Drawing on a wide range of cultural resources - including web columns, blogs, advice columns, popular clichés, advertisements and references from television and cinema, the author challenges the conventional meaning-making processes of singlehood and time. Lahad's analysis gives us the opportunity to explore and theorize singlehood through varied temporal concepts such as waiting, wasting, timeout, age, the life course, linearity and commodification of time. This unique analytical approach enables the fresh consideration of some of our dominant perceptions about collective clocks, schedules, time tables and the temporal organization of social life in general.</p> <p>Stick Control-George Lawrence Stone 2013-04 George Lawrence Stone's Stick Control is the bible of drumming. This textbook offers an advanced treatment of modern macroeconomics, presented through a sequence of dynamic general equilibrium models based on intertemporal optimization on the part of economic agents. The book treats macroeconomics as applied and policy-oriented general equilibrium analysis, examining a number of models, each of which is suitable for investigating specific issues but may be unsuitable for others. After presenting a brief survey of the evolution of macroeconomics and the key facts about long-run economic growth and aggregate fluctuations, the book introduces the main elements of the intertemporal approach through a series of two-period competitive general equilibrium models—the simplest possible intertemporal models. This sets the stage for the remainder of the book, which presents models of economic growth, aggregate fluctuations, and monetary and fiscal policy. The text focuses on a full analysis of a limited number of key intertemporal models, which are stripped down to essentials so that students can focus on the dynamic properties of the models. Exercises encourage students to try their hands at solving versions of the dynamic models that define modern macroeconomics. Appendixes review the main mathematical techniques needed to analyze optimizing dynamic macroeconomic models. The book is suitable for advanced undergraduate and graduate students who have some knowledge of economic theory and mathematics for economists.</p> <p>Arts & Humanities Citation Index- 1979</p> <p>Better Homes and Gardens: Flower Arranging- 1965</p> <p>Summa contra gentiles ... malleus hereticorum nuncupata ... per Theodericum de Susteren ... fontali sue ... veritati ... restituta ... et castigata-Heiliger Thomas von Aquin 1509</p>
