

# [eBooks] Saudi Board Scfhs

Thank you very much for downloading **saudi board scfhs**. Maybe you have knowledge that, people have look hundreds times for their chosen readings like this saudi board scfhs, but end up in harmful downloads.

Rather than enjoying a good book with a cup of coffee in the afternoon, instead they cope with some harmful virus inside their computer.

saudi board scfhs is available in our book collection an online access to it is set as public so you can get it instantly.

Our books collection spans in multiple countries, allowing you to get the most less latency time to download any of our books like this one.

Merely said, the saudi board scfhs is universally compatible with any devices to read

The Canmeds 2005 Physician Competency Framework-Jason R. Frank 2005-04-05 "The CanMEDS 2005 framework replaces the previous version published in 1996, called 'Skills for the new millenium.1'. The CanMEDS initiative has involved the work of hundreds of College Fellows, family physician educators, educationalists and other contributors since the beginning of the 1990s. CanMEDS 2005 is one of the products of the CanMEDS Phase IV: Faculty development - a component of a continuous quality improvement process in the RCPSC education standards and policy framework ..." -- preface.

Scenario Based MCQ in Dentistry-Mohammad Khurshed Alam 2020-03-10 "Dentistry has constantly evolved over the years to keep abreast of the latest trends, techniques, and diagnostic procedures. Dental Schools have undergone a number of changes in an effort to arrive upon the ideal format for testing clinical knowledge in examinations. Multiple-choice questions (MCQs) have been the most common modality by which dental students were examined. Although MCQs enable the testing of a broad range of topics, as well as being cost effective, they have largely been abandoned in favour of scenario-based questions (SBQs). Traditional MCQs often abstract and measure only whether people recall facts in their short-term memory. Converting these questions to scenario-based questions can increase the level of difficulty, measure higher level thought and providing relevant context. The authors of Scenario Based MCQ in Dentistry have endeavoured to keep these facts in mind and provide a significant number of high-quality SBQs that comprehensively examine the dental curriculum. Most of the questions are scenario based. Each question not only provides an opportunity to apply clinical knowledge and correctly identify the single best answer to a question, but also to learn why the other answers are wrong, greatly increasing the clinical acumen and learning opportunity of the reader. Selection tests and competitive exams are hurdles that a candidate seeks to clear with ease. It all depends on meticulous preparation and the quality of resource materials available to the student. Considering the quantity of subject matter that needs to be covered, it becomes a herculean task unless the candidate chooses the right training tool. Reference texts are often too advanced and undergraduate texts are insufficiently updated or lacking in depth and detail. In this context, a lack of good revision aids can be frustrating. This book has been compiled with the selection tests in mind as a tool for rapid revision and analytical learning. It is useful for doctors, dental students, graduates, dental nurses, technicians, as well as specialists seeking professional excellence, or for those studying for the various licensing exams conducted by SCFHS, Saudi Board, HAAD, OMSB, SCHQ, DHCC, DHA, and MOH. This book aims to provide dental students with a useful source for exam preparation, as well as for supplementing the readers' knowledge so that they feel fully prepared for the various postgraduate entrance examinations"--

Pharmacy Resident Shortcut-Khalid Al Sulaiman 2016-05-10 Pharmacy Resident Shortcut (PRS) is the first book of its kind. This book is a combination of basics, recent guidelines and clinical practice key points. For this reason, it will help pharmacy residents to understand the topics that are related to their practice in a very concise and easy way. PRS contains more than 45 topics that residents can be exposed to during their daily practice. In addition, the topics are in line with SCFHS manual. The following resources have been used as references for PRS: ACCP, ASHP, Up To Date, Applied therapeutics, Lexicomp(r), The Sanford Guide to Antimicrobial Therapy, Recent guidelines and clinical practice. PRS is also available in google play and apple store.

Critical Care Cornerstone-Khalid Al Sulaiman 2018-09 Triple C is a combination of basics, recent guidelines, clinical and pharmacy practice. It will enhance the practitioner's ability for questioning, thinking, analyzing and clinical judgment in critical ways. In addition, it will help practitioners to understand the topics that are related to their practice in a very concise and easy way.

