The Declaration of Independence, after all, is an anti-imperial document, cataloguing the sins of the metropolitan government against the colonies. With the Revolution, and again in 1812, the nation stood against the most powerful empire in the world and declared itself independent. As noted by Ian Tyrrell and Jay Sexton, however, American “anti-imperialism was clearly selective, geographically, racially, and constitutionally.” Empire’s Twin broadens our conception of anti-imperialist actors, ideas, and actions; it charts this story across the range of American history, from the Revolution to our own era; and it opens up the transnational and global dimensions of American anti-imperialism. By tracking the diverse manifestations of American anti-imperialism, this book highlights the different ways in which historians can approach it in their research and teaching. The contributors cover a wide range of subjects, including the discourse of anti-imperialism in the Early Republic and Civil War, anti-imperialist actions in the U.S. during the Mexican Revolution, the anti-imperial dimensions of early U.S. encounters in the Middle East, and the transnational nature of anti-imperialist public sentiment during the Cold War and beyond.</div> <div>Racial Borders-James N. Leiker 2009-06-25 “With the publication of Racial Borders Leiker has established himself as a leading authority on African American military history. This is a fine example of new social history and should be widely read.”—Journal of America’s Military Past “. . . presents a nuanced approach to understanding this border area . . . helps the reader to understand the reactions of the many groups in the area to the presence of the United States Army and its four African American units.”—Journal of American History</div> <div>U.S. History-P. Scott Corbett 2017-12-19 Published by OpenStax College, U.S. History covers the breadth of the chronological history of the United States and also provides the necessary depth to ensure the course is manageable for instructors and students alike. U.S. History is designed to meet the scope and sequence requirements of most courses. The authors introduce key forces and major developments that together form the American experience, with particular attention paid to considering issues of race, class and gender. The text provides a balanced approach to U.S. history, considering the people, events and ideas that have shaped the United States from both the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived experience).</div> <div>Nature’s Revenge-Edmund Blake 2013-02 Climate change and resource depletion are two of the most daunting problems mankind may face in the coming decades. However while both appear to be relatively new phenomena, they are related to growing problems that date back decades, if not hundreds of years. In Nature’s Revenge, author Edmund Blake takes an in-depth look at the influence developments in the natural world have exerted on human history, and conversely, the influence human activities have had on nature. Blake also undertakes an exploration of the ways in which the changing perception of nature reveals the dominant values that inform a particular civilization. His book provides evidence demonstrating that the way in which nature is viewed during a given period can have genuine lasting real-world implications. Nature’s Revenge ultimately attempts to provide a rational and objective exploration of our immediate future here on Earth with the climate-related challenges we face. The author also has included an epilogue that considers mankind’s chances of being able to rise to meet these challenges in the coming years. Edmund Blake was born in the UK and brought up in the county of Essex. Blake studied French and English literature at university, and completed a doctoral thesis on philosophy and political ideologies linked to Bergsonism. Currently he resides in a rural area of France. Nature’s Revenge was inspired by his disdain for the exploitation of nature by multi-national companies and certain self-serving members of the political elite. Lehmberg 2002 Presenting material on themes such as women’s history, the family, religion, intellectual history, society, politics and the arts, these volumes provide a resource for students of the political and cultural heritage of the British Isles.</div> <div>Nationalism and Imperialism in South and Southeast Asia-Arnold P. Kaminsky 2016-09-13 This volume is a festschrift for Damodar Ramaji SarDesai (b. 1931), Professor Emeritus of History at the University of California, Los Angeles (UCLA) where all of the contributors received their Ph.D as did SarDesai himself. His work for over fifty years at UCLA has been an inspiration to generations of students, and he has made major contributions to the world of learning, and in his chosen areas of specialization of India, especially its foreign policy with regard to Southeast Asia, imperialism and the history of the modern European empires; and Southeast Asia. He has served as Chair of the History Department at UCLA as well as Bombay University and President of the Asiatic Society of Bombay. The volume includes a biographical introduction and a bibliographic essay on SarDesai’s major writings and contains new and cutting-edge