Humor als verpleegkundige interventie 2.0-Marcellino Bogers 2018-03-19 Lachen is pijnstillend, ontspannend en helpt mensen om te gaan met hun angsten. Het toepassen van humor is dan ook een officiële verpleegkundige interventie (Bulechek, 2016). Voor de verpleegkundige zelf is gebruik van humor een goede remedie tegen burn-out. Toch wordt er tijdens de verpleegkundige opleiding en op de werkvloer niet uitgebreid stilgestaan bij de werking, de effecten en de mogelijkheden van gebruik van humor. Als je daar meer van weet, kun je humor bewust inzetten en op een natuurlijke manier deel uit laten maken van je werk. In dit boek vind je theoretische en praktische informatie, ervaringen van collega's en vele voorbeelden. Na het lezen ervan heb je onder meer inzicht in de effecten van het gebruik van humor, weet je welke soorten humor er zijn, kun je een oordeel vormen over wat wel en wat niet kan en kun je serieus met humor aan de slag. Deze tweede, geactualiseerde en herziene editie is onder meer uitgebreid met informatie over het inzetten van humor bij mensen met dementie en in de palliatieve zorg. Daarnaast wordt er een oproep gedaan aan de docenten, kun je erachter komen wat jouw eigen humorstijl is en delen vele deskundigen, zoals Sibe Doosje, Huub Buijssen, Saskia Teunissen, Marinus van den Berg en Jeffrey Wijnberg, hun ervaringen en/of kennis over gebruik van humor. Dit boek is bestemd voor alle verpleegkundigen, verzorgenden en andere professionals met directe patiënten/cliëntencontacten en voor docenten werkzaam bij zorg- en welzijnsopleidingen en hun studenten

Emotional Labour in Health Care-Catherine Theodosius 2008-06-30 Do nurses still care? In today's inflexible, fast-paced and more accountable workplace where biomedical and clinical models dominate health care practice, is there room for emotional labour? Based on original empirical research, this book delves into personal accounts of nurses' emotion expressions and experiences as they emerge from everyday nursing practice, and illustrates how their emotional labour is adapting in response to a constantly changing work environment. The book begins by re-examining Arlie Hochschild's sociological notion of emotional labour, and combines it with Margaret Archer's understanding of emotion and the inner dialogue. In an exploration of the nature of emotional labour, its historical and political context, and providing original, but easily recognisable, typology, Catherine Theodosius emphasises that it is emotion - complex, messy and opaque - that drives emotional labour within health care. She suggests that rather than being marginalised, emotional labour in nursing is frequently found in places that are hidden or unrecognised. By understanding emotion itself, which is fundamentally interactive and communicative, she argues that emotional labour is intrinsically linked to personal and social identity. The suggestion is made that the nursing profession has a responsibility to include emotional labour within personal and professional development strategies to ensure the care needs of the vulnerable are met. This innovative volume will be of interest to nursing, health care and sociology students, researchers and professionals.

public health workers and others tasked with providing health and care to young adults. The continuum of life begins with the health and wellness of parents prior to conception, followed by embryonic and fetal development, and continues throughout life. Each person's life stages prepare them for the next and determine their health outcome and wellbeing over time. The text highlights the importance of promoting health throughout the lifespan, the influence of intergenerational health, and the concept of the Developmental Origins of Health and Disease in epigenetic processes and embryology. Authors underscore the importance of advancing health equity and lift up some of the ethical considerations in this work. The authors explore specific interventions in four major categories: Lifestyle, Infections, Nutrition, and Contraception / Pregnancy Planning (LINC). Preconception care is defined by the World Health Organization as the provision of biomedical, behavioural and social health interventions to women and couples before conception. Preconception care includes evidence-based interventions to improve health status, to reduce behaviours, individual and environmental factors that contribute to poor health outcomes. This book offers readers evidence-based guidance regarding fertility awareness and sperm health, genetic counselling and lifestyle assessments, as well as mental wellbeing, alcohol, tobacco and pharmacotherapy, and specialist care for those with chronic conditions, including a review of medications. It also covers relevant infections, including HIV and the Zika virus, as well as different types of environmental and occupational exposure. The book employs a framework focusing on health promotion, the social determinants of health, and the science behind preconception care. Strategies for improving preconception and interconception health, including examples from around the globe, are described in detail.

