The First Hundred settlers are being pulled into a fierce new struggle between the Reds, a group devoted to preserving Mars in its desert state, and the Green "terraformers." Flipospace: Jaded Mars, Missions 13-15-John Steiner 2016-06-29 Surpassing the speed of light remained elusive in 2170's. However, the trick was to hold still to swap out spatial locations. For Colonel Sumitra Ramachandra, Major Lamarr Fitch, Captain Malcolm O'Connell and the rest of the ISS Mockingbird's crew jumping between solar systems is just the start of their wondrous, sometimes zany and often perilous missions. The future of aerospace defense stretches far above the blue yonder. Murder of Ravens During Earth-duty, the ISS Mockingbird take part in an airshow, until an unprovoked strategic strike by the Jade Continuum puts Earth defenses on high alert. Colonel Rama and Major Fitch must rally their crew and prepare for a counter-strike raid to Mars to unravel the Continuum's motive and remind them that they're not out of reach. Mustering their assets also means that Colonel Rama must convince their former flight surgeon, Malcolm O'Connell to rejoin the crew. However, he brings his own bad news. Garbage Man A reconnaissance mission to the exo-planet HD 40307G has gone wrong. Two crewmembers are left behind, as the Mockingbird evacuates researchers back to Earth. Captain Diaz is forced to put another of his team into cryotobiosis and hold out until the Mockingbird's return. Trekking 500 kilometers, and evading Jade

Continuum forces, Diaz encounters indigenous intelligent aliens called Leons. Lacking SETI training, Diaz must overcome cultural differences with the Leons, and ensure the return of his team member, whatever the cost. Microcosm Paired off with the ISS Kulshedra, the Mockingbird is dispatched to a second colony established by the Jade Continuum in violation of international treaties. Securing the skies over the exoplanet named Purple Haze becomes suspiciously easy as the Continuum abandoned their colony in haste. Along with a sole surviving member of the Jade Continuum, the SETI Team find an unusual form of intelligent life capable of terraforming the bodies of macro-organisms, even those alien to the planet.

Tensions rise over what to do with a prisoner of war while the alien threat grows.

The Big Book of Mars-Marc Hartzman 2020-07-07 Filled with entertaining history, archival images, pop culture ephemera, and interviews with NASA scientists, The Big Book of Mars is the most comprehensive look at our relationship with Mars—yesterday, today, and tomorrow. Mars has been a source of fascination and speculation ever since the Ancient Sumerians observed its blood-red hue and named it for their god of war and plague. But it wasn't until 1877, when "canals" were observed on the surface of the Red Planet, suggesting the presence of water, that scientists, novelists, filmmakers, and entrepreneurs became obsessed with the question of whether there's life on Mars. In *The War of the Worlds*, H.G. Wells suggested that we wouldn't need to make contact with Martians—they'd come for us—while, many years later, Nikola Tesla claimed that he did make contact. Since then, Mars has fully invaded pop culture. It has its own day of the week (Tuesday, or *martis* in Latin), candy bar, and iconic Looney Tunes character. It has been the subject of novels and movies, from Ray Bradbury's *The Martian Chronicles* to *Mars Attacks!* to *The Martian*. And it has sparked a space-race feud between Elon Musk and Jeff Bezos, who both hope to send a manned mission to Mars in the near future.

Warriors of Mars Collection-Robert Place Napton 2012-10-31 In 1905 Edwin Arnold created a character that many feel changed the course of Science Fiction and that character's name was Lt. Gullivar Jones. Though its reception was lukewarm at the time of its publication, Arnold's tale of Gullivar's journey to Mars and falling in love with a Martian princess is thought by many to have inspired the Martian tales of Edgar Rice Burroughs, written some six years later. Dynamite Entertainment is proud to bring these characters together, telling the epic story of their first meeting! Collecting the five-issue series! The Martian Tales Trilogy-Edgar Rice Burroughs 2004 Combining other worldly, adventures with elements of classical myth and fast-paced plots with cliffhanging tension, Edgar Rice Burroughs' The Martian Tales Trilogy helped define a new literary genre emerging in the early twentieth century: science fiction. In the first installment of The Martian Tales Trilogy, hero John Carter wins the affections of the princess of Mars and the respect of the Martian warlords whom he befriends. The excitement continues in The Gods of Mars, when Carter engages the Black Pirates in airborne combat above the dead seas of Mars and leads a revolt to free the Martian races from a religion that thrives on living sacrifices. In the third book, The Warlord of Mars, Carter overcomes the forces of evil that would destroy the planet.