essays on the design of imperial Vijayanagara; famine policy in colonial India and how European imperialist policies created, or exacerbated the impact of, famines; the relatively unknown chapter of ‘Chinese Gordon’s’ brief Indian career; reflections on the Tamil humanist A. Madhaviah, a man ahead of his time; nationalism and the career of industrialist G.D. Birla, Gandhi’s friend; the ‘Chindia Problematic’—India and China relations; the state of Philippine historiography and its nationalist impulses; the role of Vietnamese highlanders in the Vietnamese nationalist struggle and their recent plight; early Malayan nationalism; and the efforts of American administrators to protect Philippine highland natives from being forced to participate in international exhibitions as curiosities from the American colony.</div> <div>Imperialism, Crisis and Class Struggle-Henry Veltmeyer 2010 This book of essays, written in honour of James Petras, address some of the most critical issues of our time: those of imperialism, crisis and class struggle. These issues allow the authors to identify both the enduring verities and contemporary face of capitalism and Petras contributions.</div> <div>Sources for Frameworks of World History-Lynne Miles-Morillo 2014-01-01 Each chapter in Sources for Frameworks of World History contains four to six sources-including photographs, graphics, maps, poetry, and cartoons-carefully chosen by Stephen Morillo and coeditor Lynn Miles-Morillo to specifically complement Frameworks of World History. Chapter introductions, headnotes, and reading questions provide context, while a general introduction examines problems and issues in working with and interpreting sources.</div> <div>Imperialism in the Twenty-First Century-John Smith 2016-01-22 Winner of the first Paul A. Baran-Paul M. Sweezy Memorial Award for an original monograph concerned with the political economy of imperialism, John Smith’s Imperialism in the Twenty-First Century is a seminal examination of the relationship between the core capitalist countries and the rest of the world in the age of neoliberal globalization.Deploying a sophisticated Marxist methodology, Smith begins by tracing the production of certain iconic commodities-the T-shirt, the cup of coffee, and the iPhone-and demonstrates how these generate enormous outflows of money from the countries of the Global South to transnational corporations headquartered in the core capitalist nations of the Global North. From there, Smith draws on his empirical findings to powerfully theorize the current shape of imperialism. He argues that the core capitalist countries need no longer rely on military force and colonialism (although these still occur) but increasingly are able to extract profits from workers in the Global South through market mechanisms and, by aggressively favoring places with lower wages, the phenomenon of labor arbitrage. Meticulously researched and forcefully argued, Imperialism in the Twenty-First Century is a major contribution to the theorization and critique of global capitalism.</div> <div>American Imperialism-Adam Burns 2017-01-17 Provides a critical re-evaluation of US territorial expansionism and imperialism from 1783 to the present!The United States has been described by many of its foreign and domestic critics as an aempire Providing a wide-ranging analysis of the United States as a territorial, imperial power from its foundation to the present day, this book explores the United States acquisition or long-term occupation of territories through a chronological perspective. It begins by exploring early continental expansion, such as the purchase of the Louisiana Territory from Napoleon Bonaparte in 1803, and traces US imperialism through to the controversial ongoing presence of US forces at Guantanamo Bay in Cuba. The book provides fresh insights into the history of US territorial expansion and imperialism, bringing together more well-known instances (such as the purchase of Alaska) with those less-frequently discussed (such as the acquisition of the Guano Islands after 1856). The volume considers key historical debates, controversies and turning points, providing a historiographically-grounded re-evaluation of US expansion from 1783 to the present day.Key FeaturesProvides case studies of different examples of US territorial expansion/imperialism, and adds much-needed context to ongoing debates over US imperialism for students of both History and PoliticsAnalyses many of the better known instances of US imperialism (for example, Cuba and the Philippines), while also considering often-overlooked examples such as the US Virgin Islands, American Samoa and GuamExplores American imperialism from a aterritorial acquisition/long-term occupationa viewpoint which differentiates it from many other books that instead focus on informal and economic imperialismDiscusses the presence of the US in key places such as Guantanamo Bay, the Panama Canal Zone and the Arctic</div> <div>British Imperialism-P.J. Cain 2016-03-02 A milestone in the understanding of British history and imperialism, this ground-breaking book radically reinterprets the course of modern economic development and the causes of overseas expansion during the past three centuries. Employing their concept of ‘gentlemanly