Blueprints Pediatrics-Bradley S. Marino 2004 More than just Board review for USMLE, Steps 2 & 3, Blueprints Pediatrics, 3rd edition can help you during clerkship rotations and subinternship. The new edition has been updated with the help of residents to maintain a student-to-student approach. Features include: Concise, accurate, clinical high-yield content covering all you need to know for the USMLE and rotations USMLE style questions with full explanations provided in the answers Key Points in every section highlighting the most important, high-yield information for each topic Color-enhanced design to increase the usefulness of figures and tables Perfect for medical students -- physician assistants, nurse practitioners and related health professionals will also find Blueprints valuable.

Pharmacy Practice in Developing Countries-Ahmed Fathelrahman 2016-02-13 Pharmacy Practice in Developing Countries: Achievements and Challenges offers a detailed review of the history and development of pharmacy practice in developing countries across Africa, Asia, and South America. Pharmacy practice varies substantially from country to country due to variations in needs and expectations, culture, challenges, policy, regulations, available resources, and other factors. This book focuses on each country's strengths and achievements, as well as areas of weakness, barriers to improvement and challenges. It sets out to establish a baseline for best practices, taking all of these factors into account and offering solutions and opportunities for the future. This book is a valuable resource for academics, researchers, practicing pharmacists, policy makers, and students involved in pharmacy practice worldwide as it provides lessons learned on a global scale and seeks to advance the pharmacy profession. Uses the latest research and statistics to document the history and development of pharmacy practice in developing countries Describes current practice across various pharmacy sectors to supply a valuable comparative analysis across countries in Africa, Asia, Europe, and South America Highlights areas of achievement, strengths, uniqueness, and future opportunities to provide a basis for learning and improvement Establishes a baseline for best practices and solutions

Enterprise Architecture for Connected E-Government: Practices and Innovations-Saha, Pallab 2012-06-30 "This book addresses the gap in current literature in terms of linking and understanding the relationship between e-government and government enterprise architecture"--Provided by publisher.

Personal Injury and Damage Ascertainment under Civil Law-Santo Davide Ferrara 2016-10-06 This volume serves to provide an international overview of personal injury compensation in different geographical areas (15 countries already included), with a special focus on the methods used to ascertain the injury and the related damages. It also goes on to clarify the logical and methodological steps required for a sequential, in-depth ascertainment of any traumatic event and the related personal damage, both pecuniary and non-pecuniary. Personal injury is a legal term for an injury to the body, mind or emotions suffered by the plaintiff under tort and/or civil law regulations. Damages related to the injury can be pecuniary or non-pecuniary in nature. Although several comparative studies and research projects on tort and civil law and personal injury claims aimed at developing new tools for promoting harmonization of private law have been performed at an international level, heterogeneity and divergences still exist in the definition and compensation of personal injury and damage across different national legislative systems. The starting point for any awarding procedure should be a medical, or rather a medico-legal, assessment to gain evidence on the trauma or event causing the injury, the mechanism of injury, the pre-existing health status of the injured party, and the health consequences of the injury (temporary and permanent impairment, work incapacity, etc.). In order to pursue the ultimate goal of an international harmonization of personal injury compensation, it is of utmost importance to define the quality requirements for the medico-legal ascertainment methodology, which are essential for guaranteeing the objectivity, rigor, and reproducibility of the data and the evidence collection procedure. Currently, there are no supra-national medico-legal guidelines dealing with the ascertainment methodology of personal injury and damage under tort and civil law.

Pharmacy Practice in Developing Countries-Ahmed Fathelrahman 2016-02-13 Pharmacy Practice in Developing Countries: Achievements and Challenges offers a detailed review of the history and development of pharmacy practice in developing countries across Africa, Asia, and South America. Pharmacy practice varies substantially from country to country due to variations in needs and expectations, culture, challenges, policy, regulations, available resources, and other factors. This book focuses on each country's strengths and achievements, as well as areas of weakness, barriers to improvement and challenges. Gender Equity in the Medical Profession-Bellini, Maria Irene 2019-08-16 The presence of women in the practice of medicine extends back to ancient times; however, up until the last few decades, women have comprised only a small percentage of medical students. The gradual acceptance of women in male-dominated specialties has increased, but a commitment to improving gender equity in the medical community within leadership positions and in the academic world is still being discussed. Gender Equity in the Medical Profession delivers essential discourse on strategically handling discrimination within medical school, training programs, and consultancy positions in order to eradicate sexism from the workplace. Featuring research on topics such as gender diversity, leadership roles, and imposter syndrome, this book is ideally designed for health professionals, doctors, nurses, hospital staff, hospital directors, board members, activists, instructors, researchers, academicians, and students seeking coverage on strategies that tackle gender equity in medical education.

