Computer Vision - ECCV 2014 Workshops-Lourdes Agapito 2015-03-19 The four-volume set LNCS 8925, 8926, 8927 and 8928 comprises the thoroughly refereed post-workshop proceedings of the Workshops that took place in conjunction with the 13th European Conference on Computer Vision, ECCV 2014, held in Zurich, Switzerland, in September 2014. The 203 workshop papers were carefully reviewed and selected for inclusion in the proceedings. They where presented at workshops with the following themes: where computer vision meets art; computer vision in vehicle technology; spontaneous facial behavior analysis; consumer depth cameras for computer vision; "chalearn" looking at people: pose, recovery, action/interaction, gesture recognition; video event categorization, tagging and retrieval towards big data; computer vision with local binary pattern variants; visual object tracking challenge; computer vision + ontology applies cross-disciplinary technologies; visual perception of affordance and functional visual primitives for scene analysis; graphical models in computer vision; light fields for computer vision; computer vision for road scene understanding and autonomous driving; soft biometrics; transferring and adapting source knowledge in computer vision; surveillance and re-identification; color and photometry in computer vision; assistive computer vision and robotics; computer vision problems in plant phenotyping; and non-rigid shape analysis and deformable image alignment. Additionally, a panel discussion on video segmentation is included.

GPU Pro 360 Guide to Mobile Devices-Wolfgang Engel 2018-09-24 This book gathers all the content from the GPU Pro series (Vols 1-7; 2010-2016) into a convenient single source anthology covering rendering techniques in computer graphics. It covers ready-to-use ideas and procedures that can help solve many computer graphics programming challenges. The articles by leading programmers contained in this volume reflects the methods and techniques used to sample real-world phenomenon or to model special effects using these methods and techniques in their work.

Professional Speakers, Meetings and Events Made Simple: The Ultimate Guide to Event Planning, Marketing and Sales-Scott Steinberg 2014-05-09 Are you a meeting planner organizing a special event? Proceedings of the 7th International Conference on Kansei Engineering and Emotion Research 2018-Anitawati Mohd Lokman 2018-03-13 The proceedings gather a selection of refereed papers presented at the 7th International Conference on Kansei Engineering and Emotion Research 2018 (KEER 2018), which was held in Kuching, Malaysia from 19 to 22 March 2018. The contributions address the latest advances in and innovative applications of Kansei Engineering and Emotion Research. The subjects include: Kansei, Emotion and Games Kansei, Emotion and Computing Kansei, Emotion and Wellbeing / Quality of Life Kansei, Emotion and Design Kansei, Emotion and Health / Ergonomics Kansei, Emotion and Multidisciplinary Fields Kansei, Emotion and Culture Kansei, Emotion and Social computing Kansei,

Emotion and Evaluation Kansei, Emotion and User Experience The book offers a valuable resource for all graduate students, experienced researchers and industrial practitioners interested in the fields of user experience/usability, engineering design, human factors, quality management, product development and design.

Algorithms and Architectures for Parallel Processing-Shadi Ibrahim 2017-09-15 This book constitutes the proceedings of the 17th International Conference on Algorithms and Architectures for Parallel Processing, ICA3PP 2017, held in Helsinki, Finland, in August 2017. The 25 full papers presented were carefully reviewed and selected from 117 submissions. They cover topics such as parallel and distributed architectures; software systems and programming models; distributed and network-based computing; big data and its applications; parallel and distributed algorithms; applications of parallel and distributed computing; service dependability and security in distributed and parallel systems; performance modeling and evaluation. This volume also includes 41 papers of four workshops, namely: the 4th International Workshop on Data, Text, Web, and Social Network Mining (DTWSM 2017), the 5th International Workshop on Parallelism in Bioinformatics (PBio 2017), the First International Workshop on Distributed Autonomous Computing in Smart City (DACSC 2017), and the Second International Workshop on Ultrascale Computing for Early Researchers (UCER 2017).

c't Android 2015-c't-Redaktion 2015-01-20 Android ist der unumstrittene Marktführer bei den