Using Positive Psychology Every Day-Ernst Bohlmeijer 2018-05-30 We are all looking to flourish, to experience joy, feel engaged with the world, and experience meaningful lives. But the stresses and strains of our daily lives makes this a challenge. Using Positive Psychology Every Day: Learning How to Flourish is about (re)finding the art of living, enabling you to flourish. Bringing together the best of positive psychology, this book introduces eight evidence-based resources of well-being and flourishing: positive emotions, the discovering and use of strengths, optimism, compassion, post-traumatic growth, positive relationships and spirituality. Each chapter has a concise, simple theoretical introduction and several evidence-based, easy-to-apply exercises. This book is for anyone experiencing stress, distress or lower well-being, as well as coaches and therapists who can use the book for clients in the context of guided self-help.

Compassion and Caring in Nursing-Claire Chambers 2018-05-08 'Compassion, in its many manifestations, is the key to rediscovering what lies at the heart of nursing practice all over the world. It is absolutely essential that nurses start to revisit compassion as a central focus for nursing practice...' This user-friendly book adopts a patient-centred approach to care. The challenging theories are grounded in practical applications, encouraging readers to recognise opportunities for change in their daily practice. The book focuses on six key concepts central to compassionate care: A\*

Polit & Beck Canadian Essentials of Nursing Research-Kevin Woo 2017-12-12 Advance your career in Canadian healthcare with a mastery of nursing research. Thoroughly updated to reflect today's changing Canadian nursing field, the fourth edition of Canadian Essentials of Nursing Research guides you to enhanced nursing practice through confident interpretation and application of the latest evidence-based nursing research.

The Sociology of the Caring Professions-Pamela Abbott 1998 This updated and substantially revised second edition of a key textbook, provides students with a comprehensive introduction to the sociology of professions including social work, probation, nursing, midwifery and health visiting. The authors discuss the changing role of the caring professions, focussing on their status and the strategies used to enhance the standing of their members. The Sociology of the Caring Professions is for students of nursing and social work and an important text for courses in social policy and sociology.

Technology and the Doctor-Patient Relationship-D.C. Lozar, M.D. 2019-08-07 Medicine is an ancient profession that advances as each generation of practitioners passes it down. It remains a distinguished, flawed and rewarding vocation--but it may be coming to an end as we know it. Computer algorithms promise patients better access, safer therapies and more predictable outcomes. Technology reduces costs, helps design more effective and personalized treatments and diminishes fraud and waste. Balanced against these developments is the risk that medical professionals will forget that their primary responsibility is to their patients, not to a template of care. Written for anyone who has considered a career in health care--and for any patient who has had an office visit where a provider spent more time with data-entry than with them--this book weighs the benefits of emerging technologies against the

limitations of traditional systems to envision a future where both doctors and patients are better-informed consumers of health care tools.

Interprofessional Collaboration-Audrey Leathard 2004-03-01 In Interprofessional Collaboration the benefits of collaboration for patients and carers are confirmed through theoretical models illustrated with case studies of existing examples.

Human Factors in the Maritime Domain-Michelle Grech 2019-06-25 The piecemeal fashion in which human factors research has been conducted in the maritime domain makes information retrieval available only by scanning through numerous research journals and conference papers. Bringing together human factors information from this and other domains, Human Factors in the Maritime Domain integrates a common body of knowledge into one single volume. The book provides the vital background information necessary to acquire a core knowledge base and a much-needed overview of human factors within the maritime domain. It starts by putting the topic into an historical and theoretical context, moves onto more specific and detailed topics and contemporary thinking in human factors, then reviews new maritime technology. The authors take a holistic approach based on a model of the socio-technical system of work in the maritime domain. They synthesize available knowledge and research, then present in an easily acceptable framework with example, illustrations, and case studies whenever possible, making the text rigorous, useful, and enjoyable. The three authors draw on a range of diverse backgrounds including working as a maritime surveyor, transport consultant, human factors lecturer, and mechanical engineer. They have undertaken maritime research in Denmark, Australia, Malta, and the UK. They have published several other human factor books on related topics. This combination of human factors knowledge, maritime wisdom, and substantial publication experience results in a book that is effective and practical.

