Valuation for Arbitration-Mark Kantor 2008-01-01 This book provides a clear understanding of the nuts and bolts of valuation approaches for business investments, including market, income and asset-based methods. It reviews tools that arbitrators may employ to reach their final compensation assessment on a principled basis. The bookand's many practical recommendations explore the decision making processes entailed in three central aspects of the arbitratorand's role: and advance planning to enhance understanding of expert valuation evidence; and identification of and apples-to-orangesand miscomparisons; and and recognition of the true comparability between the business at issue and other examples offered in the expert evidence. The presentation focuses not only on the legal standards applicable to the valuation (full or adequate compensation, reparations, restitution, actual loss, fair market value, fair or reasonably equivalent value, lost profits, etc.), but also on the informed judgment and reasonableness that must enter into the process of weighing the facts of each case and determining its aggregate significance. The book considers common valuation methods like discounted cash flows, adjusted present values, capitalized cash flows, adjusted book values and comparable sales and transactions. Additionally, it addresses means for arbitrators to assess expert valuation evidence in complex business investment disputes. andquot;Best book 2008 of the OGEMID awards!andquot;

Prisonomics-Vicky Pryce 2013-10-14 In March 2013, Vicky Pryce was sentenced to eight months in prison for accepting her ex-husband's penalty points on her driving licence some ten years earlier. After a very public trial, she was sent first to the notorious Holloway and then to East Sutton Park, an open prison in Kent. Inside, she kept a diary documenting her views and experiences; from this diary, Prisonomics was born. Faced with the realities of life behind bars and inspired by the stories of the women she met, Pryce began to research the injustices she found within the prison system. In this informed and important critique, she draws upon her years of experience in economics to call for radical reform and seeks to change how we look at crime and punishment. Prisonomics is not only a personal account of Pryce's experience in prison. It is also a compelling analysis of both the economic and the very human cost of keeping women behind bars.

The Dynamics of Clusters and Innovation-Brigitte Preissl 2013-04-17 Innovation is the motor of economic change. Over the last fifteen years, researches in innovation processes have emphasised the systemic features of innovation. Whilst innovation system analysis traditionally takes a static institutional approach, cluster analysis focuses on interaction and the dynamics of technology and innovation. First, the volume gives an overview of the different levels of analysis from which the innovation behaviour of firms has been observed in the past. The book then presents a distinct cluster approach as a useful and innovative tool to analyse the configuration and dynamics of networks of actors involved in innovative processes. This approach emphasises the possibilities of enhancing cluster benefits by introducing virtual links between cluster actors. Empirical evidence is provided for the automotive components and the telecommunication industries. By restricting the discussion to Germany and Italy, the authors are able to explore the role that national innovation systems play as a framework in which clusters operate.

The Complete Book of BMW-Tony Lewin The Complete Book of BMW is a master work. The word 'definitive' is a bold claim but this book should be viewed in this light.
