Tourist Experience-Richard Sharpley 2010-10-04 To consume tourism is to consume experiences. An understanding of the ways in which tourists experience the places and people they visit is therefore fundamental to the study of the consumption of tourism. Consequently, it is not surprising that attention has long been paid in the tourism literature to particular perspectives on the tourist experience, including demand factors, tourist motivation, typologies of tourists and issues related to authenticity,

commodification, image and perception. However, as tourism has continued to expand in both scale and scope, and as tourists' needs and expectations have become more diverse and complex in response to transformations in the dynamic socio-cultural world of tourism, so too have tourist experiences. Tourist Experience provides a focused analysis into tourist experiences that reflect their ever-increasing diversity and complexity, and their significance and meaning to tourists themselves. Written by leading international scholars, it offers new insights into emergent behaviours, motivations and sought meanings on the part of tourists based on five contemporary themes determined by current research activity in tourism experience: dark tourism experiences, experiencing poor places, sport tourism experiences, writing the tourist experience and researching tourist experiences: methodological approaches. The book critically explores these experiences from multidisciplinary perspectives and includes case studies from a wide range of geographical regions. By analyzing these contemporary tourist experiences, the book will provide further understanding of the consumption of tourism.

Contemporary Tourist Experience-Richard Sharpley 2014-06-23 This significant and timely volume aims to provide a focused analysis into tourist experiences that reflect their ever-increasing diversity and complexity, and their significance and meaning to tourists themselves. Written by leading international scholars, it offers new insight into emergent behaviours, motivations and sought meanings on the part of tourists based on five contemporary themes determined by current research activity in tourism experience: conceptualization of tourist experience; dark tourism experiences; the relationship between motivation and the contemporary tourist experience; the manner in which tourist experience can be influenced and enhanced by place; and how managers and suppliers can make a significant contribution to the tourist experience. The book critically explores these experiences from multidisciplinary perspectives and includes case studies from wide range of geographical regions. By analyzing these contemporary tourist experiences, the book will provide further understanding of the consumption of tourism.

Women and Travel-Catheryn Khoo-Lattimore 2017-03-31 Women and Travel: Historical and Contemporary

Perspectives is a fascinating look at the behavior, motivations, experiences, and needs of women as tourists and travellers, drawing on both historic and contemporary eras. Surprisingly little research has explored key issues, experiences, and opportunities in the context of women's travel. This revealing volume fills this gap, exploring the discourses, debates, and discussions about women, travel, and tourism. With an international roster of contributors from diverse regions of the world, the book celebrates a variety of women's voices. Khoo-Lattimore and Wilson deliberately sought to include nontraditional and non-Western perspectives on women's travel, with inclusions of Asian solo female travelers; Islamic women travellers and the constraints placed on them; and women who cannot travel (or choose, for whatever reason, a 'home holiday'). This enlightening volume brings together scholars from the broad areas of tourism, hospitality, geography, and leisure studies to examine how and why women travel. The chapters bring light to perspectives from different countries, cultures, backgrounds, and religions, and utilize different methods, approaches and styles of presentation. Women and Travel: Historical and Contemporary Perspectives will be of interest to academics and graduate students from a range of disciplines, including tourism, leisure studies, sociology, cultural geography, anthropology, feminist and gender studies, business, economics and management; as well as professionals working in the tourism industry, particularly those with an interest in niche markets and segmentation.

Tourist Experience-Richard Sharpley 2016-10-03 There is a long history of research into why and how individuals participate in and experience tourism, exploring the demand and motivation for tourism and the roles that tourists adopt--that is, how people perform tourism. At the same time, questions surrounding the significance and meaning of tourism as a contemporary social institution have long attracted academic scrutiny. However, as the form and character of the tourist experience has continued to evolve, reflecting both developments in the supply of tourism and cultural transformations in the world in which it occurs, and as new disciplinary perspectives on the subject have been adopted, the research has become ever more extensive and eclectic. Now, Tourist Experience, a new collection of major works

