The King's Daughter-K. T. Fisher 2016-04-04 When you're the daughter of the King and Queen of England, you have a birth given duty not only for your family but for your country. A Princess does not have the choice of love. Marriage is nothing more than an arranged match to boost alliances and feed the greed of the rich. Princess Grace is now old enough to enter court and her journey is about to begin. Court wasn't what she had imagined, and Grace realises quickly everything she thought to be true was far from it. Through the depravity of court, the deceit and betrayal, she finds out that love is everywhere, even if it's not the usual kind. She's been raised to protect her virtue and in turn, her family's reputation. If Grace gives in to temptation, she could ruin everything and that cannot happen. Not when your father wants you as a future Queen. But it's not only flirting that puts Grace in danger, hidden in shadows are people who would love to ruin Englands reputation and Grace seems the perfect target. Can Grace find her way through many lies and deceit and find herself the right husband for her, even if her King has other ideas.

Karma-K. T. Fisher 2015-07-18 Lauren doesn't know why she is such a bitch, but she is. She believes in being who you are and fuck those who don't like it. Her ex is pissed, and she soon realises the hard way that she never should have betrayed him. Yet, pretty-boy Andrew isn't as innocent as she thought. In fact, it turns out he's connected to one of the biggest gangs in America. Lauren is beaten and abused in every way possible. Her human rights are stripped, and she is treated like an animal. Blindfolded and gagged, Lauren has no idea what is going to become of her, or if she will ever get out of the mess she has found herself in. Karma has finally caught up with Lauren Ashford, but is this the end, or can someone out there help her? Are there men strong enough, or even brave enough, to face up to her captors? When the Philadelphia Kings of Rebellion charter come crashing into her kidnappers' motorcycle club's cabin, they find a beautiful girl chained up to a wall and made to live like a dog on the hard floor. From here, Lauren is given the greatest gift. To go home. Once back in the UK, Lauren is under the protection of the UK Kings of Rebellion MC and is shocked to find that even though they are dangerous, they treat her so much better. Here she meets Grim, the oldest son of the president. He's covered in tattoos, drives a bike, likes to dress in leather and loves to protect her. Is this the man that Lauren needs? Or do her old habits of being a "do now, think later" kind of bitch, come back to bite her in the ass? One thing is for certain, Demon, the president of the motorcycle club who took her, wants her back...

Rockstar's Temptation-K.T Fisher 2014-11-08 This story is a complicated one. Maisy and Max have been really close for a while now. They clicked straight away and a beautiful friendship blossomed. But is just an innocent friendship? When Maisy's sexy and troublesome younger sister, Lauren comes to town, she begins to stir everything up. Max's eyes wonder and Maisy, for some reason doesn't like it. She tells herself that it's because she doesn't want her sister hurt by his playboy ways, but is that true? Join Max and Maisy on their confusing journey full of heartbreak and turmoil. Where their friendship is stretched to the limits with lust and betrayal. Amongst tragedy and danger, can your heart can lead you in the right direction?

Social Control and Justice-Maria João Guia 2013-01-01 This book offers a fresh, multi-disciplinary, and international examination of a phenomenon that has altered the landscape of migration in the United States and is now taking root in Canada and throughout Europe: 'crimmigration law.' Crimmigration law consists of the letter and practice of laws and policies at the intersection of criminal law and immigration law. Crimmigration scholars study the creation of laws and policies, their enforcement, as well as the institutional dynamics that create crimmigration law and are created by it. Many have written about the use of crimmigration law to exert social control over groups marginalized by ethnic bias, class, or citizenship status. This book's contents include: Crimmigration, Securitization, and the Criminal Law of the Crimmigrant \* A Reflection on Crimmigration in the Netherlands \* Entering the Risk Society: A Contested Terrain for Immigration Enforcement \* The Changing Landscape of the Criminalization of Migration in Europe \* Disappearing Rights: How States Are Eroding Membership in American Society \* The Impact of Immigration Enforcement Outsourcing on Ice Priorities \* The Spirit of Crimmigration \* Crime and Immigration: The Discourses of Fear as a Theoretical Approach of Critical Evaluation \* Recorded Crime Committed by Migrant Groups and Native Dutch in the Netherlands \* The Foreign-Born in the Canadian Federal Correctional Population \* The Impact of Safety on Levels of Ethnocentrism \* The Control of Irregular Migrants and the Criminal Law of the Enemy \* Crime among Irregular Immigrants and the Influence of Crimmigration Processes \* The Wide Scope of Immigration in the Azores and Its Relationship with Crime \* Irregular Immigrants and Their Irish Citizen Children: The Limits of National Citizenship \* The Treaty of Prum \* Unauthorized Migration