Smartphone-Systemen. Die c't-Redaktion hat Android unter die Haube geschaut und zeigt, wohin sich das Betriebssystem entwickelt. In der Diskussion um die Datenkrake Google fällt immer wieder die enge Verknüpfung mit Android auf, mehrere Artikel stellen dar, wie Sie Ihr Smartphone von den Google-Diensten entkoppeln können. Eine Teststrecke gibt Ihnen Tests und Kaufberatungen an die Hand, mit denen Sie im Dschungel aktueller Smartphones und Tablets den Überblick bekommen, zusätzlich hat die Redaktion die neusten Smartwatches auf ihre Alltagstauglichkeit untersucht. In einem großen Praxisteil erfahren Sie, wie man einfache Hardware-Defekte selbst beheben kann, wie Sie mit Apps mehr aus Ihrem Mobilgerät herausholen und den mobilen Begleiter voll auf Ihre Bedürfnisse einrichten. Darüberhinaus bietet das Heft zwei Aktionen: 50 Prozent Rabatt (gültig bis 31.5.2015) auf das Verbatim Dual USB Power Pack und die Sicherheits-App Mobile Security & Antivirus von Eset kostenlos für ein Jahr. Die Aktivierung der App ist bis zum 31. Juli 2015 möglich.

Android Hacker's Handbook-Joshua J. Drake 2014-03-26 The first comprehensive guide to discovering and preventing attacks on the Android OS As the Android operating system continues to increase its share of the smartphone market, smartphone hacking remains a growing threat. Written by experts who rank among the world's foremost Android security researchers, this book presents vulnerability discovery, analysis, and exploitation tools for the good guys. Following a detailed explanation of how the Android OS works and its overall security architecture, the authors examine how vulnerabilities can be discovered and exploits developed for various system components, preparing you to defend against them. If you are a mobile device administrator, security researcher, Android app developer, or consultant responsible for evaluating Android security, you will find this guide is essential to your toolbox. A crack team of leading Android security researchers explain Android security risks, security design and architecture, rooting, fuzz testing, and vulnerability analysis Covers Android application building blocks and security as well as debugging and auditing Android apps Prepares mobile device administrators, security researchers, Android app developers, and security consultants to defend Android systems against attack Android Hacker's Handbook is the first comprehensive resource for IT professionals charged with smartphone security.

Speedlites Handbook-Syl Arena 2010-12-19 Getting your Canon Speedlite to produce the light you need can be a real challenge. For those new to flash photography—or for anyone who has previously given up out of frustration—Speedlites Handbook is a revelation. Photographer Syl Arena takes you on a journey that begins with an exploration of light and color, moves through a comprehensive discussion of the Canon Speedlite family and all of the accessories and equipment available to the Speedlites, then settles down to crafting great light in one photo shoot after another. Whether you want to create a classical portrait, shoot an event, or simply add a little fill light to a product shot, Speedlites Handbook shows you how. A fantastic in-depth resource illustrated with over 500 images, Speedlites Handbook covers: how to see the various characteristics and properties of light itself, as well as the differences between how your camera sees versus how you see all the buttons and dials of the entire Canon Speedlite family the basics of on-camera flash...and the necessity of getting your flash off the camera how to beautifully balance flash with the existing ambient light all the equipment necessary for great Speedlite shots how to get amazing shots with just one Speedlite how and when to use E-TTL versus manual flash the use of color gels to balance color, as well as create dramatic effects how to tame the sun—or any really bright light—with hi-speed sync and much, much more Whether you're shooting portraits, events, or sports, Speedlites Handbook is an essential resource that teaches you how to craft the light you need for any type of shot you want.

XDA Developers' Android Hacker's Toolkit-Jason Tyler 2012-05-08 Make your Android device truly your own Are you eager to make your Android device your own but you're not sure where to start? Then this is the book for you. XDA is the world's most popular resource for Android hacking enthusiasts, and a huge community has grown around customizing Android devices with XDA. XDA's Android Hacker's Toolkit gives you the tools you need to customize your devices by hacking or rooting the Android operating system. Providing a solid understanding of the internal workings of the Android operating system, this book walks you through the terminology and functions of the Android operating system from the major nodes of the file system to basic OS operations. As you learn the fundamentals of Android hacking that can be used regardless of any new releases, you'll discover exciting ways to take complete control over your device. Teaches theory, preparation and practice, and understanding of the OS Explains the distinction between ROMing and theming Provides step-by-step instructions for Droid, Xoom, Galaxy Tab, LG Optimus, and more Identifies the right tools for various jobs Contains new models enabling you to root and customize your phone Offers incomparable information that has been tried and tested by the amazing XDA

Embedded Android-Karim Yaghmour 2013-03-15 Embedded Android is for Developers wanting to create embedded systems based on Android and for those wanting to port Android to new hardware, or creating a custom development environment. Hackers and moders will also find this an indispensable guide to how Android works.