from Routledge, meets a growing need for a comprehensive reference work that embraces both established themes and issues with emergent debates and research. The gathered materials have been carefully selected from a broad range of academic journals, edited collections, and other sources, and are organized around three broad themes: the significance/meaning of tourism in contemporary society; tourist motivation and demand; and tourist roles. With a comprehensive introduction, newly written by the editor, which places the collected material in its historical and intellectual context, *Tourist Experiences* is an essential reference work and vital research resource for scholars, researchers, and students in tourism and related disciplines. ted from a broad range of academic journals, edited collections, and other sources, and are organized around three broad themes: the significance/meaning of tourism in contemporary society; tourist motivation and demand; and tourist roles. The Celebration of Death in Contemporary Culture-Dina Khapaeva 2017-03-06 The Celebration of Death in Contemporary Culture investigates the emergence and meaning of the cult of death. Over the last three decades, Halloween has grown to rival Christmas in its popularity. Dark tourism has emerged as a rapidly expanding industry. “Corpse chic” and “skull style” have entered mainstream fashion, while elements of gothic, horror, torture porn, and slasher movies have streamed into more conventional genres. Monsters have become pop culture heroes: vampires, zombies, and serial killers now appeal broadly to audiences of all ages. This book breaks new ground by viewing these phenomena as aspects of a single movement and documenting its development in contemporary Western culture. This book links the mounting demand for images of violent death with dramatic changes in death-related social rituals. It offers a conceptual framework that connects observations of fictional worlds—including *The Twilight Saga*, *The Vampire*

Diaries, and the Harry Potter series—with real-world sociocultural practices, analyzing the aesthetic, intellectual, and historical underpinnings of the cult of death. It also places the celebration of death in the context of a longstanding critique of humanism and investigates the role played by 20th-century French theory, posthumanism, transhumanism, and the animal rights movement in shaping the current antihumanist atmosphere. This timely, thought-provoking book will appeal to scholars of culture, film, literature, anthropology, and American and Russian studies, as well as general readers seeking to understand a defining phenomenon of our age.

Tourist Experience and Fulfilment-Sebastian Filep 2013-07-31 What makes life worth living? Many people would argue that it is fulfilling experiences. These experiences are characterised by feelings of joy and pleasure, positive relationships and a sense of engagement, meaning and achievement. Tourism is arguably one of the largest self-initiated commercial interventions to promote well being and happiness on the global scale but yet there is absence in the literature on the topic of fulfilling tourist experiences from psychological perspectives. Drawing on insights and theories from the research field of positive psychology (the study of well being), this is the first edited book to evaluate tourist experiences from positive psychology perspectives. The volume addresses the important topic of fulfilment through the lens of the world's largest social global phenomenon tourism. In doing so, the book refreshes and challenges some aspects of tourist behaviour research. The chapters are grouped under three broad sections which reflect a range of positive psychological outcomes that personal holiday experiences can produce, namely; happiness and humour; meaning and self-actualisation and health and restoration. The book critically explores these fulfilling experiences from interdisciplinary perspectives and includes research studies from wide range of geographical regions. By analysing the contemporary fulfilling tourist experiences the book will provide further understanding of tourist behaviour and experience. Written by leading academics this significant volume will appeal to those interested in Tourism and Positive Psychology. Taking Tourism to the Limits-Michelle Aicken 2006-08-11 The concept of margins and limits is often referred to within the tourism academic literature and includes subjects as diverse as carrying capacities, peripheral economies, technological advancement, adventure tourism, dark tourism and socially marginalized communities. After identifying a number of ways in which 'limits' might be defined Taking Tourism to the Limits explores concepts and challenges facing contemporary tourism in five main sections, namely in tourism planning and management, nature based tourism, dark tourism, adventure and sport tourism and the accommodation industry. Drawing upon case studies, current research and conceptualizations these different facets of the 'limits' are each introduced by the editors with

commentaries that seek to identify themes and current practice and thinking in the respective domains. The picture that emerges is of an industry that reinvents itself in response to changing market parameters even while core issues of stakeholder equities and political processes remain problematic. Student Writing-Theresa M. Lillis 2002-01-04 *Student Writing* presents an accessible and thought-provoking study of academic writing practices. Informed by 'composition' research from the US and 'academic literacies studies' from the UK, the book challenges current official discourse on writing as a 'skill'. Lillis argues for an approach which sees student writing as social practice. The book draws extensively on a three-year study with ten non-traditional students in higher education and their experience of academic writing. Using case study material - including literacy history interviews, extended discussions with students about their writing of discipline specific essays, and extracts from essays - Lillis identifies the following as three significant dimensions to academic writing: * Access to higher education and to its language and literacy representational resources * Regulation of meaning making in academic writing * Desire for participation in higher education and for choices over ways of meaning in academic writing. *Student Writing: access, regulation, desire* raises questions about why academics write as they do, who benefits from such writing, which meanings are valued and how, on what terms 'outsiders' get to be 'insiders' and at what costs.