Why Forests? Why Now?-Frances Seymour 2016-12-27 Tropical forests are an undervalued asset in meeting the greatest global challenges of our time—averting climate change and promoting development. Despite their importance, tropical forests and their ecosystems are being destroyed at a high and even increasing rate in most forest-rich countries. The good news is that the science, economics, and politics are aligned to support a major international effort over the next five years to reverse tropical deforestation. Why Forests? Why Now? synthesizes the latest evidence on the importance of tropical forests in a way that is accessible to anyone interested in climate change and development and to readers already familiar with the problem of deforestation. It makes the case to decisionmakers in rich countries that rewarding developing countries for protecting their forests is urgent, affordable, and achievable.

Crime, Shame and Reintegration-John Braithwaite 1999 This book, a contribution to general criminological theory, suggests that the key to why some societies have higher crime rates than others lies in the way different cultures go about the social process of shaming wrongdoers. Shaming can be counterproductive, making crime problems worse. But when shaming is done within a cultural context of respect for the offender, it can be extraordinarily powerful, efficient, and just form of social control.

Bio-Inspired Innovation and National Security-National Defense University 2010-10-01 Despite the vital importance of the emerging area of biotechnology and its role in defense planning and policymaking, no definitive book has been written on the topic for the defense policymaker, the military student, and the private-sector bioscientist interested in the "emerging opportunities market" of national security. This edited volume is intended to help close this gap and provide the necessary backdrop for thinking strategically about biology in defense planning and policymaking. This volume is about applications of the biological sciences, here called "biologically inspired innovations," to the military. Rather than treating biology as a series of threats to be dealt with, such innovations generally approach the biological sciences as a set of opportunities for the military to gain strategic advantage over adversaries. These opportunities range from looking at everything from genes to brains, from enhancing human performance to creating renewable energy, from sensing the environment around us to harnessing its power.

Manual of Spine Surgery-Uwe Vieweg 2012-10-23 The success of any spinal operation depends on good definition of the indications, consideration of the contraindications, technical and organizational factors, good operating technique and correct preoperative preparation and positioning of the patient. These points are presented in this book as clearly as possible and are illustrated with detailed high quality artwork.

Climate of the Southeast United States-Keith Ingram 2013-11-12 Prepared for the 2013 National Climate Assessment and a landmark study in terms of its breadth and depth of coverage, Climate of the Southeast United States is the result of a collaboration among three Regional Integrated Sciences and Assessments Centers: the Southeast Climate Consortium; the Carolinas Regional Sciences and Assessments; and the Southern Climate Impacts Planning Program; with contributions from numerous local, state, federal, and nongovernmental agencies to develop a comprehensive, state of the art look at the effects of climate change in the region. The book summarizes the scientific literature with respect to climate impacts on the Southeast United States, including 11 southern states to the east of the Mississippi River, Puerto Rico, and the US Virgin Islands; reviews the historic climate, current climate, and the projected future

climate of the region; and describes interactions with important sectors of the Southeast and cross-sectoral issues, namely climate change mitigation, adaptation, and education and outreach. Rich in science and case studies, it examines the latest climate change impacts, scenarios, vulnerabilities, and adaptive capacity and offers decision makers and stakeholders a substantial basis from which to make informed choices that will affect the well-being of the region's inhabitants in the decades to come.