Essential Otolaryngology-Keat Jin Lee 2003 A quick reference to the most common diseases and disorders in the various areas of head and neck surgery. The very affordable Eighth Edition features contributions from 50 distinguished practitioners who present a wealth of clinically relevant information from the forefront of otolaryngology research and practice.

Pediatric Ophthalmology and Strabismus-Kenneth W. Wright 2013-11-11 to the Second Edition here have been significant changes in pediatric Chapter 56 by Maya Eibschitz-Tsimhoni, MD, is a T ophthalmology and strabismus since the first wonderful contribution to the literature, as it reviews edition. Great effort has gone into incorporat 235 important ocular disorders that have systemic ing recent advances into this second edition. Each manifestations, and it includes a detailed glossary of chapter in the book has been revised, and over half of terms. them have been completely rewritten. In addition to As with the first edition, our goal is to present a updating and revising the entire book, we have added comprehensive textbook of pediatric ophthalmology three new chapters: Chapter 7 on electrophysiology and strabismus written in a clear, reader-friendly style. and the eye, Chapter 1 7 on strabismus surgery, and Our hope is that the readerwill find the second edi Chapter 56 on congenital syndromes with ocular man tion of Pediatric Ophthalmology and Strabismus to ifestations. Chapter 17 is the definitive work on pedi be scientifically informative, clinically useful, and en atric ocular electrophysiology, bar none, and was fin joyable to read. ished just weeks before the untimely death of its author, Dr. Tony Kriss (see tribute in Chapter 17).

Cases on Medical Nutrition Therapy for Gastrointestinal Disorders-Aljaaly, Elham Abbas 2020-11-06 Medical nutrition therapy plays a central role in the management of diseases including reducing disease risk, slowing disease progression, and monitoring nutritional status. Though a nutrition care process has been implemented in some countries, many do not have a national standard for nutrition and dietetic practices for different diseases including the scope of gastrointestinal disorders. Moreover, there is no guidance to dietetic practice by most of the governing bodies of the world. Cases on Medical Nutrition Therapy for Gastrointestinal Disorders presents real-world case studies on nutrition assessment, diagnosis, intervention, monitoring, and evaluation standards and practices. Moreover, the cases provide critical updates on the use of medical nutrition therapy for gastrointestinal disorders that include but are not limited to Celiac Disease, Crohn's Disease, Irritable Bowel Syndrome, constipation, and bowel obstructions and discusses strategies for the prevention and management of these disorders. Registered dietitians, dietetic interns, nutritionists, healthcare professionals, researchers, academicians, and students will benefit from the scenarios presented within this book.

Rhoton's Cranial Anatomy and Surgical Approaches-Albert L. Rhoton, Jr. 2019-10-03 THE DEFINING WORK IN NEUROSURGERY, REISSUED FOR A NEW GENERATION OF TECHNICAL EXCELLENCE Cranial Anatomy and Surgical Approaches is the master work of the legendary neurosurgeon Albert L. Rhoton, Jr. -- a distillation of 40 years of work to improve safety, accuracy, and gentleness in the medical specialty the author helped shape. Newly reissued and featuring more than 2000 full-color illustrations, this definitive text on the microsurgical anatomy of the brain remains an essential tool for the education and enrichment of neurosurgeons at any career stage. It fulfils its author's hopes to make, in his words, the "delicate, fateful, and awesome" procedures of neurosurgery more gentle, accurate, and safe. Across three sections, Cranial Anatomy and Surgical Approaches details the safest approaches to brain surgery, including: · Micro-operative techniques and instrument selection · Microsurgical anatomy and approaches to the supratentorial area and anterior cranial base, including chapters on aneurysms, the lateral and third ventricles, cavernous sinus and sella. · Anatomy and approaches to the posterior cranial fossa and posterior cranial base, including chapters on the fourth ventricle, tentorial incisura, foramen magnum, temporal bone, and jugular foramen · Supra- and infratentorial areas, including chapters on the cerebrum and cerebellum and their arteries and veins