The Unexplainable Disappearance of Mars Patel-Sheela Chari 2020-10-06 Based on the Peabody Award-winning podcast, this tech-filled adventure series pits intrepid Mars Patel and his outcast friends against a brilliant, enigmatic billionaire as they race to figure out why kids are disappearing from their school. Mars Patel's friend Aurora has disappeared! His teachers are clueless. His mom is stressed out about her jobs. But Mars refuses to give up—after all, his own dad disappeared when Mars was a toddler, before he and Ma moved to Puget Sound from India. Luckily, Mars has a group of loyal friends eager to help—smart Toothpick, strong and stylish JP, and maybe-telepathic Caddie. The clues seem to point toward eccentric tech genius (and Mars's hero) Oliver Pruitt, whose popular podcast now seems to be commenting on their quest! But when the friends investigate Pruitt's mysterious, elite school, nothing is as it seems—and anyone could be deceiving them. Slick science, corporate conspiracies, and an endearingly nerdy protagonist make this first book in the series a fresh, exciting sci-fi adventure.

The Sirens of Mars-Sarah Stewart Johnson 2020-07-07 "Sarah Stewart Johnson interweaves her own coming-of-age story as a planetary scientist with a vivid history of the exploration of Mars in this celebration of human curiosity, passion, and perseverance."—Alan Lightman, author of Einstein's Dreams NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The New York Times Book Review • Times (UK) • Library Journal "Lovely . . . Johnson's prose swirls with lyrical wonder, as varied and multihued as the apricot deserts, butterscotch skies and blue sunsets of Mars."—Anthony Doerr, The New York Times Book Review Mars was once similar to Earth, but today there are no rivers, no lakes, no oceans. Coated in red dust, the terrain is bewilderingly empty. And yet multiple spacecraft are circling Mars, sweeping over Terra Sabaea, Syrtis Major, the dunes of Elysium, and Mare Sirenum—on the brink, perhaps, of a staggering find, one that would inspire humankind as much as any discovery in the history of modern science. In this beautifully observed, deeply personal book, Georgetown scientist Sarah Stewart Johnson tells the story of how she and other researchers have scoured Mars for signs of life, transforming the planet from a distant point of light into a world of its own. Johnson's fascination with Mars began as a child in Kentucky, turning over rocks with her father and looking at planets in the night sky. She now conducts fieldwork in some of Earth's most hostile environments, such as the Dry Valleys of Antarctica and the salt flats of Western Australia, developing methods for detecting life on other worlds. Here, with poetic precision, she interlaces her own personal journey—as a female scientist and a mother—with tales of other seekers, from Percival Lowell, who was convinced that a utopian society existed on Mars, to Audouin Dollfus, who tried to carry out astronomical observations from a stratospheric balloon. In the process, she shows how the story of Mars is also a story about Earth: This other world has been our mirror, our foil, a telltale reflection of our own anxieties and yearnings. Empathetic and evocative, The Sirens of Mars offers an unlikely natural history of a place where no human has ever set foot, while providing a vivid portrait of our quest to defy our isolation in the cosmos.

Warlord of Mars-Edgar Rice Burroughs 2009-10-01 Warlord of Mars is the third novel in Burroughs' Barsoom series. The setting is an inhabited, dying Mars, where the different races fight over dwindling resources. It is a frontier world full of honor, glory and desperation; lost cities and ancient secrets provide the landscape for heroic adventures.
