The three core themes of the book - destination management, environmental and social aspects of ethical sustainable development and business impacts - are discussed across both topic and case study chapters, alongside explanatory editorial analysis with all chapters clearly signposted and interlinked. Management and gender in higher education-Pat O'Connor 2015-11-01 This book is a definitive examination of higher education: locating it in a wider neo-liberal context involving the state and the market, with a specific focus on recent higher policy and on the elite group of senior managers in universities. Written in a clear accessible style, it provides an in-depth analysis of university structures, cultures and practices at senior management level. Despite the managerialist rhetoric of accountability, we see structures where access to power is through the Presidents' 'blessing', very much as in a medieval court. We see a culture that is less than comfortable with the presence of women, and which, in its narratives, stereotypes and interactions exemplifies to a rather nineteenth-century view of women. Sites and sources of change are also identified. In a global context where diversity is crucial to innovation, it challenges us to critically reflect on management and on higher education.

The Invaders-Pat Shipman 2015 Humans domesticated dogs soon after Neanderthals began to disappear. Mobilities, Tourism and Travel Behavior-Leszek Butowski 2018-01-17 The notion of "mobilities," when looked at from a practical point of view, turns out to cover different kinds of human activity. It is not surprising, then, that when approached from an academic perspective, it reveals enormous potential for interdisciplinary research, which has proven extremely attractive to many scholars from different continents, disciplines, and schools of academic inquiry. The scholars in this volume focus on the specific

aspects of mobilities, namely, tourism and travel behavior, but approach them from a plethora of positions. Such a myriad of perspectives is bound to be challenging in methodological terms, but it seems there is a growing agreement as to the worthiness of this interdisciplinary research. By means of combining various approaches, researchers obtain access to a fascinating and increasingly ubiquitous phenomenon of contemporary human mobility.
