Managing Joint Innovation-Francis Bidault 2012-10-10 Joint innovation between different organizations or groups has become a common practice for the many companies confronted with major shifts in customers' demand and new technological possibilities. These co-development alliances, however, are typically unstable, and regularly result in drastic restructuring as the partners learn to work together and confront unexpected difficulties. This new and innovative book takes a fresh look at the critical task of managing relationships and communication in co-development alliances. Good relational quality management will certainly not compensate for bad business strategies and poor execution of initiatives. But, at the same time, outstanding relationships will not survive when there is a lack of trust between partners and a desire for tighter control over one another. Francis Bidault presents a new framework for understanding the dynamics of alliances and for managing the relationship between partners at all levels, with practical tools to help successfully develop joint innovation initiatives.

Recent Advances in Spatial Equilibrium Modelling-Jeroen C.J.M.van den Bergh 2012-12-06 Prices and quantities of both stock and flow variables in an economic system are decisively influenced by their spatial coordinates. Any equilibrium state also mirrors the underlying spatial structure and a tatonnement process also incorporates the spatial ramifications of consumer and producer behaviour. The recognition ofthe spatial element in the formation of a general equilibrium in a complex space-economy already dates back to early work ofLÖsch, Isard and Samuelson, but it reached a stage of maturity thanks to the new inroads made by T. Takayama. This book is devoted to spatial economic equilibrium (SPE) analysis and is meant to pay homage to the founding father of modern spatial economic thinking, Professor Takayama. This book witnesses his great talents in clear and rigorous economic thinking regarding an area where for decades many economists have been groping in the dark. Everybody who wants to study the phenomenon of spatial economic equilibrium will necessarily come across Takayama's work, but this necessity is at the same time a great pleasure. Studying his work means a personal scientific enrichment in a field which is still not completely explored. The present volume brings together recent contributions to spatial equilibrium analysis, written by friends and colleagues of Takayama. The structure of the book is based on four main uses of spatial equilibrium models: (1) the imbedding of spatial flows in the economic environment, related to e.g. The Circus Of Ghosts-Barbara Ewing 2011-07-28 New York, late 1840s, and in the wild, noisy, brash and beautiful circus of Silas P. Swift a shadowy, mesmeric woman entrances crowds because she can unlock the secrets of troubled minds. Above them all her daughter sweeps and soars: acrobat and tightrope-walker. People cannot take their eyes from the mysterious woman in the Big Top who can help so many others - but she cannot unlock dark, literally unspeakable, memories of her own. In London memories fester in the mind of an old and venomous duke of the realm. He plots, with an unscrupulous lawyer (and a huge financial reward) against the mother and the daughter: to kill one, and to abduct the other and bring her across the Atlantic to him: She is mine. The actress and mesmerist Cordelia Preston and her daughter Gwenlliam live with their unusual family in the exciting new city among exciting new ideas: the telegraph, the daguerrotype, anaesthesia, table-tapping. And among the dangerous street-gangs of New York also, whose raw violence meets Cordelia and Gwenlliam and those that they love, with unexpected results.

The Hyena & Other Men-Pieter Hugo 2007 Many myths surround the Hyena Men who haunt the peripheries of Nigeria's cities. Accompanied by hyenas, rock pythons and baboons, these men earn a living by performing before crowds and selling traditional medicines. Pieter Hugo's extraordinary portraits of their liminal existence reveal an uncanny world of complex, codependent relationships, where familiar distinctions between dominance and submission, wildness and domesticity, tradition and modernity are constantly subverted.