Fate-K. T. Fisher 2017-04-29 Elise used to think that future was with Bomber, she thought she would become his Old Lady and live happily ever after with a few biker babies. However, Elise quickly had to accept that her dream was over when Bomber told her he was moving to America with his father. She accepted it, with tears and upset, absorbing the fact that her life would take another path that she originally dreamt. But Elise's life dramatically changed when she was kidnapped by the Devil MC and there, in her horror was Bomber. He helped her family bring her back to safety with her new found friends, Lauren and Natasha. Now though, he's decided to move back to England and re-join her father's chapter. Bomber is back in her life and Elise has no idea how to manage that reality. Her brother, Scrappy doesn't want her anywhere near him, but Bomber won't let her go that easily. Elise may believe that what they long ago had is over, but he doesn't. Bomber wants her back, and he's making that very clear.

Being and Time-Martin Heidegger 1996-01-01 A new, definitive translation of Heidegger's most important work.

The East Asian Miracle-World Bank 1993

People of the Three Fires-James A. Clifton 1986 This book accompanied by a student workbook and teacher's guide, was written to help secondary school students to explore the history, culture, and dynamics of Michigan's indigenous peoples, the American Indians. Three chapters on the Ottawa, Potawatomi, and Ojibway (or Chippewa) peoples follow an introduction on the prehistoric roots of Michigan Indians. Each chapter reflects the integration of cultural and historical information about the Indians. The chapter on the Potawatomi stresses the political activities and economic forces affecting the tribe in southwestern Michigan. It includes biographical information on 19th century Potawatomi leaders. The second chapter focuses on the subsistence patterns and indigenous environmental relations of the Ojibway, while touching on the spiritual connotations of their existence. It is a generic treatment of Ojibway life, customs, beliefs, and the subsequent federal policies affecting them. The chapter on the Ottawa provides an extended discussion of their contact with European powers and explores the Indians' responses and adaptations to changing environmental and sociopolitical circumstances. This book contains many historical photographs and a five-page bibliography. (TES)

The Girl with Ghost Eyes-M. H. Boroson 2015-11-03 "The Girl with Ghost Eyes is a fun, fun read. Martial arts and Asian magic set in Old San Francisco make for a fresh take on urban fantasy, a wonderful story that kept me up late to finish." —#1 New York Times bestselling author Patricia Briggs It's the end of the nineteenth century in San Francisco's Chinatown, and ghost hunters from the Maoshan traditions of Daoism keep malevolent spiritual forces at bay. Li-lin, the daughter of a renowned Daoshi exorcist, is a young widow burdened with yin eyes—the unique ability to see the spirit world. Her spiritual visions and the death of her husband bring shame to Li-lin and her father—and shame is not something this immigrant family can afford. When a sorcerer cripples her father, terrible plans are set in motion, and only Li-lin can stop them. To aid her are her martial arts and a peachwood sword, her burning paper talismans, and a wisecracking spirit in the form of a human eyeball tucked away in her pocket. Navigating the dangerous alleys and backrooms of a male-dominated Chinatown, Li-lin must confront evil spirits, gangsters, and soulstealers before the sorcerer's ritual summons an ancient evil that could burn Chinatown to the ground. With a rich and inventive historical setting, nonstop martial arts action, authentic Chinese magic, and bizarre monsters from Asian folklore, The Girl with Ghost Eyes is also the poignant story of a young immigrant searching to find her place beside the long shadow of a demanding father and the stigma of widowhood. In a Chinatown caught between tradition and modernity, one woman may be the key to holding everything together. Skyhorse Publishing, under our Night Shade and Talos imprints, is proud to publish a broad range of titles for readers interested in science fiction (space opera, time travel, hard SF, alien invasion, near-future dystopia), fantasy (grimdark, sword and sorcery, contemporary urban fantasy, steampunk, alternative history), and horror (zombies, vampires, and the occult and supernatural), and much more. While not every title we publish becomes a New York Times bestseller, a national bestseller, or a Hugo or Nebula award-winner, we are committed to publishing quality books from a diverse group of authors.

