending not to notice the foreign teacher standing behind his desk. But they can't help glancing at him anyway for a first look. Laughter mingles with the sound of books and chairs clanking together. A buzzer sounds in the hall, and Bill Burkett, affectionately known in China by his students as "Mr. Bill," begins. A Manual for Teaching English in China takes us from the first day's buzzer through the first weeks, months, and semesters of teaching English in China, sharing numerous stories, laughs, interesting facts, and many effective ways of teaching ESL. A Manual for Teaching English in China is packed with Bill Burkett's practical ideas, methods, and teaching techniques that can actually be used to teach ESL anywhere. Bill Burkett recently returned from a seven year stint of teaching English in the universities and training schools of Henan, China. An internationally renowned public speaker, Burkett has lived in 46 nations in the last 43 years. He developed a strong interest in linguistics which was fueled by his close association with interpreters. In Chinese classrooms where he taught English, he conducted active research, experimenting and taking student polls. He concentrated on eliminating speech impediments and strong accents. His education, experiences, and research shaped his philosophy of teaching English as a Second Language and formed the basis of his first ESL book, A Manual for Teaching English in China. Following the manual is Secrets to Better English which reveals a proven method of teaching ESL without accent. Although Burkett's doctorate is in philosophy, his love is making a difference in his students' lives by teaching diction and the skills of speech.

Vietnamese Pronunciation-Nguyen Dang Liem 2019-03-31 This is the first in the PALI Language Text series to deal with a Southeast Asian language. The author's approach in this pronunciation guide owes much to the methodology pioneered by Charles Fries. A basic assumption of this approach is that in learning a new language the problem is not first of all learning vocabulary but "mastery of the sound system." Moreover, the problems of learning a new sound system vary with the native language of the student. This manual is designed specifically for the English-speaking student and concentrates on the particular difficulties an English-speaking person would have in learning to speak Vietnamese. There are no outstanding grammatical differences in the three main Vietnamese dialects, but there are some significant phonological differences. The Saigon dialect forms the main core of the lessons here, but materials and drills of standard Hanoi Vietnamese have been included in review lessons for recognition purposes.
