LD Sat Study Guide-Paul Osborne, Ed.M. 2009-06-02 The first SAT guide for students with learning disabilities. For the growing number of students with learning disabilities who take the SAT each year, studying for the test is even more grueling than it is for traditional students. There is nothing on the market to prepare them for the SAT, and traditional manuals are inadequate both in content and presentation. LD SAT Study Guide is the first commercially available SAT preparation manual that prepares students with disabilities in general, and devotes specific attention and instruction to the more common disabilities, including dyslexia, ADD/ADHD, nonverbal learning disabilities, math disabilities, and visual or auditory processing disorders. As a free supplement to the book, readers will have access to a companion website that enables them to take several practice tests and receive subject-specific feedback that pinpoints their strengths and weaknesses. Students can then focus their preparation accordingly to maximize their overall SAT score.

Your Students, My Students, Our Students-Lee Ann Jung 2019-09-25 Your Students, My Students, Our Students explores the hard truths of current special education practice and outlines five essential disruptions to the status quo. Authors Lee Ann Jung, Nancy Frey, Douglas Fisher, and Julie Kroener show you how to - Establish a school culture that champions equity and inclusion. - Rethink the long-standing structure of least restrictive environment and the resulting service delivery. - Leverage the strengths of all educators to provide appropriate support and challenge. - Collaborate on the delivery of instruction and intervention. - Honor the aspirations of each student and plan accordingly. To realize authentic and equitable inclusion, we must relentlessly and collectively pursue change. This book--written not for "special educators" or "general educators" but for all educators--addresses the challenges, maps out the solutions, and provides tools and inspiration for the work ahead. Real-life examples of empowerment and success illustrate just what's possible when educators commit to the belief that every student belongs to all of us and all students deserve learning experiences that will equip them to live full and rewarding lives.

Everyday Engagement-Katy Ridnouer 2011-03-30 In this book, author and teacher Katy Ridnouer focuses on the potentially overwhelming, sometimes puzzling, often delicate work of engaging both students and parents in the pursuit of learning and achievement. Structured around the questions teachers ask themselves about engagement goals and challenges, Everyday Engagement offers specific strategies to try -- in your classroom, with your students, and with their parents--that will help you * Connect with students and parents as individuals. * Communicate invitations to engagement (and regroup and respond if your initial invitations are rejected). * Provide appropriate, ongoing support and encouragement that will keep students in class, behavior in check, and learning on track. * Anticipate and handle setbacks and complications in teacher-student and teacher-parent relationships. * Tap outside resources to extend learning beyond the walls of the classroom. Ridnouer believes that every teacher has the power to make students and parents partners in learning. When a teacher embeds pro-engagement action and attitudes into everyday practice, the question is not if students and parents will be engaged in classroom learning, but how they will choose to engage and how far that engagement will take them.

Students at the Center-Bena Kallick 2017-01-27 Educators' most important work is to help students develop the intellectual and social strength of character necessary to live well in the world. The way to do this, argue authors Bena Kallick and Allison Zmuda, is to increase the say students have in their own learning and prepare them to navigate complexities they face both inside and beyond school. This means rethinking traditional teacher and student roles and re-examining goal setting, lesson planning, assessment, and feedback practices. It means establishing classrooms that prioritize ■ Voice--Involving students in "the what" and "the how" of learning and equipping them to be stewards of their own education. ■ Co-creation--Guiding students to identify the challenges and concepts they want to explore and outline the actions they will take. ■ Social construction--Having students work with others to theorize, pursue common goals, build products, and generate performances. ■ Self-discovery--Teaching students to reflect on their own developing skills and knowledge so that they will acquire new understandings of themselves and how they learn. Based on their exciting work in the field, Kallick and Zmuda map out a transformative model of personalization that puts students at the center and asks them to employ the set of dispositions for engagement and learning known as the Habits of Mind. They share the perspectives of educators engaged in this work; highlight the habits that empower students to pursue aspirations, investigate problems, design solutions, chase curiosities, and create performances; and provide tools and recommendations for adjusting classroom practices to facilitate learning that is self-directed, dynamic, sometimes messy, and always meaningful.

