White 2013-06-21 This guide book explains all operations, features, menus, and controls of the Canon PowerShot S110 camera, providing information about how to accomplish things with the camera as well as when and why to use certain features. The book explains topics such as autofocus, manual focus, depth of field, aperture priority, shutter priority, HDR (High Dynamic Range) photography, white balance, ISO, and macro photography, in the context of getting great results with Canon’s highly pocketable camera. The book gives details about how to take advantage of the camera’s varied array of “Scene” and “Creative Filters” shooting settings. The guide’s more than 300 photographs, almost all in full color, illustrate the camera’s controls and menus and include examples of the photographs that can be taken using the S110’s many options, including the Creative Filters settings, which alter the color processing and other aspects of images; menu options such as i-Contrast and digital zoom; and the camera’s strong features for continuous shooting. In addition, the book goes beyond the realm of everyday photography with introductions to topics such as infrared photography, street photography, and using the Raw format, which permits a wide range of adjustments to images after they have been captured. The book also explains the video recording abilities of the PowerShot S110, which can record high-definition (HD) video with stereo sound and can take “Super Slow Motion” movies that slow down action by a factor of eight. In three appendices, the book discusses accessories, including cases, a filter adapter, and external flash units; contains a list of useful web sites and other resources; and includes helpful “quick tips” that give particular insights into how to take best advantage of the camera’s features.</p> <p>Popular Photography- 2009</p> <p>The 123 of Digital Imaging-Vincent Bockeaert 2009 An interactive electronic book that makes use of animations and user-interactivity to help one learn about digital cameras and digital photography.</p> <p>Statistical and Geometrical Approaches to Visual Motion Analysis-Daniel Cremers 2009-07-25 This book constitutes the thoroughly refereed post-conference proceedings of the International Dagstuhl-Seminar on Statistical and Geometrical Approaches to Visual Motion Analysis, held in Dagstuhl Castle, Germany, in July 2008. Sickles 2014-03-15 From Robin Sickles: As I indicated to you some months ago Professor William Horrace and I would like Springer to publish a Festschrift in Honor of Peter Schmidt, our professor. Peter’s accomplishments are legendary among his students and the profession. I have a bit of that student perspective in my introductory and closing remarks on the website for the conference we had in his honor this last July. I have attached the conference program from which selected papers will come (as well as from students who were unable to attend). You will also find the names of his students (40) on the website. A top twenty economics department could be started up from those 40 students. Papers from some festschrifts have a thematic link among the papers based on subject material. What I think is unique to this festschrift is that the theme running through the papers will be Peter’s remarkable legacy left to his students to frame a problem and then analyze and examine it in depth using rigorous techniques but rarely just for the purpose of showcasing technical refinements per se. I think this would be a book that graduate students would find invaluable in their early research careers and seasoned scholars would find invaluable in both their and their students’ research.</p> <p>Global Trends in Computing and Communication Systems-P. Inspired by Chekhov’s short stories, the book is a series of photographic vignettes--taken from 2004-2006--of quotidian moments in contemporary American life, which Graham occasionally punctuates with the sublime. For example, there is an image of a man mowing his lawn while it begins to rain and the sun illuminates each drop. These filmic haiku avoid summation; life simply flows past, enveloping the viewer in its beauty.