Contemporary Perspectives on Ageism-Liat Ayalon 2018-05-22 This open access book provides a comprehensive perspective on the concept of ageism, its origins, the manifestation and consequences of ageism, as well as ways to respond to and research ageism. The book represents a collaborative effort of researchers from over 20 countries and a variety of disciplines, including, psychology, sociology, gerontology, geriatrics, pharmacology, law, geography, design, engineering, policy and media studies. The contributors have collaborated to produce a truly stimulating and educating book on ageism which brings a clear overview of the state of the art in the field. The book serves as a catalyst to generate research, policy and public interest in the field of ageism and to reconstruct the image of old age and will be of interest to researchers and students in gerontology and geriatrics.

Life Review In Health and Social Care-Jeff Garland 2005-11-08 How can understanding our past help us face the future? The key to gaining awareness of the present and preparing for the future lies in our understanding of the past, yet there is little coverage of this topic in the existing psychology and counselling literature. How can people improve themselves by greater self-knowledge? Jeff and Christina Garland break new ground in making a straightforward presentation of the theory and practice of the everyday process of life review, which is a therapeutic approach for helping clients make sense of their past, and can be used to help change undesirable behaviour and plan for the future. The theory and structure of the life review process are examined, and clinical examples of how it works in practice are given; this includes interviews both with "narrators" (people engaged in life review) and "listeners" (health and social care professionals). These examples demonstrate how professionals can use life review to help their clients overcome difficulties in their lives and face the future with confidence. Life Review will appeal to trainees and practitioners in occupational, developmental, clinical and health psychology, social work, counselling, psychotherapy and nursing.

The Ontological Turn-Martin Holbraad 2017-03-10 A new and often controversial theoretical orientation that resonates strongly with wider developments in contemporary philosophy and social theory, the so-called 'ontological turn' is receiving a great deal of attention in anthropology and cognate disciplines at present. This book provides the first anthropological exposition of this recent intellectual development. It traces the roots of the ontological turn in the history of anthropology and elucidates its emergence as a distinct theoretical orientation over the past few decades, showing how it has emerged in the work of Roy Wagner, Marilyn Strathern and Viveiros de Castro, as well a number of younger scholars. Distinguishing this trajectory of thinking from related attempts to put questions of ontology at the heart of anthropological research, the book articulates critically the key methodological and theoretical tenets of the ontological turn, its prime epistemological and political implications, and locates it in the broader intellectual landscape of contemporary social theory.

The Alzheimer Conundrum-Margaret Lock 2015-10-20 Due to rapidly aging populations, the number of people worldwide experiencing dementia is increasing, and the projections are grim. Despite billions of

dollars invested in medical research, no effective treatment has been discovered for Alzheimer's disease, the most common form of dementia. The Alzheimer Conundrum exposes the predicaments embedded in current efforts to slow down or halt Alzheimer's disease through early detection of pre-symptomatic biological changes in healthy individuals. Based on a meticulous account of the history of Alzheimer's disease and extensive in-depth interviews, Margaret Lock highlights the limitations and the dissent associated with biomarker detection. Lock argues that basic research must continue, but should be complemented by a public health approach to prevention that is economically feasible, more humane, and much more effective globally than one exclusively focused on an increasingly hurried search for a cure. Person-centred Dementia Care-Dawn Brooker 2007 Explaining the four key areas of person-centred care for people with dementia, Dawn Brooker provides a fresh definition to the important ideas that underpin the implementation and practice of dealing with this issue.