Cytology-Edmund S. Cibas 2003 Cytology 2e provides the practicing and trainee pathologist with a practical guide to the diagnostic interpretation of cytological specimens. It is concise yet covers all of the organ systems in which the procedure is used, the number of pages devoted to each body site is proportional to the clinical relevance of cytology for that site. Each chapter includes a discussion of indications and methods. Includes the use of special techniques such as immunohistochemistry, flow cytometry, and molecular biology in order to resolve difficulties in interpretation and diagnosis. Provides an in-depth analysis of common diagnostic pitfalls in order to assist the pathologist with his/her daily signing -out and reporting. Increased use of color -highlighted boxes to summarize differential diagnoses, diagnostic pitfalls, tissue acquisition protocols. Will help the pathologist sign -out reports more quickly and accurately. Over 500 Color illustrations incorporated throughout the text Addition of capsule summaries. Highlighted boxes with easy-to-read "bullets" of information on specific entities. Greater emphasis on differential diagnosis. More cyto-histologic correlation, with images Brand new chapter on quality control. With 8 additional contributing experts.

MCQs in Oral and Maxillofacial Surgery-Sonia Jindal 2011-03-14

First Aid for the USMLE Step 3, Fourth Edition-Tao Le 2015-10-22 The ultimate preparation for the USMLE Step 3—completely revised and updated! • The resident’s trusted, one-stop guide to acing the Step 3—written by residents and reviewed by faculty for accuracy • Packed with proven test-taking strategies for the newly revised, 2-day exam • Concise, high-yield format highlights board-relevant information • Renewed emphasis on integrated pathophysiology, plus diagnosis and management “next steps” • 100 mini-cases ideally prepare you for the case portion of the exam • More study-enhancing, vignette-style “flash cards” and full-color clinical images • Resident-tested tips and shortcuts for the CCS • And more!

Teaching and Learning in Clinical Settings-Richard Hays 2006 This edition provides updated information and developments in support services and incorporates recent research on bereavement. It also gives more prominence to the needs of grieving children and youngsters.

MCQs in Plastic Surgery-Kayvan Shokrollahi, 2009-09-01 Multiple Choice Questions in Plastic Surgery provides over 400 questions, answers and explanations covering the breadth of plastic and reconstructive surgery including burns. The expansive array of questions with detailed explanations and references will provide a solid foundation for those preparing for final specialty examinations such as the American Boards, the FRCS (Plast), EBOPRAS, MCh and others. The questions are drawn from international experts and are up-to-date with the latest concepts and techniques, including face transplantation, new trends in reconstructive and aesthetic surgery, and recent scientific advances. It will therefore appeal to those interested in plastic surgery education globally. In particular, it will help plastic surgeons to keep up-to-date in the specialty, and demonstrate this through continuing medical education (CME) and for processes of revalidation.

Adult Learning Theories-David C. M. Taylor 2014

Human Resources For Health In Europe-Dubois, Carl-Ardy 2005-12-01 This book analyses how the current regulatory processes and practices related to key aspects of the management of the health professions may facilitate or inhibit the development of effective responses to challenges facing health care systems in Europe. The authors document how health care systems in Europe are confronting existing challenges in relation to the health workforce and identify the strategies that are likely to be most effective in optimizing the management of health professionals in the future.

Ocular Infections-Khalid F. Tabbara 2014-12-04 Ocular infections remain an important cause of ocular morbidity and loss of vision, yet many are preventable or curable. Early diagnosis and prompt treatment help in the control of such infectious disorders and the prevention of blindness. There are many infectious diseases of the eye and

adnexa and knowledge of their diagnosis and management is essential to an optimal therapeutic outcome. This book provides the practitioner with the important information required to ensure appropriate diagnosis and management of ocular infectious diseases. Specific clinical signs and symptoms are outlined, and the role of specific diagnostic tests, including molecular biology techniques, is explained. All of the most common microorganisms are considered and current knowledge on the antimicrobial therapy of ocular infections is clearly summarized. Ocular Infections will be a great help to physicians as a guide to the care of patients with ocular infectious diseases.