Identity and the Museum Visitor Experience-John H Falk 2016-06-16 *Understanding the visitor experience* provides essential insights into how museums can affect people's lives. Personal drives, group identity, decision-making and meaning-making strategies, memory, and leisure preferences, all enter into the visitor experience, which extends far beyond the walls of the institution both in time and space. Drawing

upon a career in studying museum visitors, renowned researcher John Falk attempts to create a predictive model of visitor experience, one that can help museum professionals better meet those visitors' needs. He identifies five key types of visitors who attend museums and then defines the internal processes that drive them there over and over again. Through an understanding of how museums shape and reflect their personal and group identity, Falk is able to show not only how museums can increase their attendance and revenue, but also their meaningfulness to their constituents.

The Oxford Handbook of Identity Development-Kate C. McLean 2014-12-01 Identity is defined in many different ways in various disciplines in the social sciences and sub-disciplines within psychology. The developmental psychological approach to identity is characterized by a focus on developing a sense of the self that is temporally continuous and unified across the different life spaces that individuals inhabit. Erikson proposed that the task of adolescence and young adulthood was to define the self by answering the question: Who Am I? There have been many advances in theory and research on identity development since Erikson's writing over fifty years ago, and the time has come to consolidate our knowledge and set an agenda for future research. The Oxford Handbook of Identity Development represents a turning point in the field of identity development research. Various, and disparate, groups of researchers are brought together to debate, extend, and apply Erikson's theory to contemporary problems and empirical issues. The result is a comprehensive and state-of-the-art examination of identity development that pushes the field in provocative new directions. Scholars of identity development, adolescent and adult development, and related fields, as well as graduate students, advanced undergraduates, and practitioners will find this to be an innovative, unique, and exciting look at identity development.

Ramón María Del Valle-Inclán-Carol Maier 1994 "This book is a collection of eleven essays devoted to the work of Ramon del Valle-Inclan (1866-1936). Long the recipient of critical analyses from various perspectives, Valle-Inclan's writing has nevertheless been virtually neglected in the gender-based criticism that has given rise to important studies of his contemporaries in other European literatures. This means that his diverse female characters have not been fully examined, that many scholars continue to consider him an unqualified misogynist, and that a marked effort to surmount gender constraints, present throughout his work, has not been acknowledged, much less explicated. This lack of study is intimately related to a much broader lacuna in Hispanic literature and scholarship, for the working of gender norms and their interaction with economic, religious, and political institutions inscribed in the literature of turn-of-the-century Spain have only recently begun to receive detailed study." "The essays in this volume identify, explore, and interrogate issues of gender with respect to Valle-Inclan's writing. The results offer an altered portrait of Valle-Inclan in which attitudes attributed to him are questioned and reevaluated. In particular, studies of several strong female characters indicate that he envisioned a far more complex role for women than has formerly been recognized." "Three previously published essays were chosen to

provide a grounding in work on gender and Valle-Inclan. The remaining essays were written for this volume. As an orientation for the reader and in order to assure that the collection will be of use and interest to non-Hispanists as well as specialized readers, an introduction to the collection defines the intentions of the editors, discusses the essays with respect to current criticism, and places Valle-Inclan and his writing in turn-of-the-century Spanish history and aesthetics. As a whole, the collection reads as far more than the sum of its individual essays, prompting a fuller appreciation of both Valle-Inclan and the social and cultural system to which he belongs."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. Cattle Bring Us to Our Enemies-J. Terrence McCabe 2010-02-11 An in-depth look at the ecology, history, and politics of land use among the Turkana pastoral people in Northern Kenya Based on sixteen years of fieldwork among the pastoral Turkana people, McCabe examines how individuals use the land and make decisions about mobility, livestock, and the use of natural resources in an environment characterized by aridity, unpredictability, insecurity, and violence. The Turkana are one of the world's most mobile peoples, but understanding why and how they move is a complex task influenced by politics, violence, historical relations among ethnic groups, and the government, as well as by the arid land they call home. As one of the original members of the South Turkana Ecosystem Project, McCabe draws on a wealth of ecological data in his analysis. His long-standing relationship with four Turkana families personalize his insights and conclusions, inviting readers into the lives of these individuals, their families, and the way they cope with their environment and political events in daily life. J. Terrence McCabe is Associate Professor of Anthropology, University of Colorado at Boulder.