The Busy Coder's Guide to Advanced Android Development-Mark L. Murphy 2011 There are many Android programming guides that give you the basics. This book goes beyond simple apps into many areas of Android development that you simply will not find in competing books. Whether you want to add home screen app widgets to your arsenal, or create more complex maps, integrate multimedia features like the camera, integrate tightly with other applications, or integrate scripting languages, this book has you covered. Moreover, this book has over 50 pages of Honeycomb-specific material, from dynamic fragments, to integrating navigation into the action bar, to creating list-based app widgets. It also has a chapter on using NFC, the wireless technology behind Google Wallet and related services. This book is one in CommonsWare's growing series of Android related titles, including "The Busy Coder's Guide to Android Development," "Android Programming Tutorials," and the upcoming "Tuning Android Applications." Shooting in Sh\*tty Light-Lindsay Adler 2012-10-04 Sometimes photographers have to shoot in less than ideal lighting situations. Maybe the wedding is mid-day in the middle of a field, or perhaps the event is in a florescent-lit room. These scenarios can be particularly intimidating for beginning photographers who don't know how to handle the many undesirable lighting situations they may encounter. In Shooting in Sh\*tty Light, professional photographers Lindsay Adler and Erik Valind cover the top ten worst lighting situations and provide a variety of solutions for each. They explain which solutions are most practical and why one option might be preferable over another, examining such problems as extremely low lighting when no flash is allowed, strong backlight, and the light on an overcast day. Unlike other books that focus on natural light or lighting in general, this book addresses a very real need of beginning photographers, answering the question, "What do I do when the lighting is terrible?" Lindsay and Erik candidly show you the tools at your disposal, demonstrating the techniques essential to getting the job done with minimal fuss. Shows how to deal with ten of the worst lighting situations, such as harsh midday light, extremely low light, and mixed light. Offers real-life examples and practical solutions for handling poor light, such as identifying natural reflectors, bouncing light off a wall, or utilizing flash gels. Features a fun, conversational style to help you conquer the fear of poor lighting and approach any lighting situation with confidence!

Beginning Android 4 Games Development-Mario Zechner 2012-01-25 Beginning Android 4 Games Development offers everything you need to join the ranks of successful Android game developers. You'll start with game design fundamentals and programming basics, and then progress toward creating your own basic game engine and playable game that works on Android 4.0 and earlier devices. This will give you everything you need to branch out and write your own Android games. The potential user base and the wide array of available high-performance devices makes Android an attractive target for aspiring game developers. Do you have an awesome idea for the next break-through mobile gaming title?

Beginning Android 4 Games Development will help you kick-start your project. The book will guide you through the process of making several example games for the Android platform, and involves a wide range of topics: The fundamentals of Android game development targeting Android 1.5-4.0+ devices The Android platform basics to apply those fundamentals in the context of making a game The design of 2D and 3D games and their successful implementation on the Android platform

The Mobile Application Hacker's Handbook-Dominic Chell 2015-06-11 See your app through a hacker's eyes to find the real sources of vulnerability The Mobile Application Hacker's Handbook is a comprehensive guide to securing all mobile applications by approaching the issue from a hacker's point of view. Heavily practical, this book provides expert guidance toward discovering and exploiting flaws in