Adult Hydrocephalus-Daniele Rigamonti 2014-02-06 Adult hydrocephalus is an insidious yet treatable condition that develops slowly, with usual onset around 60 years of age. It is poorly recognized and many cases are not diagnosed until late in the course of disease, leading to poorer patient outcomes and a high financial cost to healthcare providers. The resulting neurological symptoms include gait/balance problems, loss of bladder control, and a cognitive decline leading to dementia, which is often mistaken for Alzheimer's disease. This book - the first published on this topic since 1993 - provides comprehensive guidelines to improve the speed and accuracy of diagnosis, and covers various neurosurgical techniques used to treat the disease, including the insertion of different types of shunts and endoscopic third ventriculostomy. This is essential reading for neurologists, neurosurgeons, family physicians, and radiologists who may well encounter adult patients with hydrocephalus more often than they realize.

Healthcare Development Strategies in the Kingdom of Saudi Arabia-Mohammed H. Mufti 2007-05-08 This work deals with the current health policy environment, organization and delivery of health services in the Kingdom of Saudi Arabia. It discusses present financing means, and future financing methods such as a proposed national health insurance program and user-changes as well as important strategic issues. It is for healthcare directors, planners and strategists and will be of interest to experts and international investors in health system reorganization.

Emergency Medicine MCQs-Waruna De Alwis 2012-10-09 An invaluable self-assessment tool for emergency medicine trainees in Australasia. Emergency Medicine MCQs is an essential resource for Australasia's emergency medicine trainees. A practical self-assessment tool, the book assists trainees as they expand and refine their knowledge of emergency medicine, and will ultimately help them pass the Australasian Emergency Medicine Fellowship examination (FACEM). The multiple-choice questions in Emergency Medicine MCQs cover both the core and non-core areas in the Australasian Emergency Medicine Fellowship. Using this text, trainees can revise alone or with their peers to identify the areas in which they need further development. The curriculum is divided into three main areas where trainees require expert level of knowledge, high level of knowledge and general level of knowledge. It covers important clinical problems encountered in everyday emergency medicine practice - from cardiovascular emergencies through to obstetric and gynaecology emergencies, disaster management and toxicology. As well as being ideal for emergency medicine trainees qualifying through AECM, the book is a useful resource for GPs taking the GEM qualification through ACEM and JMOs 'on call'. Plus, this emergency medicine text is accompanied by an app - a separate product containing 180 randomised multiple-choice questions on all the topics within the book.

Family Practice in the Eastern Mediterranean Region WHO HB SPECIAL EDITION-Hassan Salah 2018-10-26 This is the first book to analyze in depth the current causes of shortage of family physicians and the relative weakness of the family practice model in many countries in the Eastern Mediterranean Region. Focusing on engagement with the private health sector in scaling up family practice, the book explores why primary health care can make the difference and how it can be introduced and strengthened. Comparative experiences from around the world put the EMR in context, while the book also highlights where the EMR is special - in particular, the burden for health care of refugees and displaced persons, and the need of public-private partnerships.

Neurosurgery Oral Board Review-Jonathan Stuart Citow 2011-06-24 Praise for the first edition:Valuable structure for academic preparation...well-organized, comprehensive outline from which to study...good last-minute warm-up --Journal of NeurosurgeryThe second edition of Neurosurgery Oral Board Review builds on the success of the bestselling first edition in helping you prepare for your oral boards in neurosurgery. Not only does the book pinpoint the key clinical information you need, but it offers practical, confidence-building tips that will help you relax and succeed on the exam.New to this expanded and fully-updated Second Edition: Expanded introduction on what to expect at the actual exam, how to utilize your time, when and how to answer the toughest questions, and the single most important area where you must demonstrate competency 45 new illustrated clinical case vignettes offer practice in differential diagnosis, work-up, treatment, and handling complications; analysis of each case is included at the end of the book A restructured table of contentsfollows the format of the exam (first hour: spine, second hour: cranial, third hour: miscellaneous) The addition of 'Helpful Hints' at the end of each chapter give you the benefit of the authors' extensive clinical experience Comprehensive yet concise, this easy-to-use review is essential for your exam preparation and for questions that arise in clinical practice. It is also an indispensable study tool and reference for all senior residents, junior neurosurgeons getting ready to take their oral boards in neurosurgery, and neurosurgeons preparing to take their re-certification exams.