capitalism’, the authors draw imperial and domestic British history together to show how the shape of the nation and its economy depended on international and imperial ties, and how these ties were used to produce the post-colonial world of today. Containing a significantly expanded and updated Foreword and Afterword, this third edition assesses the development of the debate since the book’s original publication, discusses the imperial era in the context of the controversy over globalization, and shows how the study of the age of empires remains relevant to understanding the post-colonial world. Covering the full extent of the British empire from China to South America and taking a broad chronological view from the seventeenth century to post-imperial Britain today, British Imperialism: 1688–2015 is the perfect read for all students of imperial and global history.</div> <div>Racism and Colonialism-R.J. Ross 2012-12-06 1. REFLECTIONS ON A THEME by ROBERT ROSS This book, the fourth in the series Comparative Studies in Overseas History, and, like its predecessors, the product of a symposium held by the Leiden Centre for the History of European Expansion, is organised around a single theme, the relationship between the ideological structures of domination and oppression that have come to be called racism and the political and economic ones which grew out of Europe’s conquering and ruling much of the rest of the world. By racism, we mean those systems of thought in which group characteristics of human beings, of a non-somatic nature, are considered to be fixed by principles of descent and in which, in general, physical attributes (other than those of sex) are the main sign by which characteristics are attributed. In addition, almost by definition, the systems of thought entailed in this require that there is a hierarchy of the various races, and that those people in the lower ranks of that hierarchy are seriously disadvantaged, at least if the proponents of racist thought are able to impose their will on the society in which they live. ! The exclusion of the discrimination of women from the concept of racism should not be thought as entailing that racist and sexist ideas do not have much in common, since both derive from essentially biological determinism, and indeed 2 racist societies have historically almost invariably been strongly sexist.</div> <div>The Japanese Colonial Empire, 1895-1945-Ramon H. Myers 2020-06-23 These essays, by thirteen specialists from Japan and the United States, provide a comprehensive view of the Japanese empire from its establishment in 1895 to its liquidation in 1945. They offer a variety of perspectives on subjects previously neglected by historians: the origin and evolution of the formal empire (which comprised Taiwan, Korea, Karafuto, the Kwantung Leased Territory, and the South Seas Mandated Islands), the institutions and policies by which it was governed, and the economic dynamics that impelled it. Seeking neither to justify the empire nor to condemn it, the contributors place it in the framework of Japanese history and in the context of colonialism as a global phenomenon. Contributors are Ching-chih Chen, Edward I-te Chen, Bruce Cumings, Peter Duus, Lewis H. Gann, Samuel Pao-San Ho, Marius B. Jansen, Mizoguchi Toshiyuki, Ramon H. Myers, Mark R. Peattie, Michael E. Robinson, E. Patricia Tsurumi, Yamada Saburō, Yamamoto Yūzō.</div> <div>Africa in the Colonial Ages of Empire-Mentan, Tatah 2017-12-16 Words like “colonialism” and “empire” were once frowned upon in the U.S. and other Western mainstream media as worn-out left-wing rhetoric that didn’t fit reality. Not anymore! Tatah Mentan observes that a growing chorus of right-wing ideologues, with close ties to the Western administrations’ war-making hawks in NATO, are encouraging Washington and the rest of Europe to take pride in the expansion of their power over people and nations around the globe. Africa in the Colonial Ages of Empire is written from the perspective that the scholarly lives of academics researching on Africa are changing, constantly in flux and increasingly bound to the demands of Western colonial imperialism. This existential situation has forced the continent to morph into a tool in the hands of Colonial Empire. According to Tatah Mentan, the effects of this existential situation of Africa compel serious academic scrutiny. At the same time, inquiry into the African predicament has been changing and evolving within and against the rhythms of this “new normal” of Colonial Empire-Old or New. The author insists that the long and bloody history of imperial conquest that began with the dawn of capitalism needs critical scholarly examination. As Marx wrote in Capital: “The discovery of gold and silver in America, the extirpation, enslavement and entombment in mines of the aboriginal population, the beginning of the conquest and looting of the East Indies, the turning of Africa into a warren for the commercial hunting of black-skins, signaled the rosy dawn of the era of capitalist production. These idyllic proceedings are the chief moment of primitive accumulation.” Africa in the Colonial Ages of Empire is therefore a MUST-READ for faculty, students as well as policy makers alike in the changing dynamics of their profession, be it theoretically, methodologically, or structurally and materially.