mobile applications on the iOS, Android, Blackberry, and Windows Phone platforms. You will learn a proven methodology for approaching mobile application assessments, and the techniques used to prevent, disrupt, and remediate the various types of attacks. Coverage includes data storage, cryptography, transport layers, data leakage, injection attacks, runtime manipulation, security controls, and cross-platform apps, with vulnerabilities highlighted and detailed information on the methods hackers use to get around standard security. Mobile applications are widely used in the consumer and enterprise markets to process and/or store sensitive data. There is currently little published on the topic of mobile security, but with over a million apps in the Apple App Store alone, the attack surface is significant. This book helps you secure mobile apps by demonstrating the ways in which hackers exploit weak points and flaws to gain access to data. Understand the ways data can be stored, and how cryptography is defeated Set up an environment for identifying insecurities and the data leakages that arise Develop extensions to bypass security controls and perform injection attacks Learn the different attacks that apply specifically to cross-platform apps IT security breaches have made big headlines, with millions of consumers vulnerable as major corporations come under attack. Learning the tricks of the hacker's trade allows security professionals to lock the app up tight. For better mobile security and less vulnerable data, *The Mobile Application Hacker's Handbook* is a practical, comprehensive guide.

PoC or GTFO-Manul Laphroaig 2017-10-31 This highly anticipated print collection gathers articles published in the much-loved *International Journal of Proof-of-Concept or Get The Fuck Out*. PoC||GTFO follows in the tradition of Phrack and *Uninformed* by publishing on the subjects of offensive security research, reverse engineering, and file format internals. Until now, the journal has only been available online or printed and distributed for free at hacker conferences worldwide. Consistent with the journal's quirky, biblical style, this book comes with all the trimmings: a leatherette cover, ribbon bookmark, bible paper, and gilt-edged pages. The book features more than 80 technical essays from numerous famous hackers, authors of classics like "Reliable Code Execution on a Tamagotchi," "ELFs are Dorky, Elves are Cool," "Burning a Phone," "Forget Not the Humble Timing Attack," and "A Sermon on Hacker Privilege." Twenty-four full-color pages by Ange Albertini illustrate many of the clever tricks described in the text. *Wired for Speech*-Clifford Nass 2007 How interactive voice-based technology can tap into the automatic and powerful responses all speech—whether from human or machine—evokes.

*The 123 of Digital Imaging*-Vincent Bockaert 2009 An interactive electronic book that makes use of animations and user-interactivity to help one learn about digital cameras and digital photography. *Mobile Payment*-Thomas Lerner 2013-11-29 Paying with mobile devices such as mobile phones or smart phones will expand worldwide in the coming years. This development provides opportunities for various industries (banking, telecommunications, credit card business, manufacturers, suppliers, retail) and for consumers. The book comprehensively describes current status, trends and critical aspects of successful mobile payment. It combines theory and practice. Comprising essential aspects of a successful mobile payment as well as successful case studies and practical examples, this book is for all who are developing, offering and using mobile payment.

*Learning Android Application Testing*-Paul Blundell 2015-03-26 If you are an Android developer looking to test your applications or optimize your application development process, then this book is for you. No previous experience in application testing is required.

*Full-Filled*-Renée Stephens 2011-12-27 Through her *Inside Out Weight Loss* program and seminars, along with podcasts downloaded more than 3 million times, Renée Stephens has helped countless people free themselves from emotional eating to achieve the body and life they've always desired. Now, in her first book, she shares the breakthrough lessons of her popular work and develops them into a complete, step-by-step program: *Full-Filled: The 6-Week Weight- Loss Plan for Changing Your Relationship with Food—and Your Life—from the Inside Out*. With *Full-Filled*, you will gain freedom from dieting as you use some of the world's most advanced mind and behavior-changing techniques. An intuitive and easy weight-loss program, *Full-Filled* will open the door to bigger transformations in your life. Not only will you drop excess physical pounds with Renée's expert guidance, you will get to the root of why you eat and you will lose your spiritual weight—by identifying why you eat the way you do and finding better ways to satisfy your true hunger without food. A former food addict, Stephens is a leading weight-loss coach who works with women and men who have spent years trying to free themselves from their weight struggle and to regain control of their lives. Women, Food and God led millions to spiritual insights; *Full-Filled* turns those insights into practical steps in an easy-to-follow program that will permanently change how you think about and behave around food. The *Full-Filled* program will identify and heal your underlying food issues and provide you with the specific tools to create new habits that will make you slim and healthy for

a lifetime. This isn't about what foods you should and shouldn't eat (although Renée does share some of her favorite recipes to make weight loss happen faster and easier). Filled with personal success stories and a whole bag of transformative tips and tricks, Full-Filled will set you up for significant weight loss and provide the no-fail techniques for keeping the pounds off permanently.