Medical Education for the Future-Alan Bleakley 2011-02-21 The purpose of medical education is to benefit patients by improving the work of doctors. Patient centeredness is a centuries old concept in medicine, but there is still a long way to go before medical education can truly be said to be patient centered. Ensuring the centrality of the patient is a particular challenge during medical education, when students are still forming an identity as trainee doctors, and conservative attitudes towards medicine and education are common amongst medical teachers, making it hard to bring about improvements. How can teachers, policy makers, researchers and doctors bring about lasting change that will restore the patient to the heart of medical education? The authors, experienced medical educators, explore the role of the patient in medical education in terms of identity, power and location. Using innovative political, philosophical, cultural and literary critical frameworks that have previously never been applied so consistently to the field, the authors provide a fundamental reconceptualisation of medical teaching and learning, with an emphasis upon learning at the bedside and in the clinic. They offer a wealth of practical and conceptual insights into the three-way relationship between patients, students and teachers, setting out a radical and exciting approach to a medical education for the future. "The authors provide us with a masterful reconceptualization of medical education that challenges traditional notions about teaching and learning. The book critiques current practices and offers new approaches to medical education based upon sociocultural research and theory. This thought provoking narrative advances the case for reform and is a must read for anyone involved in medical education." - David M. Irby, PhD, Vice Dean for Education, University of California, San Francisco School of Medicine; and co-author of Educating Physicians: A Call for Reform of Medical School and Residency "This book is a truly visionary contribution to the Flexner centenary. It is compulsory reading for the medical educationalist with a serious concern for the future - and for the welfare of patients and learners in the here and now." Professor Tim Dornan, University of Manchester Medical School and Maastricht University Graduate School of Health Professions Education. Swanson's Family Medicine Review-Richard W. Swanson 2009 Thoroughly revised and updated, the most complete family medicine board review guide continues to be the resource of choice for anyone preparing to take the American Board of Family Medicine (ABFM) examination. This edition includes dozens of new cases.

The Business Year: Abu Dhabi 2020-Peter Howson 2020-04-20 As Ecuador and the world at large grapple with the emerging challenge of the COVID-19 pandemic, it is important not to forget the fundamentals of the Ecuadorian economy and the success stories of 2019 and the start of 2020. We believe contained within these pages is an accurate, balanced account of the state of the Ecuadorian economy as of publication, told through the words of the dozens of top public- and private-sector figures. The Business Year's country-specific publications, sometimes featuring over 150 face-to-face interviews, are among the most comprehensive annual economic publications available internationally. This 212-page publication covers green economy, finance, hydrocarbons, mining, agriculture, construction, industry, transport, education, health, ICT, and tourism.

Hero-Rhonda Byrne 2013-11-19 FROM ZERO TO HERO . . . YOUR SECRET MAP TO A RICH LIFE What is your true calling and why aren't you already living it? Imagine if there was a map that showed you step by step how to get from where you are now to your true calling and the life you were born to live - the most brilliant, rich, fulfilling, and dazzling life you could ever dream of. You are holding in your hands such a map. HERO is the map for your life. By following the journeys of twelve of the most successful people on the planet today, you'll learn how to use your inner powers to overcome obstacles and to make impossible dreams come true. You'll be inspired to find your own calling and start taking the steps toward making the life of your dreams an everyday reality. Be the hero you are meant to be.