Frail Older Persons in the Netherlands-Crétien van Campen 2011 How many vulnerable elders live in the Netherlands? Will this number increase remarkably in the years ahead? This report presents the first national description of elders in the Netherlands with multiple problems, who are consequently at risk for becoming care-dependent. It provides a description for care professionals, policymakers, researchers, and elders, who are interested in the final phase of life and how it develops. In addition, it explores how elders can be protected against vulnerability, compares characteristics of the residential settings and lifestyles. The author examines what care and support vulnerable elders receive. The volume concludes with policy recommendations for the future.

The Significance of Borders-Thierry Baudet 2012-05-25 This book explains why supranationalism and multiculturalism are in fact irreconcilable with representative government and the rule of law. It challenges one of the most central beliefs in contemporary legal and political philosophy, which is that borders are bound to disappear.

The Awful Rowing Toward God-Anne Sexton 1975

Brothers-Bart Moeyaert 2005 Forty-two autobiographical stories relate the daily adventures and misadventures of seven brothers living in Belgium, told through the eyes of the youngest, who is seven years old.

Effective Interprofessional Education-Della S. Freeth 2008-04-15 This volume presents a practical guide to the development, application and evaluation of effective interprofessional education in health and social care. It is both a practice manual for those in hands-on roles and a reflective guide for those indirectly involved in professional education. The book provides clear advice on methods of establishing training and education programmes and evaluating their effectiveness, while simultaneously examining the relationship between initial application, ongoing maintenance and subsequent assessment. The authors expound multiple points of view that will generate individual thinking and approaches to both the practice and the estimation of interprofessional education schemes. The book is divided into three sections: the first introduces the differing approaches to professional education and the rationale behind measuring their worth; the second part focuses on planning, development and delivery; the third part advises in a robust and pragmatic way on modes of measuring the efficacy of programmes. The interrelation of these topics is then examined to provide a synthesised perspective on the development, delivery and evaluation of interprofessional education.

ABC of Palliative Care-Marie Fallon 2013-05-13 This brand new edition pulls together the most up-to-date information on this complex, multidisciplinary area in a practical, user-friendly manner. It deals with the important social and psychological aspects for palliative care of people with incurable diseases including quality of life, communication and bereavement issues.

The Oxytocin Factor-Kerstin Uvnäs Moberg 2003-09-18 In recent years there have been exciting scientific discoveries about a powerful hormone whose role in the human body has long been neglected. Oxytocin is the hormone involved in bonding, sex, childbirth, and breast-feeding, as well as in relaxation and feelings of calm. It is the mirror image of the stress hormone (adrenaline), which triggers the "fight or flight" systems in the body. Much has been written about the latter but the many-sided importance of oxytocin is currently known only to specialists in obstetrics, physiology, and psychiatry. The Oxytocin Factor, by Dr. Kerstin Uvnäs-Moberg, is the first book on the subject for a general audience. The new research findings, as well as the potentially beneficial applications of this hormone in reducing anxiety states, stress, addictions, and problems of childbirth, are not only fascinating but of great significance to all our lives.

Practice Knowledge and Expertise in the Health Professions-Joy Higgs 2001 Forlagets beskrivelse: Informative, analytical and stimulating, this book examines the relationship between professional knowledge and clinical practice. Biography

Chronic Fatigue and Its Syndromes-Simon Wessely 1999 Chronic Fatigue Syndrome (also known as M.E) is an illness characterized by the symptom of chronic and severe fatigue, in the absence of an alternative medical condition. It has been the subject of intense media debate over recent years. Such interest has been partially due to the polarization of professional and scientific opinion concerning the topic - what is it, and what causes it? Chronic Fatigue and its syndromes presents an objective and comprehensive review of the problem of chronic fatigue, mixing medical, psychological, social, and historical perspectives. It begins by considering the nature of fatigue, and its physical and psychological origins. The book then introduces the subject of CFS, tracing its historical origins, before considering the epidemiology, and the various aetiological theories for modern forms of the condition - viral, immunological, psychological, psychiatric, and neurological. The book concludes with a clinical section that gives a step by step guide to the assessment and treatment of CFS. Throughout, the authors argue that chronic fatigue and its various syndromes cannot easily be pigeonholed into either physical or psychological categories, and that the ambiguous nature of the illness actually provides us with a valuable chance to explore contemporary attitudes to sickness and health, one not offered by better defined or classified disorders.