Financial Cryptography and Data Security-Rainer Böhme 2015-07-15 This book constitutes the thoroughly refereed post-conference proceedings of the 19th International Conference on Financial Cryptography and Data Security, FC 2014, held in San Juan, Puerto Rico, in January 2015. The 23 revised full papers and 10 short papers were carefully selected and reviewed from 102 full papers submissions. The papers are grouped in the following topical sections: sidechannels; cryptography in the cloud; payment and fraud detection; authentication and access control; cryptographic primitives; mobile security; privacy and incentives; applications and attacks; authenticated data structures.

Beginning Smartphone Web Development-Gail Frederick 2010-04-15 Today's Web 2.0 applications (think Facebook and Twitter) go far beyond the confines of the desktop and are widely used on mobile devices. The mobile Web has become incredibly popular given the success of the iPhone and BlackBerry, the importance of Windows Mobile, and the emergence of Palm Pre (and its webOS platform). At Apress, we are fortunate to have Gail Frederick of the well-known training site Learn the Mobile Web offer her expert advice in Beginning Smartphone Web Development. In this book, Gail teaches the web standards and fundamentals specific to smartphones and other feature-driven mobile phones and devices. Shows you how to build interactive mobile web sites using web technologies optimized for browsers in smartphones Details markup fundamentals, design principles, content adaptation, usability, and interoperability Explores cross-platform standards and best practices for the mobile Web authored by the W3C, dotMobi, and similar organizations Dives deeps into the feature sets of the most popular mobile browsers, including WebKit, Chrome, Palm Pre webOS, Pocket IE, Opera Mobile, and Skyfire By the end of this book, you'll have the training, tools, and techniques for creating robust mobile web experiences on any of these platforms for your favorite smartphone or other mobile device.

Cloud Computing-Jaydip Sen 2017-06-14 In the era of Internet of Things and with the explosive worldwide growth of electronic data volume, and associated need of processing, analysis, and storage of such humongous volume of data, it has now become mandatory to exploit the power of massively parallel architecture for fast computation. Cloud computing provides a cheap source of such computing framework for large volume of data for real-time applications. It is, therefore, not surprising to see that cloud computing has become a buzzword in the computing fraternity over the last decade. This book presents some critical applications in cloud frameworks along with some innovation design of algorithms and architecture for deployment in cloud environment. It is a valuable source of knowledge for researchers, engineers, practitioners, and graduate and doctoral students working in the field of cloud computing. It will also be useful for faculty members of graduate schools and universities.

Using Inertial Sensors for Position and Orientation Estimation-Manon Kok 2018-01-31

Microelectromechanical system (MEMS) inertial sensors have become ubiquitous in modern society. Built into mobile telephones, gaming consoles, virtual reality headsets, we use such sensors on a daily basis. They also have applications in medical therapy devices, motion-capture filming, traffic monitoring systems, and drones. While providing accurate measurements over short time scales, this diminishes over longer periods. To date, this problem has been resolved by combining them with additional sensors and models. This adds both expense and size to the devices. This tutorial focuses on the signal processing aspects of position and orientation estimation using inertial sensors. It discusses different modelling choices and a selected number of important algorithms that engineers can use to select the best options for their designs. The algorithms include optimization-based smoothing and filtering as well as computationally cheaper extended Kalman filter and complementary filter implementations. Engineers, researchers, and students deploying MEMS inertial sensors will find that this tutorial is an essential monograph on how to optimize their designs.

Spirit, soul & body-Andrew Wommack 2008 Have you ever asked yourself what changed when you were "born again?" You look in the mirror and see the same reflection - your body hasn't changed. You find yourself acting the same and yielding to those same old temptations - that didn't seem to change either. So you wonder, Has anything really changed?