Patient Safety in Plastic Surgery-Richard Botney 2009-04-30 Patient safety is an overriding concern in all surgery and particularly in plastic surgery, where many of the procedures are elective, but information about patient safety has traditionally been scattered throughout the literature. Patient Safety in Plastic Surgery covers all of the essential patient safety topics in one valuable resource. Timely and practical, the book places special emphasis on clinical issues. It begins with the safety concerns most often identified by plastic surgeons, such as DVTs, surgical site infections, sleep apnea, and anesthesia safety. Beyond these obvious problems are major safety issues that often fall off the radar. These are critical to patient comfort and safety, but they do not always receive the attention they merit, such as hypothermia, nausea and vomiting, proper patient positioning, and screening and management of medical co-morbidities. Other important chapters focus on the identification and avoidance of patients who are poor psychological candidates for surgery and the legal aspects of safety. The book is edited by V. Leroy Young, a well-known plastic surgeon, and Richard Botney, a noted anesthesiologist. They offer readers the advantage of their combined experience along with that of a multidisciplinary group of experts on the different topics covered. Concise Paediatrics, Second Edition-Rachel Sidwell 2009-03-04 Concise Paediatrics, Second Edition is essential reading for all postgraduates training in paediatrics, particularly when preparing for the MRCPCH exam, and for general practice trainees preparing for the DCH exam. As a comprehensive but concise reference to any condition they are likely to encounter on the wards or in the accident and emergency room, it will also be invaluable to doctors in other medical specialties who come into contact with children on a regular basis. The book is designed to provide readers with a full understanding of all of the areas covered by the MRCPCH. It is structured logically by body system, with additional chapters on such topics as genetics, infectious disease, neonatology and emergencies. Edited by two highly experienced paediatricians—their knowledge complemented by a group of specialist contributors—it is written in a succinct, user-friendly style and includes lists, boxes and annotated diagrams to aid learning and retention of the facts. Since the first edition was published in 2000, Concise Paediatrics has established itself as the textbook of choice for MRCPCH candidates, and will remain a "must-have" with this revised and updated second edition.

Nurses on the Move-Mireille Kingma 2018-07-05 South African nurses care for patients in London, hospitals recruit Filipino nurses to Los Angeles, and Chinese nurses practice their profession in Ireland. In every industrialized country of the world, patients today increasingly find that the nurses who care for them come from a vast array of countries. In the first book on international nurse migration, Mireille Kingma investigates one of today's most important health care trends. The personal stories of migrant nurses that fill this book contrast the nightmarish existences of some with the successes of others. Health systems in industrialized countries now depend on nurses from the developing world to address their nursing shortages. This situation raises a host of thorny questions. What causes nurses to decide to migrate? Is this migration voluntary or in some way coerced? When developing countries are faced with nurse vacancy rates of more than 40 percent, is recruitment by industrialized countries fair play in a competitive market or a new form of colonialization? What happens to these workers—and the patients left behind—when they migrate? What safeguards will protect nurses and the patients they find in their new workplaces? Highlighting the complexity of the international rules and regulations now being constructed to facilitate the lucrative trade in human services, Kingma presents a new way to think about the migration of skilled health-sector labor as well as the strategies needed to make migration work for individuals, patients, and the health systems on which they depend.

Manual of Pediatric Anesthesia-Jerrold Lerman 2016-10-25 Authored by three world experts, this is a clinically focused book on pediatric anesthesia. "The Manual", as it is known, has long dominated the market for a succinct and practical resource on administering anesthesia to children and is used by residents, general anesthesiologists, nurse anesthetists, and pediatric anesthesiologists. This new edition retains the basic structure of the book and is updated throughout. Text-heavy in the current edition, the Seventh Edition features the addition of figures to chapters where they are especially helpful (eg, the chapter on cardiovascular surgery and cardiac procedures) and makes greater use of headings to break up the text and guide reading. From reviews of the Sixth Edition:"This is an extremely well written book that I would recommend highly to anyone involved in anaesthetizing children. It is comprehensive enough to provide an excellent reference for trainees and general anaesthetists who occasionally deal with paediatric cases, while at the same time giving valuable supplemental information for paediatric anaesthetists encountering an unusual procedure or condition. In short, this is a book that would make a welcome addition to any anaesthetist's mobile library." --Anaesthesia

Simulation In Anesthesia E-Book-Christopher Gallagher 2006-10-12 Following up his best-selling Board Stiff TEE & Too manuals for the oral boards in anesthesiology, Dr. Gallagher has produced a step-by-step how-to guide on conducting an anesthesia simulation. Topics include which equipment to use as well as suggestions for simulation scenarios that will help train your staff with a theoretical basis for handling even the most unexpected complications. This simulation guide with video clips helps to close the gaps that may result when abnormal situations are not recognized quickly enough or the response to them is haphazard and slow. The result is a highly effective, enjoyable, and affordable tool on this increasingly important way to ensure resources are being managed effectively. Concise and complete guide to all the issues relevant to anesthesia simulation Rich in clinical scenarios and models Experiences from state-of-the-art simulation center Employs latest CPR and other practice guidelines