</div> <div>A Concise History of Modern Europe-David S. Mason 2011-01-16 Highlighting the most important events, ideas, and individuals that shaped modern Europe, A Concise History of Modern Europe provides a readable, succinct history of the continent from the Enlightenment and the French Revolution to the present day. Avoiding a detailed, lengthy chronology, the book focuses on key events and ideas to explore the causes and consequences of revolutions—be they political, economic, or scientific; the origins and development of human rights and democracy; and issues of European identity. Any reader needing a broad overview of the sweep of European history since 1789 will find this book, published in a first edition under the title Revolutionary Europe, an engaging and cohesive narrative.</div> <div>Spheres of Influence in the Age of Imperialism-Noam Chomsky 1972</div> <div>Imperialism-Harry Magdoff 2019-02-15 This volume contains a series of essays aimed at illuminating the theory, history, and roots of imperialism, which extend the analysis developed in Magdoff’s The Age of Imperialism.</div> <div>The Worldly Philosophers-Robert L. Heilbroner 1980</div> <div>Ecological Imperialism-Alfred W. Crosby 2015-10-31 A fascinating study of the important role of biology in European expansion, from 900 to 1900.</div> <div>Peace in the East-Yi Tae-Jin 2017-10-10 On October 26, 1909, the Korean patriot An Chunggün assassinated the Japanese statesman Itō Hirobumi in Harbin, China. More than a century later, the ramifications of An’s daring act continue to reverberate across East Asia and beyond. This volume explores the abiding significance of An, his life, and his written work, most notably On Peace in the East (Tongyang p’yŏnghwaron), from a variety of perspectives, especially historical, legal, literary, philosophical, and political. The ways in which An has been understood and interpreted by contemporaries, by later generations, and by scholars and thinkers even today shed light on a range of significant issues including the intellectual and philosophical underpinnings for both imperial expansion and resistance to it; the ongoing debate concerning whether violence, or even terrorism, is ever justified; and the possibilities for international cooperation in today’s East Asia as a regional collective. Students and scholars of East Asia will find much to engage with and learn from in this volume.</div> <div>Discourses of Education in the Age of New Imperialism-Jerome Satterthwaite 2005 This fourth volume in the Discourse, Power, Resistance series takes the theme into new territory, setting educational thinking and practice firmly in its global political context. Drawing on schools of thought as diverse as Marxism and eco-feminist theology, the contributors to Part 1 (Global Imperialism and Terror: The Theory and Practice of Othering), led by Peter McLaren, examine the possibilities for critical thinking and transformative practice in the aftermath of 9/11 and the new age of cultural and political imperialism. In Part 2 (Praxis: Thinking and Doing) contributors draw on a range of critical perspectives to examine both the theory and practice of education, taking the reader from the self to the system and back again via dynamic systems theory, flow theory and a multiplicity of diverse (and often conflicting) practices of subversion. The book closes with two radical departures from the norm: a seriously playful transgression into the fields of pop art and film, and a searing poetic lament on the current state of educational policy and practice. As educators, we are all, in William Pinar’s words, ‘behind enemy lines’, in a field which, despite our continued bids for autonomy, is increasingly hijacked by globalizing political forces. This book offers modes of resistance which are startling, unsettling and challenging. It will be of deep interest to students, tutors and researchers in education, policy studies and related fields, and to those who are involved in training, or becoming, the educators of the future. The contributors are Peter McLaren, William Pinar, Mike Cole, Lisa Isherwood, Elizabeth Atkinson, Tamsin Haggis, Sue Clegg, Gill Boag-Munroe, Ros Ollin, Victoria</div> <div>National Geographic Almanac of World History-Patricia Daniels 2011 Presents a reference guide that provides authoritative maps, charts, and chronologies complemented by informative essays covering all the major periods of human history between the time of the Neanderthals and the nuclear age.</div> <div>Wilhelmism and Its Legacies-Geoff Eley 2003-05-01 What was distinctive—and distinctively “modern”—about German society and politics in the age of Kaiser Wilhelm II? In addressing this question, these essays assemble cutting-edge research by fourteen international scholars. Based on evidence of an explicit and self-confidently “bourgeois” formation in German public culture, the contributors suggest new ways of interpreting its reformist potential and advance alternative readings of German political history before 1914. While proposing a more measured understanding of Wilhelmine Germany’s extraordinarily dynamic society, they also grapple with the ambivalent, cross-cutting nature of German “modernities” and reassess their impact on long-term developments running through the Wilhelmine age.