Hold Your Own-Kate Tempest 2015-03-10 My heart throws its head against my ribs, / it's denting every bone it's venting something it has known since I arrived and felt it beat. Kate Tempest, winner of the Ted Hughes Award for Brand New Ancients and widely regarded as the UK's leading spoken word poet, has produced a new poem-sequence of electrifying power. Based on the myth of the blind prophet Tiresias, Hold Your Own is a riveting tale of youth and experience, sex and love, wealth and poverty, community and alienation. Walking in the forest one morning, a young man disturbs two copulating snakes--and is punished by the goddess Hera, who turns him into a woman. This is only the beginning of his journey . . . Weaving elements of classical myth, autobiography and social commentary, Tempest uses the story of the gender-switching, clairvoyant Tiresias to create four sequences of poems, addressing childhood, manhood, womanhood, and late life. The result is a rhythmically hypnotic tour de force--and a hugely ambitious leap forward for one of the most broadly talented and compelling young writers today.

Working Bodies-Linda McDowell 2009-10-12 Through a series of case studies of low-status interactive and embodied servicing work, Working Bodies examines the theoretical and empirical nature of the shift to embodied work in service-dominated economies. Defines 'body work' to include the work by service sector employees on their own bodies and on the bodies of others Sets UK case studies in the context of global patterns of economic change Explores the consequences of growing polarization in the service sector Draws on geography, sociology, anthropology, labour market studies, and feminist scholarship

Crossing the Global Quality Chasm-National Academies of Sciences, Engineering, and Medicine 2019-01-27 In 2015, building on the advances of the Millennium Development Goals, the United Nations adopted Sustainable Development Goals that include an explicit commitment to achieve universal health coverage by 2030. However, enormous gaps remain between what is achievable in human health and where global health stands today, and progress has been both incomplete and unevenly distributed. In order to meet this goal, a deliberate and comprehensive effort is needed to improve the quality of health care services globally. Crossing the Global Quality Chasm: Improving Health Care Worldwide focuses on one particular shortfall in health care affecting global populations: defects in the quality of care. This study reviews the available evidence on the quality of care worldwide and makes recommendations to improve health care quality globally while expanding access to preventive and therapeutic services, with a focus in low-resource areas. Crossing the Global Quality Chasm emphasizes the organization and delivery of safe and effective care at the patient/provider interface. This study explores issues of access to services and commodities, effectiveness, safety, efficiency, and equity. Focusing on front line service delivery that can directly impact health outcomes for individuals and populations, this book will be an essential guide for key stakeholders, governments, donors, health systems, and others involved in health care.

Absolute Fear-Lisa Jackson 2008 When a series of brutal ritual slayings is linked to Our Lady of Virtues Hospital, Eve Renner, whose past is tied to this old asylum, must learn to trust her former lover Cole Dennis, who had been accused of attempted murder, when she becomes the killer's next target. Reprint.

Developmental Neuropathology-Reinhard L. Friede 2012-12-06 The present text was envisioned as a supplement to existing texts on human neuropathology, covering only those aspects of pediatric neuropathology which pertain to and are peculiar of the immature nervous system. No coverage-or only brief comment-is given to diseases commonly found in adults which may, on occasion, occur in childhood or infancy as well. The subject matter is divided into three main categories: 1. The "acquired" lesions dating to the fetal, perinatal or early postnatal periods, 2. the malformations, and 3. the heritable metabolic defects. The first 6 chapters (2-7) are reserved to the lesions most intimately linked to the

circumstances of birth. There is some inherent ambiguity in distinguishing between "acquired" lesions and malformations, as, indeed, no sharp distinction can be made between one and the other. Many malformations result from diseases acquired during fetal life and their peculiarity resides in the fact that the organ becomes affected before its development terminates and in such a way that its subsequent development becomes deranged or partly abrogated. A variety of causes acting at the same developmental period or over a common pathogenetic mechanism may produce the same type of derangement, including chemical, physical, infectious or genetic factors, as pointed out repeatedly in the text. Consequently, the definition of a malformation, as differing from an "acquired" residual lesion was made dependant on evidence for the derangement of developmental processes subsequent to the acquisition of the disease.