The Public International Law Study Guide for Students-Cristina Verones 2014-07-18 A sound understanding of public international law is indispensable for any lawyer, whether working in an international or domestic context. It is therefore important that students have a thorough theoretical understanding of international law issues, and are able to apply the relevant international legal rules to a given set of facts, so as to arrive at a legally coherent conclusion. This practical aspect of learning international law is often neglected in favour of more theoretical aspects - which is where this book comes in. The book offers a series of hypothetical practical cases in public international law, including some of its specialised branches, such as international human rights law and international criminal law. It challenges students to practise and familiarise themselves with the methodology and to write solutions to practical international legal questions. The book is in two parts: part one contains practical (exam-like) questions, while part two contains the solutions. The practical questions in part one are organised by subject, such as treaty law or state responsibility. One chapter is dedicated to more complex 'interconnected' cases, where students are asked to tackle problems which span multiple potential cases and topics. ENDORSEMENT 'An extremely interesting and innovative text that students studying Public International Law should find invaluable.' Associate Professor Joanne Sellick Associate Dean for Teaching and Learning, University of Plymouth

Hanging In-Jeffrey Benson 2014-01-02 Many students arrive at school with unique mixtures of family histories, traumatic experiences, and special needs that test our skills and try our patience. In Hanging In: Strategies for Teaching the Students Who Challenge Us Most, veteran educator Jeffrey Benson shows educators the value of tenacity and building connections in teaching the students who most need our help. This essential guide includes * Detailed portraits based on real-life students whose serious challenges inhibited their classroom experience--and how they eventually achieved success. * Strategies for how to analyze students' challenges and develop individualized plans to help them discover a sense of comfort with learning--with in-depth examples of plans in action; * Recommendations for teachers and support team on how to gain skills and support and not lose hope through the ups and downs of the work; and * Specific advice for administrators on constructing systems and procedures that give all our students the best chance for success. Just as teaching the students who challenge us is among our most frustrating experiences as educators, sticking with students until they finally "get it" is among our most rewarding. In Hanging In, you'll find the inspiration and field-tested ideas necessary to create a patient and supportive environment for even the most demanding cases in the classroom.

Engaging Students with Poverty in Mind-Eric Jensen 2013-08-23 In this galvanizing follow-up to the best-selling Teaching with Poverty in Mind, frustrated educator and learning expert Eric Jensen digs deeper into engagement as the key factor in the academic success of economically disadvantaged students. Drawing from research, experience, and real school success stories, Engaging Students with Poverty in Mind reveals * Smart, purposeful engagement strategies that all teachers can use to expand students' cognitive capacity, increase motivation and effort, and build deep, enduring understanding of content. * The (until-now) unwritten rules for engagement that are essential for increasing student achievement. * How automating engagement in the classroom can help teachers use instructional time more effectively and empower students to take ownership of their learning. * Steps you can take to create an exciting yet realistic implementation plan. Too many of our most vulnerable students are tuning out and dropping out because of our failure to engage them. It's time to set the bar higher. Until we make school the best part of every student's day, we will struggle with attendance, achievement, and graduation rates. This timely resource will help you take immediate action to revitalize and enrich your practice so that all your students may thrive in school and beyond.

Even on Your Worst Day, You Can Be a Student's Best Hope-Manny Scott 2017-08-05 As Manny Scott travels the world speaking to students and educators, he meets young people whose stories sound a lot like his own--a childhood that was marked by poverty, instability, violence, and despair until a few caring educators showed him how to find meaning in the classroom and gave him a glimpse of his own possibilities. So many kids he meets today need this kind of hope and practical assistance. But with all that is already on educators' plates, what can an individual teacher do to help traumatized children believe in themselves, succeed in school, and graduate prepared for work and life? Here, you'll find answers. With the same passion that inspires so many who hear him speak, Scott presents an approach informed by the teachers who helped him and honed through years of connecting with kids who desperately need someone to show them a path to a more positive future. He shares the little things you can do to prepare your self for the hard work of making a difference and offers advice for bridging cultural divides, earning students' trust, and equipping them to take responsibility for their own success. This book is a reminder of the incredible power every teacher has to help young people rewrite their destinies--and it's a call to action for all who read it.

Mindfulness in the Classroom-Thomas Armstrong 2019-07-18 In today's schools, students and teachers feel unprepared--even alarming--levels of stress. How can we create calmer classrooms in which students concentrate better and feel more positive about themselves and others? Author Thomas Armstrong offers a compelling answer in the form of mindfulness, a secular practice he defines as the intentional focus of one's attention on the present moment in a nonjudgmental way. In Mindfulness in the Classroom, Armstrong - Explains how mindfulness affects the structure and function of the brain. - Provides an overview of mindfulness as both a personal practice and a classroom methodology that aligns with such educational models as Social and Emotional Learning (SEL), Positive Behavioral Intervention and Supports (PBIS), and Universal Design for Learning (UDL). - Shares and explains the extensive research that shows the positive effects of mindfulness practices in the classroom. - Describes how to adapt mindfulness for different grade levels, integrate it into regular school subjects, and implement it schoolwide. - Offers guidelines for teaching mindfulness responsibly, without religious overtones. Dozens of observations from teachers, students, researchers, and practitioners provide striking evidence of the power of mindfulness and offer hope to anyone who wants to make classrooms more productive places of learning.