Tourism, Sanctions and Boycotts-Siamak Seyfi 2019-11-20 This is the first book to provide a comprehensive account of sanctions and boycotts in tourism and the economic and ethical complexities that policy makers, tourists, tourism destinations, and businesses face. Sanctions and boycotts are an important feature of the global tourism system and the emerging ethics of tourism. Sanctions and embargoes are increasingly used as coercive instruments of diplomacy and foreign policy by the United Nations, supranational organizations, the US, and other nations to change the actions and behaviors of countries, organizations, businesses, and individuals. At the same time, boycotts and buycotts are a growing feature of political consumerism and interest group activism. Tourism and hospitality destinations, attractions, and businesses can be profoundly affected by this, with the legacy of a negative image lasting for decades. International travel to some destinations may be severely restricted, financial investment and supply chains disrupted, and, in the most comprehensive sanctions and boycotts,

substantial economic and personal hardship may be experienced. This book is of interest not only to policy makers, destination management and marketing organizations, and students of crisis and politics in tourism and hospitality but also those who seek to address the interrelationships between sanctions, tourism destinations and attractions, and the tourists who boycott them.

Male Roles, Masculinities and Violence-Expert Group Meeting on Male Roles and M 2000 This book is based on an expert group meeting entitled 'Male Roles and Masculinities in the Perspective of a Culture of Peace', which was organised by UNESCO in Oslo, Norway in 1997, the first international discussion of the connections between men and masculinity and peace and war. The group consisted of researchers, activists, policy makers and administrators and the aim of the meeting was to formulate practical suggestions for change. Chapters in the book consist of both regional case studies and social science research on the connections of traditional masculinity and patriarchy to violence and peace building. The Culture of Peace initiatives in this book show how violence is ineffective, and the book contests the views in the socialisation of boy-children that aggressiveness, violence and force are an acceptable means of expression.

Globalization, Biosecurity, and the Future of the Life Sciences-National Research Council 2006-06-07 Biomedical advances have made it possible to identify and manipulate features of living organisms in useful ways--leading to improvements in public health, agriculture, and other areas. The globalization of

scientific and technical expertise also means that many scientists and other individuals around the world are generating breakthroughs in the life sciences and related technologies. The risks posed by bioterrorism and the proliferation of biological weapons capabilities have increased concern about how the rapid advances in genetic engineering and biotechnology could enable the production of biological weapons with unique and unpredictable characteristics. Globalization, Biosecurity, and the Future of Life Sciences examines current trends and future objectives of research in public health, life sciences, and biomedical science that contain applications relevant to developments in biological weapons 5 to 10 years into the future and ways to anticipate, identify, and mitigate these dangers.

Families Caring for an Aging America-National Academies of Sciences, Engineering, and Medicine 2016-11-08 Family caregiving affects millions of Americans every day, in all walks of life. At least 17.7 million individuals in the United States are caregivers of an older adult with a health or functional limitation. The nation's family caregivers provide the lion's share of long-term care for our older adult population. They are also central to older adults' access to and receipt of health care and community-based social services. Yet the need to recognize and support caregivers is among the least appreciated challenges facing the aging U.S. population. Families Caring for an Aging America examines the prevalence and nature of family caregiving of older adults and the available evidence on the effectiveness of programs, supports, and other interventions designed to support family caregivers. This report also

assesses and recommends policies to address the needs of family caregivers and to minimize the barriers that they encounter in trying to meet the needs of older adults.

Managing the Risks of Extreme Events and Disasters to Advance Climate Change Adaptation-Christopher B. Field 2012-05-28 This Intergovernmental Panel on Climate Change Special Report (IPCC-SREX) explores the challenge of understanding and managing the risks of climate extremes to advance climate change adaptation. Extreme weather and climate events, interacting with exposed and vulnerable human and natural systems, can lead to disasters. Changes in the frequency and severity of the physical events affect disaster risk, but so do the spatially diverse and temporally dynamic patterns of exposure and vulnerability. Some types of extreme weather and climate events have increased in frequency or magnitude, but populations and assets at risk have also increased, with consequences for disaster risk. Opportunities for managing risks of weather- and climate-related disasters exist or can be developed at any scale, local to international. Prepared following strict IPCC procedures, SREX is an invaluable

assessment for anyone interested in climate extremes, environmental disasters and adaptation to climate change, including policymakers, the private sector and academic researchers.