</div> <div>The Oxford History of Islam-John L. Esposito 2000-04-06 Lavishly illustrated with over 300 pictures, including more than 200 in full color, The Oxford History of Islam offers the most wide-ranging and authoritative account available of the second largest—and fastest growing—religion in the world. John L. Esposito, Editor-in-Chief of the four-volume Oxford Encyclopedia of the Modern Islamic World, has gathered together sixteen leading scholars, both Muslim and non-Muslim, to examine the origins and historical development of Islam—its faith, community, institutions, sciences, and arts. Beginning in the pre-Islamic Arab world, the chapters range from the story of Muhammad and his Companions, to the development of Islamic religion and culture and the empires that grew from it, to the influence that Islam has on today’s world. The book covers a wide array of subjects, casting light on topics such as the historical encounter of Islam and Christianity, the role of Islam in the Mughal and Ottoman empires, the growth of Islam in Southeast Asia, China, and Africa, the political, economic, and religious challenges of European imperialism in the nineteenth and twentieth centuries, and Islamic communities in the modern Western world. In addition, the book offers excellent articles on Islamic religion, art and architecture, and sciences as well as bibliographies. Events in the contemporary world have led to an explosion of interest and scholarly work on Islam. Written for the general reader but also appealing to specialists, The Oxford History of Islam offers the best of that recent scholarship, presented in a readable style and complemented by a rich variety of illustrations.</div> <div>The Nature of German Imperialism-Bernhard Gissibl 2016-07-01 Today, the East African state of Tanzania is renowned for wildlife preserves such as the Serengeti National Park, the Ngorongoro Conservation Area, and the Selous Game Reserve. Yet few know that most of these initiatives emerged from decades of German colonial rule. This book gives the first full account of Tanzanian wildlife conservation up until World War I, focusing upon elephant hunting and the ivory trade as vital factors in a shift from exploitation to preservation that increasingly excluded indigenous Africans. Analyzing the formative interactions between colonial governance and the natural world, The Nature of German Imperialism situates East African wildlife policies within the global emergence of conservationist sensibilities around 1900.</div> <div>Ancient Egyptian Imperialism-Ellen Morris 2018-08-06 Offers a broad and unique look at Ancient Egypt during its long age of imperialism Written for enthusiasts and scholars of pharaonic Egypt, as well as for those interested in comparative imperialism, this book provides a look at some of the most intriguing evidence for grand strategy, low-level insurgencies, back-room deals, and complex colonial dynamics that exists for the Bronze Age world. It explores the actions of a variety of Egypt’s imperial governments from the dawn of the state until 1069 BCE as they endeavored to control fiercely independent mountain dwellers in Lebanon, urban populations in Canaan and Nubia, highly mobile Nilotic pastoralists, and predatory desert raiders. The book is especially valuable as it foregrounds the reactions of local populations and their active roles in shaping the trajectory of empire. With its emphasis on the experimental nature of imperialism and its attention to cross-cultural comparison and social history, this book offers a fresh perspective on a fascinating subject. Organized around central imperial themes—which are explored in depth at particular places and times in Egypt’s history—Ancient Egyptian Imperialism covers: Trade Before Empire—Empire Before the State (c. 3500-2686); Settler Colonialism (c. 2400-2160); Military Occupation (c. 2055-1775); Creolization, Collaboration, Colonization (c. 1775-1295); Motivation, Intimidation, Enticement (c. 1550-1295); Organization and Infrastructure (c. 1458-1295); Outwitting the State (c. 1362-1332); Conversions and Contractions in Egypt’s Northern Empire (c. 1295-1136); and Conversions and Contractions in Egypt’s Southern Empire (c. 1550-1069). Offers a wider focus of Egypt’s experimentation with empire than is covered by general Egyptologists Draws analogies to tactics employed by imperial governments and by dominated peoples in a variety of historically documented empires, both old world and new Answers questions such as “how often and to what degree did imperial blueprints undergo revisions?” Ancient Egyptian Imperialism is an excellent text for students and scholars of history, comparative history, and ancient history, as well for those interested in political science, anthropology, and the Biblical World.</div> <div>Hannah Arendt and the Uses of History-Richard H. King 2007-12-15 Hannah Arendt first argued the continuities between the age of European imperialism and the age of fascism in Europe in ‘The Origins of Totalitarianism’. This text uses Arendt’s insights as a starting point for further investigations into the ways in which race, imperialism, slavery and genocide are linked.