What We Say and How We Say It Matter-Mike Anderson 2019-02-26 We all want our students to feel safe, collaborate well with others, feel ownership for their learning, and be joyfully engaged in their work. Nevertheless, many teachers end up using language patterns that undermine these goals. Do any of these scenarios sound familiar? We want students to take responsibility for their learning, yet we use language that implies teacher ownership. We want to build positive relationships with students, yet we use sarcasm when we get frustrated. We want students to think learning is fun, yet we sometimes make comments that suggest the opposite. We want students to exhibit good behavior because it's the right thing to do, yet we rely on threats and bribes, which implies students don't naturally want to be good. What teachers say to students--when they praise or discipline, give directions or ask questions, and introduce concepts or share stories--affects student learning and behavior. A slight change in intonation can also dramatically change how language feels for students. In What We Say and How We Say It Matter, Mike Anderson digs into the nuances of language in the classroom. This book's many examples will help teachers examine their language habits and intentionally improve their classroom practice so their language matches and supports their goals.

Becoming the Educator They Need-Robert Jackson 2019-08-14 Winner of AM&P EXCEL Gold Award "They don't care about their education." "They are not capable of learning." "I can't work with them." "I can't get through to them." Just as you may have thought these things about your students, they, too, may have similar thoughts about you: "She doesn't care about my education." "He is not capable of understanding me." "I can't work with her." "I can't get through to him." While all students in your class, building, or school district need your support, the Black and Latino male students--the most underserved, suspended, and expelled students in education--need you to understand them as you support them so that they can thrive academically. In Becoming the Educator They Need, former professional athlete turned educator Robert Jackson reminds teachers and administrators that although "a great majority of all the stories in the news about Black and Latino males are negative," these young men--the most likely to be incarcerated, drop out of school, and become victims of homicide--need you to work through any biases you may have and internalize and employ the five core beliefs and mindsets necessary to best serve your Black and Latino male students, the six core values for teaching Black and Latino males, and the 11 characteristics of strong, healthy relationships and become the educator that these students need.

What We Know About Grading-Thomas R. Guskey 2019-02-04 Grading is one of the most hotly debated topics in education, and grading practices themselves are largely based on tradition, instinct, or personal history or philosophy. But to be effective, grading policies and practices must be based on trustworthy research evidence. Enter this book: a review of 100-plus years of grading research that presents the broadest and most comprehensive summary of research on grading and reporting available to date, with clear takeaways for learning and teaching. Edited by Thomas R. Guskey and Susan M. Brookhart, this indispensable guide features thoughtful, thorough dives into the research from a distinguished team of scholars, geared to a broad range of stakeholders, including teachers, school leaders, policymakers, and researchers. Each chapter addresses a different area of grading research and describes how the major findings in that area might be leveraged to improve grading policy and practice. Ultimately, Guskey and Brookhart identify four themes emerging from the research that can guide these efforts: - Start with clear learning goals. - Focus on the feedback function of grades. - Limit the number of grade categories, and - Provide multiple grades that reflect product, process, and progress criteria. By distilling the vast body of research evidence into meaningful, actionable findings and strategies, this book is the jump-start all stakeholders need to build a better understanding of what works--and where to go from here.

Learning in the Fast Lane-Suzzy Pepper Rollins 2014-04-10 Too often, students who fail a grade or a course receive remediation that ends up widening rather than closing achievement gaps. According to veteran classroom teacher and educational consultant Suzzy Pepper Rollins, the true answer to supporting struggling students lies in acceleration. In Learning in the Fast Lane, she lays out a plan of action that teachers can use to immediately move underperforming students in the right direction and differentiate instruction for all learners--even those who excel academically. This essential guide identifies eight high-impact, research-based instructional approaches that will help you * Make standards and learning goals explicit to students. * Increase students' vocabulary--a key to their academic success. * Build students' motivation and self-efficacy so that they become active, optimistic participants in class. * Provide rich, timely feedback that enables students to improve when it counts. * Address skill and knowledge gaps within the context of new learning. Students deserve no less than the most effective strategies available. These hands-on, ready-to-implement practices will enable you to provide all students with compelling, rigorous, and engaging learning experiences.