A Contemporary History of the U.S. Army Nurse Corps-Mary T. Sarnecky 2010-04-27 This book focuses on an organization, the U.S. Army Nurse Corps, which the author has been privileged to be affiliated with - in one way or another - for the greatest part of her adult life. As an active duty officer, the author had first-hand knowledge about the Army Nurse Corps inner workings and spent the last years of her Army career (from 1992) researching and writing the Corps history. One of her goals in researching and writing this history was to intrigue and provide a sense of gratification for the reader. After the conclusion of the Vietnam War, several wide-ranging and significant changes exerted myriad effects on the Army Nurse Corps. The most influential of these phenomena included the dismantling of the Selective Service System, the reorganization of the Army, the launch of the Health Services Command (HSC), the opening of the Academy of Health Sciences, the transformation of the Office of the Army Surgeon General, the inauguration of improvements in the Army Reserve and National Guard, and the evolution in the roles and status of women.

Emergency Care and the Public's Health-Jesse M. Pines 2014-06-23 As US health care systems undergo a period of transformative change, so too will emergency care, and more specifically emergency departments. This transformation will include: The development of new diagnostic, therapeutic, and information technologies A growing need to prepare and respond to emerging public health threats The expansion of the role of allied health professionals to address the workforce crisis Novel expectations for care coordination The fundamental economics of emergency care under new payment models, and The key relationship with American law. Emergency Care and the Public's Health explores the complex role of emergency care in the context of these changes and as an increasingly vital component of health care systems both within and outside the US. From an expert emergency medicine team, this new title is a reference for emergency care and critical care providers, allied health professionals and hospital administrators. It is also for relevant for public policy and healthcare policy professionals.

Usmle Step 2 Secrets Cd-rom Pda Software-Adam Brochert 2004-06 This volume in the popular Secrets Series® zeroes in on all of the USMLE Step 2's most important "need-to-know" information, covering all of the content found in the most recent exams. The Series proven "question- and -answer" format helps readers to think more logically and organize their thoughts...for a better understanding of the material and the style and structure of the exam. The author offers perceptive insights and practical guidance on how to prepare and what to expect. Covers all of the specialty and subspecialty topics included in the Step 2 exam. Uses illustrations of key conditions to demonstrate what the reader will be expected to recognize. Features thought-provoking questions with succinct answers. Makes reference easy with lists and tables. Includes pearls, tips, memory aids, and "secrets". Features Top Secrets for Step 2 Preparation, 100 of the top "pearls of wisdom" for Step 2 exam preparation. Uses a new, two-color design with more illustrations that makes studying easier.

Big Data and Business Analytics-Jay Liebowitz 2013-06-13 "The chapters in this volume offer useful case studies, technical roadmaps, lessons learned, and a few prescriptions to 'do this, avoid that.'" —From the Foreword by Joe LaCugna, Ph.D., Enterprise Analytics and Business Intelligence, Starbucks Coffee Company With the growing barrage of "big data," it becomes vitally important for organizations to make sense of this data and information in a timely and effective way. That's where analytics come into play. Research shows that organizations that use business analytics to guide their decision making are more productive and experience higher returns on equity. Big Data and Business Analytics helps you quickly grasp the trends and techniques of big data and business analytics to make your organization more competitive. Packed with case studies, this book assembles insights from some of the leading experts and organizations worldwide. Spanning industry, government, not-for-profit organizations, and academia, they share valuable perspectives on big data domains such as cybersecurity, marketing, emergency management, healthcare, finance, and transportation. Understand the trends, potential, and challenges associated with big data and business analytics Get an overview of machine learning, advanced statistical techniques, and other predictive analytics that can help you solve big data issues Learn from VPs of Big Data/Insights & Analytics via case studies of Fortune 100 companies, government agencies, universities, and not-for-profits Big data problems are complex. This book shows you how to go from being data-rich to insight-rich, improving your decision making and creating competitive advantage. Author Jay Liebowitz recently had an article published in The World Financial Review. www.worldfinancialreview.com/?p=1904