Purple Cow-Seth Godin 2005-01-27 You're either a Purple Cow or you're not. You're either remarkable or invisible. Make your choice. What do Apple, Starbucks, Dyson and Pret a Manger have in common? How do they achieve spectacular growth, leaving behind former tried-and-true brands to gasp their last? The old checklist of P's used by marketers - Pricing, Promotion, Publicity - aren't working anymore. The golden age of advertising is over. It's time to add a new P - the Purple Cow. Purple Cow describes something phenomenal, something counterintuitive and exciting and flat-out unbelievable. In his new bestseller, Seth Godin urges you to put a Purple Cow into everything you build, and everything you do, to create something truly noticeable. It's a manifesto for anyone who wants to help create products and services that are worth marketing in the first place.

Himalaya Bound: One Family's Quest to Save Their Animals--And an Ancient Way of Life-Michael Benanav 2018-01-02 A gorgeous work of literary journalism that follows a nomadic family's fraught migration to the high Himalayan plains, as a changing world closes in around them. Following his vivid account of traveling with one of the last camel caravans on earth in Men of Salt, Michael Benanav now brings us along on a journey with a tribe of forest-dwelling nomads in India. Welcomed into a family of nomadic water buffalo herders, he joins them on their annual spring migration into the Himalayas. More than a glimpse into an endangered culture, this superb adventure explores the relationship between humankind and wild lands, and the dubious effect of environmental conservation on peoples whose lives are inseparably intertwined with the natural world. The migration Benanav embarked upon was plagued with problems, as government officials threatened to ban this nomadic family—and others in the Van Gujjar tribe—from the

high alpine meadows where they had summered for centuries. Faced with the possibility that their beloved buffaloes would starve to death, and that their age-old way of life was doomed, the family charted a risky new course, which would culminating in an astonishing mountain rescue. And Benanav was arrested for documenting the story of their plight. Intimate and enthralling, Himalaya Bound paints a sublime picture of a rarely-seen world, revealing the hopes and fears, hardships and joys, of a people who wonder if there is still a place for them on this planet. Laced with stories of tribal cultures from India to Yellowstone, from Jordan to Kenya, Benanav deftly wends through the controversial terrain where Western ways of protecting the environment clash with indigenous understandings of nature. Himalaya Bound celebrates and mourns an ancient way of life, while revealing an unlikely battleground in the fight to save the earth.

Entertainment Science-Thorsten Hennig-Thurau 2018-08-01 The entertainment industry has long been dominated by legendary screenwriter William Goldman's "Nobody-Knows-Anything" mantra, which argues that success is the result of managerial intuition and instinct. This book builds the case that combining such intuition with data analytics and rigorous scholarly knowledge provides a source of sustainable competitive advantage - the same recipe for success that is behind the rise of firms such as Netflix and Spotify, but has also fueled Disney's recent success. Unlocking a large repertoire of scientific studies by business scholars and entertainment economists, the authors identify essential factors, mechanisms, and methods that help a new entertainment product succeed. The book thus offers a timely alternative to "Nobody-Knows" decision-making in the digital era: while coupling a good idea with smart data analytics and entertainment theory cannot guarantee a hit, it systematically and substantially increases the probability of success in the entertainment industry. Entertainment Science is poised to inspire fresh new thinking among managers, students of entertainment, and scholars alike. Thorsten Hennig-Thurau and Mark B. Houston - two of our finest scholars in the area of entertainment marketing - have produced a definitive research-based compendium that cuts across various branches of the arts to explain the phenomena that provide consumption experiences to capture the hearts and minds of audiences. Morris B. Holbrook, W. T. Dillard Professor Emeritus of Marketing, Columbia University Entertainment Science is a must-read for everyone working in the entertainment industry today, where the impact of digital and the use of big data can't be ignored anymore. Hennig-Thurau and Houston are the scientific frontrunners of knowledge that the industry urgently needs. Michael Kölmel, media entrepreneur and Honorary Professor of Media Economics at University of Leipzig Entertainment Science's winning combination of creativity, theory, and data analytics offers managers in the creative industries and beyond a novel, compelling, and comprehensive approach to support their decision-making. This ground-breaking book marks the dawn of a new Golden Age of fruitful conversation between entertainment scholars, managers, and artists. Allègre Hadida, Associate Professor in Strategy, University of Cambridge