A History of Greece-George Grote 1881

Cell Function and Disease-L. Canedo 2012-12-06 The new experimental tools and approaches of modern biology have allowed us to better understand many fundamental properties of the eukaryotic cells. These significant discoveries have drastically changed the diagnostic and therapeutic approaches of modern clinical practice. On April 18-22, 1988, an International Symposium on Cell Function and Disease was held in Monterrey, Nuevo Leon, Mexico, aimed at reviewing some of the most recent advances made in the following five areas: Genes and Human Diseases; Cellular and Molecular Pathology; Infectious Diseases; Brain Transplants and the New Approaches and Techniques with Potential Application to Cell Function and Disease. This book is based on the contributed papers of the symposium. To underline the importance of the clinical approach to the study of cell function and disease a section on this subject was added at the end of the book. The chapters in this volume include contributions by some of the leading scientists of the international scientific community and Mexico. During the course of this international conference, numerous discussions were held by the local and international representatives of the scientific community concerning the creation of an International Center of Molecular Medicine aimed at stimulating further interaction between molecular biologists, biochemists, biophysicists and clinicians. Such ideas received the endorsement and support of the Director General of the United Nations Educational and Scientific Organization (UNESCO), Federico Mayor, the Governor of the State of Nuevo Leon, Jorge Trevino, and the Secretary of Health of Mexico, Guillermo Soberon.

Disaster Mental Health Services-Diane Garaventa Myers 2005 Disaster mental health is a growing field of practice designed to help victims and relief workers learn to effectively cope with the extreme stresses they will face in the aftermath of a disaster. The goal of disaster mental health is to prevent the development of long-term, negative psychological consequences, such as PTSD. This book assists clinicians and traumatologists in "making the bridge" between their clinical knowledge and skills and the unique, complex, chaotic, and highly political field of disaster. It combines information from a vast reservoir of prior research and literature with the authors' practical and pragmatic experience in providing disaster mental health services in a wide variety of disasters.

The Civil Wars-Appian 2006-01-01 Appian has beautifully captured the accounts of great conquerors and leaders. Their conquests, invasions and leadership qualities have been discussed in detail. The historical narrative reads like a novel and this adds to the appeal of the book. Enthralling and informative!

Spinal Cord Injury (SCI) Repair Strategies-Giuseppe Perale 2019-10-30 Spinal Cord Injury (SCI) Repair Strategies provides researchers the latest information on potential regenerative approaches to spinal cord injury, specifically focusing on therapeutic approaches that target regeneration, including cell therapies, controlled drug delivery systems, and biomaterials. Dr. Giuseppe Perale and Dr. Filippo Rossi lead a team of authoritative authors in academia and industry in this innovative reference on the field of regenerative medicine and tissue engineering. This book presents all the information readers need to understand the current and potential array of techniques, materials, applications and their benefits for spinal cord repair. Covers current and future repair strategies for spinal cord injury repair Focuses on key research trends, clinics, biology and engineering Provides fundamentals on regenerative engineering and tissue engineering

India's New Capitalists-H. Damodaran 2008-06-25 In order to do business effectively in contemporary South Asia, it is necessary to understand the culture, the ethos, and the region's new trading communities. Indra's Pearls-David Mumford 2002-04-25 Felix Klein, one of the great nineteenth-century geometers, rediscovered in mathematics an idea from Eastern philosophy: the heaven of Indra contained a net of pearls, each of which was

reflected in its neighbour, so that the whole Universe was mirrored in each pearl. Klein studied infinitely repeated reflections and was led to forms with multiple co-existing symmetries. For a century these ideas barely existed outside the imagination of mathematicians. However in the 1980s the authors embarked on the first computer exploration of Klein's vision, and in doing so found many further extraordinary images. Join the authors on the path from basic mathematical ideas to the simple algorithms that create the delicate fractal filigrees, most of which have never appeared in print before. Beginners can follow the step-by-step instructions for writing programs that generate the images. Others can see how the images relate to ideas at the forefront of research.

