Worldwide Guide to Massey Ferguson Industrial and Construction Equipment-John Farnworth 2002-06-02 There won't be any new industrial machines touting the Massey Ferguson logo any time soon. Since 1997, placing the MF badge on these heavy machines ceased to exist. This timely book identifies a total of 26 basic types of industrial equipment produced and marketed by Massey Ferguson. There are three supporting chapters on early, pre-1964 Massey-Harris, Ferguson and early Massey Ferguson industrial equipment. Plus, a chronology of the development of MF_s factories, and a short history of the development of shuttle transmissions are included. This book provides a valuable reference text and identification guide.

The Body in Human Inquiry-Vicente Berdayes 2004 The human body has recently emerged as a central concept of social theory. Social scientists, philosophers, and scholars in other disciplines now routinely argue that abstract concepts such as class and gender should be understood by examining how they are expressed in the body's everyday practices. Such an approach has humanized social theory by emphasizing the role that concretely situated human beings play in acting out or redefining social norms. How will this emphasis on human embodiment transform methods of social inquiry? The volume takes up this question by examining how the recognition of human embodiment entails reworking standard models of social research. Individual chapters focus on such topics as communication theory, ethics, policy science, globalization and cultural changes, gerontology, and pedagogical practice.

The Berlin Project-Gregory Benford 2017-05-09 New York Times bestselling author Gregory Benford creates an alternate history about the creation of the atomic bomb that explores what could have happened if the bomb was ready to be used by June 6, 1944. Karl Cohen, a chemist and mathematician who is part of The Manhattan Project team, has discovered an alternate solution for creating the uranium isotope needed to cause a chain reaction: U-235. After convincing General Groves of his new method, Cohen and his team of scientists work at Oak Ridge preparing to have a nuclear bomb ready to drop by the summer of 1944 in an effort to stop the war on the western front. What ensues is an altered account of World War II in this taut thriller. Combining fascinating science with intimate and true accounts of several members of The Manhattan Project, The Berlin Project is an astounding novel that reimagines history and what could have happened if the atom bomb was ready in time to stop Hitler from killing millions of people.

Historical Dictionary of Ancient India-Kumkum Roy 2009 India's history and culture is ancient and dynamic, spanning back to the beginning of human civilization. Beginning with a mysterious culture along the Indus River and in farming communities in the southern lands of India, the history of India is punctuated by constant integration with migrating peoples and with the diverse cultures that surround the country. Placed in the center of Asia, history in India is a crossroads of cultures from China to Europe, as well as the most significant Asian connection with the cultures of Africa. The Historical Dictionary of Ancient India provides information ranging from the earliest Paleolithic cultures in the Indian subcontinent to 1000 CE. The ancient history of this country is related in this book through a chronology, an introductory essay, a bibliography, and hundreds of cross-referenced dictionary entries on rulers, bureaucrats, ancient societies, religion, gods, and philosophical ideas.

Good Derivatives-Richard L Sandor 2012-04-06 Through the eyes of an inventor of new markets, Good Derivatives: A Story of Financial and Environmental Innovation tells the story of how financial innovation - a concept that is misunderstood and under attack - has been a positive force in the last four decades. If properly designed and regulated, these "good derivatives" can open vast possibilities to address a variety of global problems. Filled with provocative ideas, fascinating stories, and valuable lessons, it will provide both an insightful interpretation of the last forty years in capital and environmental markets and a vision of world finance for the next forty years. As a young economist at the Chicago Board of Trade, Richard Sandor helped create interest rate futures, a development that revolutionized worldwide finance. Later, he pioneered the use of emissions trading to reduce acid rain, one of the most successful environmental programs ever. He will provide unique insights into the process of creating these new financial products. Covering successes and failures, the story describes the tireless process of inventing, educating and creating support for these new inventions in places like Chicago, New York, London, Paris and how it is unfolding today in Mumbai, Shanghai and Beijing. The book will tell the story of the creation of the Chicago Climate Exchange and its affiliated exchanges (European Climate Exchange, Chicago Climate Futures Exchange and Tianjin Climate Exchange, located in China). The lessons learned in these markets can play a critical role in effectively addressing global climate

change and other pressing environmental issues. The author argues that market-based trading systems are a far more effective means of reducing pollutants than “command-and-control”. Environmental markets may ultimately help to find solutions to issues such as rainforest destruction, water problems and biodiversity threats. Written in an engaging, narrative style, Good Derivatives will be of interest to both practitioners and general readers who want to better understand the creative process of financial innovation. In the middle of so much distrust of markets, it is also a recipe of how transparent, well-regulated markets can be a force for good in the environmental, health, and social areas.