Tibetan Yogas of Body, Speech, and Mind-Tenzin Wangyal 2011-11-16 Understanding how our actions, words, and thoughts interact enhances our ability to progress in spiritual practice and brings us closer to self-realization. In a warm, informal style Tenzin Wangyal Rinpoche opens up Tibetan meditation practice to both beginners and experienced students, placing as much emphasis on practice as on knowledge. Depending on the sources of the problems in our lives, he offers practices that work with the body, speech, or the mind—a collection of Tibetan yoga exercises, visualizations, sacred sound practices, and spacious meditations on the nature of mind. Together, he says, knowledge and regular meditation practice can alter our self-image and lead to a lighter, more joyful sense of being. The stillness of the body, the silence of speech, and the spacious awareness of mind are the true three doors to enlightenment.

Power and Love: A Theory and Practice of Social Change (Large Print 16pt)-Jeff Barnum 2011-08 Using revealing stories from complex situations he has been involved in all over the world - the Middle East, South Africa, Europe, India, Guatemala, the Philippines, Australia, Canada and the United States - Kahane reveals how to dynamically balance power and love.

Assessing Spiritual Needs-George Fitchett 2002 How do pastors, chaplains, and caregivers assess the spiritual well-being and needs of the people they minister to? George Fitchett presents a model for spiritual assessment that he and his colleagues developed, illustrated with case studies. He reviews a number of other models and provides a six-part framework for evaluating them. Pastoral caregivers find that the effectiveness of their ministry is enhanced when they are able accurately to identify problem areas and needs in the spiritual lives of the people with whom they work. This book addresses many of the questions pastoral caregivers have raised about this timely topic and provides an informed and balanced approach for making decisions about spiritual assessment models and tools. George Fitchett is associate professor and director of research and spiritual assessment in the Department of Religion, Health, and Human Values at Rush-Presbyterian-St. Luke's Medical Center, Chicago.

The Legend of Romeo and Juliet-Olin Harris Moore 1950

Textbook of Critical Care-Mitchell P. Fink 2005-01 A completely new editorial team presents a radical revision to this leading critical care text, previously edited by Shoemaker et al. The New Edition delivers today's best coverage of both adult and pediatric critical care, with contributions from an roster of world experts. In addition to numerous new chapters and many extensively rewritten ones, it features a completely new section on commonly encountered problems and a new, more user-friendly organization. Alcohol in the European Union-Peter Anderson 2012 At head of title: World Health Organization, regional office for Europe.

Rediscovering Social Identity-Tom Postmes 2010 "The deep concerns in this book about the contradictions and difficulties involved in formulating a social psychology are truly revealing. The efforts to formulate and carry out research on social identity as a means of avoiding these difficulties are brilliant and deep. Henri Tajfel has certainly started a line of thought that has alerted all of us. This is a book worth reading carefully." - Jerome Bruner, University Professor, New York University, USA --

Alcohol Problems-Peter Anderson 1988 This book is a practical guide for nurses and doctors in primary care about preventing and managing alcohol problems. It provides information on how to determine how much patients drink, how to assess the social, psychological and physical harm the alcohol may be causing, and what practical and effective advice to offer on how to stop drinking.

Students Under Stress-David Mechanic 1978

Forensic Mental Health Nursing-Richard Byrt 2010 Forensic nursing is a rapidly evolving speciality of mental health nursing. This book is needed because of an increasing awareness of the legal and moral obligations in forensic mental nursing practice. This comprehensive text covers a wide range of issues including examination of the rights of specific groups such as ethnic minorities, the learning disabled and

prison populations. This informative book is an invaluable text for all forensic nurses in clinical practice, student nurses and students on forensic courses.