The New Faces of Victimhood-Rianne Letschert 2011-01-21 Besides generating wealth, globalization makes victims, including victims of new forms of crime. In this edited book of scholarly essays, international lawyers and criminologists reflect on the legal challenges posed by these dark sides of globalization. Examples include transnational organised crime, human trafficking and corruption, cyber crimes, international terrorism, global corporate crime and cross-border environmental crimes. The authors reflect on the limits of domestic systems of justice in providing protection, empowerment and redress to the victims of these emerging forms of global insecurity. They argue for the need of better international or supra-national institutional arrangements such as legal instruments and actions of the United Nations or regional organizations such as the European Union. In part I Jan Van Dijk and Rianne Letschert present an overview of trends in criminal victimization against the backdrop of globalization using a unique set of statistical indicators. By placing this issue in the framework of the human security concept, the authors draw out its broader political and normative implications. Theologist Ralf Bodelier explains how modern communication technologies have heightened sensitivities among the general public for human insecurities anywhere in the world. In his view, a new global conscience is in the making that may become the cornerstone of international solidarity and action. Marc Groenhuijsen and Rianne Letschert describe the emergence of national and international legal and institutional arrangements to offer remedies to victims of crime in an era of globalization. In part II a selection of experts analyse the specific issues surrounding the protection and empowerment of victims of different types of international crimes such as human trafficking, organised crime/corruption, terrorism, global corporate crime and cross border environmental crimes. In part III focused attention is given to the special challenges and opportunities of protecting and assisting crime victims in cyberspace. Part IV deals with emerging victim issues in humanitarian law such as the accountability of private military companies and the implementation of the ambitious victim provisions in the statute of the International Criminal Court including the establishment of a global fund for reparations. In the final part of the book some of its core authors formulate their ideas about the international institutional arrangements that should be put in place to offer justice to the victims of globalization. A concrete proposal is made for the transformation of the United Nations 1985 Declaration on the Principles of Justice for Victims of Crime and Abuse of Power into a full-fledged UN convention. In the final chapter further proposals are made for the increased involvement of regional organisations such as the European Union in the protection of victims of global crime.

Organ Transplantation in Times of Donor Shortage-Ralf J. Jox 2015-08-06 This book analyzes the reasons for organ shortage and ventures innovative ideas for approaching this problem. It presents 29 contributions from a highly interdisciplinary group of world experts and upcoming professionals in the field. Every year thousands of patients die while waiting for organ transplantation. Health authorities, medical professionals and bioethicists worldwide point to the urgent and yet unsolved problem of organ shortage, which will be even intensified due to the increasing life expectancy. Even though the practical problem seems to be well known, the search for suitable solutions continues and often restricts itself by being limited through disciplinary and national borders. Combining philosophical reflection with empirical results, this volume enables a unique insight in the ethics of organ transplantation and offers fresh ideas for policymakers, health care professionals, academics and the general public.

Inequality in U.S. Social Policy-Bryan Warde 2016-08-05 In *Inequality in US Social Policy: An Historic Analysis*, Bryan Warde illuminates the pervasive and powerful role that social inequality based on race and ethnicity, gender, immigration status, sexual orientation, class, and disability plays and has historically played in informing social policy. Using critical race theory and other structural oppression theoretical frameworks, this book examines social inequalities as they relate to social welfare, education, housing, employment, health care, and child welfare, immigration, and criminal justice. This book will help social work students better understand the origins of inequalities that their clients face.

Cephalopod Cognition-Anne-Sophie Darmaillacq 2014-07-10 Focusing on comparative cognition in cephalopods, this book illuminates the wide range of mental function in this often overlooked group.