Shipstar-Gregory Benford 2014-04-08 The dramatic sequel to Larry Niven and Gregory Benford's New York Times bestselling novel, Bowl of Heaven Science fiction masters Larry Niven (Ringworld) and Gregory Benford (Timescape) continue the thrilling adventure of a human expedition to another star system that is jeopardized by an encounter with an astonishingly immense artifact in interstellar space: a bowl-shaped structure cupping a star, with a habitable area equivalent to many millions of Earths. And which, tantalizingly, is on a direct path heading toward the same system the human ship is to colonize. Investigating the Bowl, or Shipstar, the human explorers are separated—one group captured by the gigantic structure's alien inhabitants, the other pursued across its strange and dangerous landscape—while the mystery of the Shipstar's origins and purpose propel the human voyagers toward discoveries that transform their understanding of their place in the universe. Bedford Buses and Coaches-Nigel R B Furness 2016-08-31 Bedford Buses and Coaches provides a detailed review of the entire range of purpose-built Public Service Vehicle (PSV) bus and coach chassis that carried the Bedford name from 1931 until production ceased in 1986. Bedfords were once a familiar sight on the roads not only of the United Kingdom, but throughout the world. They were produced in such volume that the advertising slogan 'You see them everywhere' was quite legitimately adopted by Vauxhall Motors, the manufacturer of Bedford vehicles. Fully illustrated throughout with hundreds of photographs, the majority in colour, the book includes detailed descriptions of the Bedford petrol and diesel engines and other manufacturers engines used in Bedford bus and coach chassis. Detailed specifications and production histories are given for all the full-size passenger chassis including the WHB/WLB, WTB, OB/OWB, SB, VAS, VAL, VAM, Y-series and the Venturer. Road tests and owners' experiences are covered along with advice on buying and restoring a Bedford bus or coach. This book will be of great interest to all bus enthusiasts and historians and is superbly illustrated with 200 colour and 50 black & white photographs.

In the Ocean of Night-Gregory Benford 2007-07-31 The first novel of the classic Galactic Center series, written by eminent American physicist and award-winning author of "Timescape." 2019: NASA Astronaut Nigel Walmsley is sent on a mission to intercept a rogue asteroid on a collision course with Earth. Ordered to destroy the comet, he instead discovers that it is actually the shell of a derelict space probe—a wreck with just enough power to emit a single electronic signal... 2034: Then a reply is heard. Searching for the source of this signal that comes from outside the solar system, Nigel discovers the existence of a sentient ship. When the new vessel begins to communicate directly with him, the astronaut learns of the horrors that await humanity. For the ship was created by an alien race that has spent billions and billions of years searching for intelligent life...to annihilate it.

Safety of Loads on Vehicles- 2002 In the UK every year, there are over 4,000 successful prosecutions of drivers and operators for unsafe loads, whilst many other incidents go unreported. The legal requirements seek to ensure all loads carried by commercial vehicles are adequately secured in order to protect those involved in loading, unloading and driving the vehicle, as well as other road users and pedestrians. This guide discusses the basic principles of load safety, as well as giving recommendations for specific loads including metal, timber and glass. It also covers any equipment on the vehicle such as loader cranes, landing legs and tailgates. It contains references to industry standards and codes of practice, and addresses the legal framework and possible offences.

The UK Pesticide Guide 2020-Martin A. Lainsbury 2020 By far the biggest change to The UK Pesticide Guide in 2020 is the loss of a number of active ingredients that have been fundamental to many crop protection programmes. The final use-up of chlorothalonil formulations; propiconazole, fenpropimorph, chloridazon and diquat occurs in 2020 but there are also a few exciting new additions. Aclonifen is a new residual herbicide for use in potatoes that already has a number of EAMUs for use in minor crops. BASF is launching its new triazole, mefentrifluconazole, which promises to restore full triazole activity, at least initially. On the insecticide front the new active ingredient from Corteva agriscience, sulfoxaflor, is now listed for use in Cucurbitae and ornamentals under full protection for control of aphids and whitefly.

Multivariable Mathematics-Theodore Shifrin 2005 Multivariable Mathematics combines linear algebra and multivariable mathematics in a rigorous approach. The material is integrated to emphasize the recurring theme of implicit versus explicit that persists in linear algebra and analysis.