Causes & Cures in the Classroom-Margaret Searle 2013-11-18 Whether students leave the classroom confident and goal-directed or frustrated and aimless depends on our ability to do two things: diagnose their needs and deliver support. This challenge can be daunting when students come to school with weak vocabulary, poor planning and organization skills, and problems with memory, impulse control, and attention span. Causes & Cures reveals new neurological research about the root causes of these obstacles and lays out a comprehensive five-step protocol designed to help all educators identify and address common student academic and behavior issues. This essential guide provides * Illuminating case studies that walk you through the protocol in a variety of content areas and grade levels. * Strategies and tools to help you diagnose root causes and develop targeted, effective interventions for your students. * Guidance for extending individualized interventions to large groups. Most of us went into teaching with the dream of helping all our students succeed. We can't let students who struggle wear us down or wait us out. No matter which subject or grade level you teach, this indispensable resource will show how you can help students overcome difficulties and experience real success in the classroom.

Now That's a Good Question!-Erik M. Francis 2016-07-22 In this book, Erik M. Francis explores how one of the most fundamental instructional strategies--questioning--can provide the proper scaffolding to deepen student thinking, understanding, and application of knowledge. You'll learn: *Techniques for using questioning to extend and evaluate student learning experiences. *Eight different kinds of questions that challenge students to demonstrate higher-order thinking and communicate depth of knowledge. *How to rephrase the performance objectives of college and career readiness standards into questions that engage and challenge students. Francis offers myriad examples of good questions across content areas and grade levels, as well as structures to help teachers create and use the different kinds of questions. By using this book to fine-tune your approach to questioning, you can awaken the spirit of inquiry in your classroom and help students deepen their knowledge, understanding, and ability to communicate what they think and know.

The Burnout Cure-Chase Mielke 2019-03-19 How can you energize yourself to maintain or regain a positive outlook and love of teaching? What specific, immediate actions can you take to enhance your well-being and thrive both on and off the job? Award-winning teacher Chase Mielke draws from his own research, lesson plans, and experiences with burnout to help you change your outlook, strengthen your determination to be a terrific teacher, and reignite your core passion for teaching. Often lighthearted, yet thoroughly grounded in research on social-emotional learning and positive psychology, The Burnout Cure explains how shifts in awareness, attitudes, and actions can be transformational for you and for your students. The book describes specific steps related to mindfulness, empathy, gratitude, and altruism that you can use on your own and with students via classroom lessons and activities. Equipped with these tools, teachers can be their best, so they can give their best to the learners in their care.

From Behaving to Belonging-Julie Causton 2020 Challenging behavior is one of the most significant issues educators face. Though it may seem radical to use words like love, compassion, and heart when we talk about behavior and discipline, the compassionate and heartfelt words, actions, and strategies teachers employ in the classroom directly shape who students are--and who they will become. But how can teaching from the heart translate into effective supports and practices for students who exhibit challenging behavior? In From Behaving to Belonging, Julie Causton and Kate MacLeod detail how teachers can shift from a "behavior management" mindset (that punishes students for "bad" behavior or rewards students for "good" or "compliant" behavior) to an approach that supports all students--even the most challenging ones--with kindness, creativity, acceptance, and love. Causton and MacLeod's approach * Focuses on students' strengths, gifts, and talents. * Ignites students' creativity and sense of self-worth. * Ensures that students' social, emotional, and academic needs are met. * Prompts teachers to rethink challenging behavior and how they support their students. * Helps teachers identify barriers to student success in the cultural, social, and environmental landscape. * Inspires teachers to reconnect with their core values and beliefs about students and teaching. We need to transform our classrooms into places of love. To that end, this book represents a paradigm shift from a punitive mindset to a strengths-based, loving approach and encourages the radical act of creating more inclusive and caring schools.

Powerful Teaching-Pooja K. Agarwal 2019-05-13 Unleash powerful teaching and the science of learning in your classroom Powerful Teaching: Unleash the Science of Learning empowers educators to harness rigorous research on how students learn and unleash it in their classrooms. In this book, cognitive scientist Pooja K. Agarwal, Ph.D., and veteran K-12 teacher Patrice M. Bain, Ed.S., decipher cognitive science research and illustrate ways to successfully apply the science of learning in classrooms settings. This practical resource is filled with evidence-based strategies that are easily implemented in less than a minute--without additional prepwork, grading, or funding! Research demonstrates that these powerful strategies raise student achievement by a letter grade or more; boost learning for diverse students, grade levels, and subject areas; and enhance students' higher order learning and transfer of knowledge beyond the classroom. Drawing on a fifteen-year scientist-teacher collaboration, more than 100 years of research on learning, and rich experiences from educators in K-12 and higher education, the authors present highly accessible step-by-step guidance on how to transform teaching with four essential strategies: Retrieval practice, spacing, interleaving, and feedback-driven metacognition. With Powerful Teaching, you will: Develop a deep understanding of powerful teaching strategies based on the science of learning Gain insight from real-world examples of how evidence-based strategies are being implemented in a variety of academic settings Think critically about your current teaching practices from a research-based perspective Develop tools to share the science of learning with students and parents, ensuring success inside and outside the classroom Powerful Teaching: Unleash the Science of Learning is an indispensable resource for educators who want to take their instruction to the next level. Equipped with scientific knowledge and evidence-based tools, turn your teaching into powerful teaching and unleash student learning in your classroom.