New Directions in Child Abuse and Neglect Research-National Research Council 2014-03-25 Each year, child protective services receive reports of child abuse and neglect involving six million children, and many more go unreported. The long-term human and fiscal consequences of child abuse and neglect are not relegated to the victims themselves -- they also impact their families, future relationships, and society. In 1993, the National Research Council (NRC) issued the report, *Understanding Child Abuse and Neglect*, which provided an overview of the research on child abuse and neglect. *New Directions in Child Abuse and Neglect Research* updates the 1993 report and provides new recommendations to respond to this public health challenge. According to this report, while there has been great progress in child abuse and neglect research, a coordinated, national research infrastructure with high-level federal support needs to be established and implemented immediately. *New Directions in Child Abuse and Neglect Research* recommends an actionable framework to guide and support future child abuse and neglect research. This report calls for a comprehensive, multidisciplinary approach to child abuse and neglect research that examines factors related to both children and adults across physical, mental, and behavioral health domains--including those in child welfare, economic support, criminal justice, education, and health care systems--and assesses the needs of a variety of subpopulations. It should also clarify the causal pathways related to child abuse and neglect and, more importantly, assess efforts to interrupt these pathways. *New Directions in Child Abuse and Neglect Research* identifies four areas to look to in developing a coordinated research enterprise: a national strategic plan, a national surveillance system, a new generation of researchers, and changes in the federal and state programmatic and policy response.

Envy-K. T. Fisher 2016-01-17 When you're finally free and living life the way you should, you don't take it for granted and Lauren and Natasha certainly don't. After the dreadful kidnapping, they now live happy amongst the Kings of Rebellion MC, their new found family. However, certain people don't like that they are now free and not spending the nights in their beds. A plan comes together and it's the innocent that always gets hurt. When the Devil's come to claim what they think is theirs, can the girls escape them with the help of their men, or will they live at the hands of the Devil's for the rest of their existence because a life at the hands of a Devil is no life at all. Find out in *Envy*.

Handbook of Obesity - Volume 2-George Bray 2014-02-20 Several major developments have occurred since the last edition of *Handbook of Obesity: Clinical Applications*, including new clinical trials, discoveries related to drug use, and greater understanding of the benefits of weight loss in obese patients. Now in its fourth edition, this volume continues to offer unparalleled depth and breadth of coverage.

Social and Economic Costs of Violence-National Research Council 2012-02-09 Measuring the social and economic costs of violence can be difficult, and most estimates only consider direct economic effects, such as productivity loss or the use of health care services. Communities and societies feel the effects of violence through loss of social cohesion, financial divestment, and the increased burden on the healthcare and justice systems. Initial estimates show that early violence prevention intervention has economic benefits. The IOM Forum on Global Violence Prevention held a workshop to examine the successes and challenges of calculating direct and indirect costs of violence, as well as the potential cost-effectiveness of intervention.

Working Detroit-Steve Babson 1986 Babson recounts Detroit's odyssey from a bulwark of the "open shop" to the nation's foremost "union town." Through words and pictures, *Working Detroit* documents the events in the city's ongoing struggle to build an industrial society that is both prosperous and humane. Babson begins his account in 1848 when Detroit has just entered the industrial era. He weaves the broader historical realities, such as Red Scare, World War, and economic depression into his account, tracing the ebb and flow of the working class activity and organization in Detroit -- from the rise of the Knights of Labor and the American Federation of Labor in the 19th century, through the Congress of Industrial Organizations and the sitdown strike of the 1930s, to the civil rights and women's movements of the 1960s and 1970s. The book concludes with an examination of the present day crisis facing the labor movement.

