Stargate SG1 - Relativity-James Swallow 2007-09-25 Future Imperfect... When SG-1 encounter the Pack - a nomadic space-faring people who have fled Goa'uld domination for generations - it seems as though a trade of technologies will benefit both sides. But someone is determined to derail the deal. With the SGC under attack, and Vice President Kinsey breathing down their necks, it's up to Colonel Jack O'Neill and his team to uncover the saboteur and save the fledgling alliance. But unbeknownst to SG-1 there are far greater forces at work - a calculating revenge that spans decades, and a desperate gambit to prevent a cataclysm of epic proportions. When the identity of the saboteur is revealed, O'Neill is faced with a horrifying truth and is forced into an unlikely alliance in order to fight for Earth's future...

Hollyweird Science-Kevin R. Grazier 2015-07-27 Lighthearted, quirky, and upbeat, this book explores the portrayal of science and technology on both the big and little screen -- and how Hollywood is actually doing a better job of getting it right than ever before. Grounded in the real-world, and often cutting-edge, science and technology that inspires fictional science, the authors survey Hollywood depictions of topics such as quantum mechanics, parallel universes, and alien worlds. Including material from interviews with over two dozen writers, producers, and directors of acclaimed science-themed productions -- as well as scientists, science fiction authors, and science advisors -- Hollyweird Science examines screen science fiction from the sometimes-conflicting vantage points of storytellers, researchers, and viewers. Including a foreword by Eureka co-creator and executive producer Jaime Paglia, and an afterword by astronomer and science fiction author Michael Brotherton, Ph.D., this book is accessible to all readers from the layperson to the armchair expert to the professional scientist, and will delight all of them equally.

Shakespeare's Planet-Clifford D. Simak 2015-07-21 A human space traveler trapped on a remote planet must somehow unravel a confounding alien technology—or else surrender himself to a host of incomprehensible horrors For thousands of years, Carter Horton has been traveling across the galaxy toward a distant world capable of supporting human life. At journey's end, awakened from his millennia-long sleep by a curiously adaptive android, he is informed that his crewmates have all perished due to a system malfunction. But worse is yet to come: Horton's sentient ship is refusing to return him to Earth, and a strangely cordial predator is waiting for him on the planet's surface. The repulsive creature, Carnivore, arrived here via a tunnel across the universe, as did his late companion—a human dubbing himself William Shakespeare—whom Carnivore just recently devoured. But the tunnel moves in only one direction, and if Carter is unable to reverse it, he will find himself marooned forever in this incomprehensible world, at the mercy of monsters and a terrifying, mind-freezing alien anomaly that occurs every evening in the "God-hour." With unparalleled verve, award-winning science fiction Grand Master Clifford D. Simak performs a truly astonishing feat of world-creation in Shakespeare's Planet. Bursting with intelligence, imagination, and breathtaking invention, this is a gem of speculative fiction from one of the genre's most revered and innovative artists.

Cost of Honor-Radclyffe 2019-11-12 Secret Service Agent Oakes Weaver is in the midst of the biggest assignment of her career—leading the advance team for President Andrew Powell's impending trip to Philadelphia where everyone expects he will be nominated to run for a second term. The last thing she needs is a tragedy among the president's inner circle that might not be an accident, or the sudden recruitment of Ari Rostof, a woman who might be a lot more than she seems. But Oakes doesn't get a say in policy. She only has to secure the president's safety—at all costs. First Daughter Blair Powell and her spouse, Cameron Roberts, are among the reelection campaign members accompanying President Andrew Powell to Philadelphia. While the president may be

protected by his Secret Service agents, those close to him are literally in the kill zone, and his adversaries will stop at nothing to further their cause—even mass murder.

Hyperspace-Michio Kaku 2016-04-20 Reissued in new covers, this is the run-away bestseller from one of the world's leading theoretical physicists. Are there other dimensions beyond our own? Is time travel possible? Michio Kaku takes us on a tour of the most exciting work in modern physics, including research into the 10th dimension, time warps, and multiple universes, to outline what may be the leading candidate for the Theory of Everything.

The Postmodern Sacred-Emily McAvan 2012-10-09 From The Matrix and Harry Potter to Stargate SG:1 and The X-Files, recent science fiction and fantasy offerings both reflect and produce a sense of the religious. This work examines this pop-culture spirituality, or “postmodern sacred,” showing how consumers use the symbols contained in explicitly “unreal” texts to gain a secondhand experience of transcendence and belief. Topics include how media technologies like CGI have blurred the lines between real and unreal, the polytheisms of Buffy and Xena, the New Age Gnosticism of The DaVinci Code, the Islamic “Other” and science fiction’s response to 9/11, and the Christian Right and popular culture. Today’s pervasive, saturated media culture, this work shows, has utterly collapsed the sacred/profane binary, so that popular culture is not only powerfully shaped by the discourses of religion, but also shapes how the religious appears and is experienced in the contemporary world.

creative, visionary and inspiring leaders who are also found to present a high degree of psychopathy. They focus on the nature, behaviours and consequences of psychopathy in executives and across the organization, offering an important contribution to the emerging body of research on psychopathy and other problematic personality constructs in the workplace. The book will appeal to scholars, students and professionals across the discipline, and particularly to those working in workplace, forensic and personality psychology.