</div> <div>An Economic History-Fedor [iA]kovlevich Poli[ai]nskii 1985</div> <div>Disciples of Liberty-Lawrence S. Little 2000 Lawrence S. Little is an assistant professor of African American history at Villanova University.</div> <div>Epidemics and History-Sheldon J. Watts 1999 This book is a major and wide-ranging study of the great epidemic scourges of humanity—plague, leprosy, smallpox, syphilis, cholera, and yellow fever/malaria—over the last six centuries. It is also much more. Sheldon Watts, a cultural and social historian who has spent much of his career studying and teaching in the world’s South, applies a wholly original perspective to the study of global disease, exploring the connections between the movement of epidemics and the manifestations of imperial power in the Americas, Asia, Africa, and in European homelands. He shows how the perceptions of whom a disease targeted changed over time and effected various political and medical responses. He argues that not only did Western medicine fail to cure the diseases that its own expansion engendered, but that imperial medicine was in fact an agent and tool of empire. Watts examines the relationship between the pre-modern and modern medical profession and such epidemic disasters as the plague in western Europe and the Middle East; leprosy in the medieval West and in the nineteenth-century tropical world; the spread of smallpox to the New World in the age of exploration; syphilis and nonsexual diseases in Europe’s connection with Asia; cholera in India during British rule; and malaria in the Atlantic Basin during the eras of slavery and Social Darwinism. He investigates in detail the relation between violent environmental changes and disease, and between disease and society, both in the material sphere and in the minds and spirits of rulers and ruled. This book will become the standard account of the way diseases—arising through chance, through reckless environmental change engineered by man, or through a combination of each—were interpreted in Western Europe and in the colonized world. Comrades against Imperialism-Michele L. Louro 2018-03-31 Examines the emergence of anti-imperialist internationalism during the interwar years from the perspective of India’s first Prime Minister, Jawaharlal Nehru.</div> <div>Nationalizing the Past-S. Berger 2016-01-19 Historians traditionally claim to be myth-breakers, but national history since the nineteenth century shows quite a record in myth-making. This exciting new volume compares how national historians in Europe have handled the opposing pulls of fact and fiction and shows which narrative strategies have contributed to the success of national histories.</div> <div>How Europe Underdeveloped Africa-Walter Rodney 2018-11-27 The classic work of political, economic, and historical analysis, powerfully introduced by Angela Davis In his short life, the Guyanese intellectual Walter Rodney emerged as one of the leading thinkers and activists of the anticolonial revolution, leading movements in North America, South America, the African continent, and the Caribbean. In each locale, Rodney found himself a lightning rod for working class Black Power. His deportation catalyzed 20th century Jamaica’s most significant rebellion, the 1968 Rodney riots, and his scholarship trained a generation how to think politics at an international scale. In 1980, shortly after founding of the Working People’s Alliance in Guyana, the 38-year-old Rodney would be assassinated. In his magnum opus, How Europe Underdeveloped Africa, Rodney incisively argues that grasping “the great divergence” between the west and the rest can only be explained as the exploitation of the latter by the former. This meticulously researched analysis of the abiding repercussions of European colonialism on the continent of Africa has not only informed decades of scholarship and activism, it remains an indispensable study for grasping global inequality today.</div> <div>Things Fall Apart-China Achebe 2013-04-25 One of the BBC’s ‘100 Novels That Shaped Our World’ A worldwide bestseller and the first part of Achebe’s African Trilogy, Things Fall Apart is the compelling story of one man’s battle to protect his community against the forces of change Okonkwo is the greatest wrestler and warrior alive, and his fame spreads throughout West Africa like a bush-fire in the harmattan. But when he accidentally kills a clansman, things begin to fall apart. Then Okonkwo returns from exile to find missionaries and colonial governors have arrived in the village. With his world thrown radically off-balance he can only hurtle towards tragedy. First published in 1958, Chinua Achebe’s stark, coolly ironic novel reshaped both African and world literature, and has sold over ten million copies in forty-five languages. This arresting parable of a proud but powerless man witnessing the ruin of his people begins Achebe’s landmark trilogy of works chronicling the fate of one African community, continued in Arrow of God and No Longer at Ease. ‘His courage and generosity are made manifest in the work’ Toni Morrison ‘The writer in whose company the prison walls fell down’ Nelson Mandela ‘A great book, that bespeaks a great, brave, kind, human spirit’ John Updike With an Introduction by Biyi Bandele</div> </div>