Melammu-Assyrian and Babylonian intellectual heritage project. Annual symposium 2014-08-20 A collection of articles from various disciplines on globalization

Organized Crime-Klaus von Lampe 2015-07-16 *Organized Crime: Analyzing Illegal Activities, Criminal Structures, and Extra-legal Governance* provides a systematic overview of the processes and structures commonly labeled "organized crime," drawing on the pertinent empirical and theoretical literature primarily from North America, Europe, and Australia. The main emphasis is placed on a comprehensive classificatory scheme that highlights underlying patterns and dynamics, rather than particular historical manifestations of organized crime. Esteemed author Klaus von Lampe strategically breaks the book down into three key dimensions: (1) illegal activities, (2) patterns of interpersonal relations that are directly or indirectly supporting these illegal activities, and (3) overarching illegal power structures that regulate and control these illegal activities and also extend their influence into the legal spheres of society. Within this framework, numerous case studies and topical issues from a variety of countries illustrate meaningful application of the conceptual and theoretical discussion.

Paradoxes of Gender-Judith Lorber 1994 In this pathbreaking book, a well-known feminist and sociologist--who is also the Founding Editor of *Gender & Society*--challenges our most basic assumptions about gender. Judith Lorber views

gender as wholly a product of socialization subject to human agency, organization, and interpretation. In her new paradigm, gender is an institution comparable to the economy, the family, and religion in its significance and consequences. Drawing on many schools of feminist scholarship and on research from anthropology, history, sociology, social psychology, sociolinguistics, and cultural studies, Lorber explores different paradoxes of gender: --why we speak of only two "opposite sexes" when there is such a variety of sexual behaviors and relationships; --why transvestites, transsexuals, and hermaphrodites do not affect the conceptualization of two genders and two sexes in Western societies; --why most of our cultural images of women are the way men see them and not the way women see themselves; --why all women in modern society are expected to have children and be the primary caretaker; --why domestic work is almost always the sole responsibility of wives, even when they earn more than half the family income; --why there are so few women in positions of authority, when women can be found in substantial numbers in many occupations and professions; --why women have not benefited from major social revolutions. Lorber argues that the whole point of the gender system today is to maintain structured gender inequality--to produce a subordinate class (women) that can be exploited as workers, sexual partners, childbearers, and emotional nurturers. Calling into question the inevitability and necessity of gender, she envisions a society structured for equality, where no gender, racial ethnic, or social class group is allowed to monopolize economic, educational, and cultural resources or the positions of power.

Biomaterials Fabrication and Processing Handbook-Paul K. Chu 2008-03-27 Focusing on a lucrative and increasingly important area of biomedicine, the Biomaterials Fabrication and Processing Handbook brings together various biomaterials production and processing aspects, including tissue engineering scaffold materials, drug delivery systems, nanobiomaterials, and biosensors. With contributions from renowned international experts and extensive reference lists in each chapter, the volume provides detailed, practical information to produce and use biomaterials. The different facets of biomaterials technology are split into four sections in the book— Part I The development of new materials and devices capable of interacting specifically with biological tissues and the preparation of scaffolds using materials with appropriate composition and structure Part II The necessary materials to create a drug delivery system capable of controlled release and the incorporation of drug reservoirs into implantable devices for sustained controlled release Part III The significant role nanotechnology plays in the biomedical and biotechnology fields Part IV More biomaterials, including synthetic and natural degradable polymeric biomaterials, electroactive polymers as smart materials, and biomaterials for gastrointestinal and cartilage repair and reconstruction

Handbook of Theory and Practice of Sustainable Development in Higher Education-Walter Leal Filho 2017-02-24 This Handbook approaches sustainable development in higher education from an integrated perspective, addressing the dearth of publications on the subject. It offers a unique overview of what universities around the world are doing to implement sustainable development (i.e. via curriculum innovation, research, activities, or practical projects) and how their efforts relate to education for sustainable development at the university level. The Handbook gathers a wealth of information, ideas, best practices and lessons learned in the context of executing concrete projects, and assesses methodological approaches to integrating the topic of sustainable development in university curricula. Lastly, it documents and disseminates the veritable treasure trove of practical experience currently available on sustainability in higher education.