Slow Light-Sidney Perkowitz 2011-07-26 Slow Light is a popular treatment of today's astonishing breakthroughs in the science of light. Even though we don't understand light's quantum mysteries, we can slow it to a stop and speed it up beyond its Einsteinian speed limit, 186,000 miles/sec; use it for quantum telecommunications; teleport it; manipulate it to create invisibility; and perhaps generate hydrogen fusion power with it. All this is lucidly presented for non-scientists who wonder about teleportation, Harry Potter invisibility cloaks, and other fantastic outcomes. Slow Light shows how the real science and the fantasy inspire each other, and projects light's incredible future. Emory physicist Sidney Perkowitz discusses how we are harnessing the mysteries of light into technologies like lasers and fiber optics that are transforming our daily lives. Science-fiction fantasies like Harry Potter's invisibility cloak are turning into real possibilities. Please click here for more info. Contents: What is Light? Keywords:Light;Invisibility;Teleportation;Entanglement;Slow Light;Fast Light;Backwards Light;Laser;Laser Fusion;Quantum;Quantum Computing;Quantum Cryptography;Relativity;Faster Than Light Travel;Science Fiction;Star Trek;Cloaking Device;Invisible ManKey Features:Slow Light is unique in bringing together different aspects of contemporary light science and technology, and presenting them at a popular level. No other title covers all these areas. Slow light and invisibility in particular have not been presented at length in popular booksThe book will appeal to both science fans and science fiction fans

fiction fans, for it weaves real science together with fictional science. It presents both ongoing research and classic and modern science fiction, from H G Wells' "The Invisible Man" through "Star Trek" to contemporary films and television series. The author brings expertise in light gained from his own laboratory research, and is also known as a skilled and clear expositor of science for non-scientists. His earlier "Empire of Light", about science and art, gained critical acclaim and has been translated into several languages. His "Digital People" and "Hollywood Science" have also established him as a lecturer and media figure who explores the relations between science and science fiction. Reviews: "This excellent little book tells of the truly marvelous properties of light that have been revealed in the last half century or so. Highly recommended." Choice "With an elegant and clear style, Perkowitz takes the reader through the reality of these remarkable phenomena, including the strange quantum effects related to entanglement. Here is an author who is keen to show that what we know is already amazing, without having to pour over the purely hypothetical." CERN Courier

The Flat Earth Trilogy Book of Secrets I-Gregory Lessing Garrett 2018-12-20 This book is an Anthology of Gregory Lessing Garrett's writings and others on the topic of Flat Earth Plane Cosmology of all types, including Enclosed Earth, Hollow Earth, Concave Earth, Infinite Plane Earth, The Enochian Earth Model, etc... The hope is that the ideas expounded in this Flat Earth Trilogy series will provide compelling justifications for the claim that no curvature can be found on the Earth, which points to the empirical conclusion that we live on a plane and not a spinning ball in science fiction outer space. The details regarding the possible topography of the Earth are discussed in depth in this book, but ultimately, the absolute true topography of the Earth is not known by anyone. -Gregory Lessing Garrett

Slipstring Drive-Andrew L. Bender 2006-11 Written for amateur physicists. This book takes you through the basics of string and M-theories so that you can embark on a "faster than light" voyage without violating physics. Andrew Bender proposes a method of travel by using gravity waves to completely isolate volumes of spacetime from the rest of the universe.

Lady of Mazes-Karl Schroeder 2006-06-27 Karl Schroeder is one of the new stars of hard SF. His novels, Ventus and Permanence, have established him as a new force in the field. Now he extends his reach into Larry Niven territory, returning to the same distant future in which Ventus was set, but employing a broader canvas, to tell the story of Teven Coronal, a ringworld with a huge multiplicity of human civilizations. Brilliant but troubled Livia Kodaly is Teven's only hope against invaders both human and superhuman who would destroy its fragile ecologies and human diversity. Filled with action, ideas, and intellectual energy, Lady of Mazes is the hard SF novel of the year. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Shadow Man-Melissa Scott 2009-09-01 In the far future, human culture develops five distinctive genders due to the effects of a drug that eases sickness from faster-than-light travel. Winner of a Lambda Literary Award for Gay/Lesbian Science Fiction, "Shadow Man" remains one of the more important modern, speculative novels ever published in the field of gender and sexual identity.

The Emerald Tablets of Thoth The Atlantean-M. DOREAL

2020-10-29 The history of the Emerald Tablets is strange and beyond the belief of modern scientists. Their antiquity is stupendous, dating back some 36,000 years B.C The author is Thoth, an Atlantean Priest-King who founded a colony in ancient Egypt, wrote the Emerald Tablets in his native Atlantean language which was translated by Dr. Michael Doreal. This edition of the Emerald Tablets is unique in that it includes both the translation and interpretation by Dr. Doreal. Because of the tablet's reference to the Egypt and sacred geometry they became a priority reference for those studying the Flower of Life and the Merkaba meditation. As requested by the Flower of Life Organization, this edition offers Dr. Doreal's translation and interpretation in a side-by-side study format.