Learning Targets-Connie M. Moss 2012-07-02 In Learning Targets, Connie M. Moss and Susan M. Brookhart contend that improving student learning and achievement happens in the immediacy of an individual lesson--what they call "today's lesson"--or it doesn't happen at all. The key to making today's lesson meaningful? Learning targets. Written from students' point of view, a learning target describes a lesson-sized chunk of information and skills that students will come to know deeply. Each lesson's learning target connects to the next lesson's target, enabling students to master a coherent series of challenges that ultimately lead to important curricular standards. Drawing from the authors' extensive research and professional learning partnerships with classrooms, schools, and school districts, this practical book * Situates learning targets in a theory of action that students, teachers, principals, and central-office administrators can use to unify their efforts to raise student achievement and create a culture of evidence-based, results-oriented practice. * Provides strategies for designing learning targets that promote higher-order thinking and foster student goal setting, self-assessment, and self-regulation. * Explains how to design a strong performance of understanding, an activity that produces evidence of students' progress toward the learning target. * Shows how to use learning targets to guide summative assessment and grading. Learning Targets also includes reproducible planning forms, a classroom walk-through guide, a lesson-planning process guide, and guides to teacher and student self-assessment. What students are actually doing during today's lesson is both the source of and the yardstick for school improvement efforts. By applying the insights in this book to your own work, you can improve your teaching expertise and dramatically empower all students as stakeholders in their own learning.

Setting the Standard for Project Based Learning-John Larmer 2015-05-26 Project based learning (PBL) is gaining renewed attention with the current focus on college and career readiness and the performance-based emphases of Common Core State Standards, but only high-quality versions can deliver the beneficial outcomes that schools want for their students. It's not enough to just "do projects." Today's projects need to be rigorous, engaging, and in-depth, and they need to have student voice and choice built in. Such projects require careful planning and pedagogical skill. The authors--leaders at the respected Buck Institute for Education--take readers through the step-by-step process of how to create, implement, and assess PBL using a classroom-tested framework. Also included are chapters for school leaders on implementing PBL systemwide and the use of PBL in informal settings. Examples from all grade levels and content areas provide evidence of the powerful effects that PBL can have, including * increased student motivation and preparation for college, careers, and citizenship; * better results on high-stakes tests; * a more satisfying teaching experience; and * new ways for educators to communicate with parents, communities, and the wider world. By successfully implementing PBL, teachers can not only help students meet standards but also greatly improve their instruction and make school a more meaningful place for learning. Both practical and inspirational, this book is an essential guide to creating classrooms and schools where students--and teachers--excel.

Who's Doing the Work?-Jan Miller Burkins 2016-04-28 In their follow-up to Reading Wellness, Jan Burkins and Kim Yaris explore how some traditional scaffolding practices may actually rob students of important learning opportunities and independence. Who's Doing the Work? suggests ways to make small but powerful adjustments to instruction that hold students accountable for their own learning. Educators everywhere are concerned about students whose reading development inexplicably plateaus, as well as those who face challenging texts without applying the strategies they've been taught. When such problems arise, our instinct is to do more. But when we summarize text before reading or guide students when they encounter difficult words, are we leading them to depend on our support? If we want students to use strategies independently, Jan and Kim believe that we must question the ways our scaffolding is getting in the way. Next generation reading instruction is responsive to students' needs, and it develops readers who can integrate reading strategies without prompting from instructors. In Who's Doing The Work?, Jan and Kim examine how instructional mainstays such as read-aloud, shared reading, guided reading, and independent reading look in classrooms where students do more of the work. Classroom snapshots at the end of each chapter help translate the ideas in the book into practice. Who's Doing the Work? offers a vision for adjusting reading instruction to better align with the goal of creating independent, proficient, and joyful readers.
