the logic of scientific discovery

The Logic of Scientific Discovery is a deserved classic. Rarely has the genius of one man been able to so transform the tradition of scientific interpretation as Popper did. But since Popper has so many contemporary advocates I thought in this review I could suggest some problems or misinterpretations in his thought.

(PDF) Karl Popper: The Logic of Scientific Discovery ...

The Logic of Scientific Discovery is a 1934 book by Karl Popper. Popper rewrote his book in English and republished it in 1959. It

argues that science should adopt a methodology based on falsifiability, because no number of experiments can ever prove a theory, but a single experiment can contradict one.

Popper Logic Scientific Discovery : Karl Poper : Free ...

The first response to the challenge of the context distinction draws on a broad understanding of the term "logic" to argue that we cannot but admit a general, domain-neutral logic if we do not want to assume that the success of science is a miracle (Jantzen 2016) and that a logic of scientific discovery can be developed .

Scientific Discovery (Stanford Encyclopedia of Philosophy)

Described by the philosopher A.J. Ayer as a work of 'great originality and power', this book revolutionized contemporary thinking on science and knowledge. Ideas such as the now legendary doctrine of 'falsificationism' electrified the scientific community, influencing even working scientists, as well as post-war philosophy. This astonishing work ranks alongside The Open Society and Its Enemies ...

The Logic of Scientific Discovery Quotes Showing 1-13 of 13 "For myself, I am interested in science and in philosophy only because I want to learn something about the riddle of the world in which we live, and the riddle of man's knowledge of that world.

The Logic of Scientific Discovery Quotes by Karl Popper

Logics of discovery and justification An ideal theory of scientific method would consist of instructions that could lead an investigator from ignorance to knowledge. Descartes and Bacon sometimes wrote as if they could offer so ideal a theory, but after the mid-20th century the orthodox view was that this is too much to ask for.

Philosophy of science - Discovery, justification, and ...

Summary Prefaces. In the preface to the 1934 edition, Karl Popper points out a major difference between science and philosophy.

Whereas scientists define and solve a problem within a preexisting structure, philosophers are faced with "a heap of ruins" and must determine what their problem is. In the preface to the 1959 edition, Popper takes issue with the notion that philosophical problems are

...

The Logic of Scientific Discovery Plot Summary | Course Hero

I would say that scientific discovery is impossible without desire, a person with a goal to understand or achieve some specific thing, which cannot come from the logic of science itself, but contains it and works with it and through it.
