Finding Mr. Righteous-Lisa De Pasquale 2014-02-24 Lisa was a public relations director and event planner in D.C. A Christian-in-name-only, Lisa dated freely in spite of her insecurities. An Atheist. A Catholic. A Quaker. A Preacher. A Jew. Some gave her the answers she yearned for, while others left her with more questions. As Lisa's star rose in the political movement, her quest to find her Mr. Righteous led her down a path of religious confusion and discovery. Lisa navigates her journey with humor and humility. Will she find her soul mate or save her soul? Is it too much to ask for both? "Lisa De Pasquale is one of the best conservative writers out there, but this book isn't about politics. It's a fascinating and extremely personal account of her dating life, her massive insecurities and her mostly ineffective search for God - until one man accidentally reveals the truth to her. I won't tell you how, or I'd ruin the ending. This is a true Christian story, disguised as racy 'Chick Lit.'" - Ann Coulter, New York Times Bestselling Author and Columnist "With an entirely fresh perspective and a voice that's humorous, hopeful, and, at times, absolutely heartbreaking, Lisa De Pasquale's quest to find Him is a must-read. I loved Finding Mr. Righteous, agonizing over the rough patches along with De Pasquale and cheering her on throughout, and I can't recommend this book highly enough!" - Jen Lancaster, New York Times Bestselling Author of the Tao of Martha and Here I Go Again "Finding Mr. Righteous is a true page-turner that will touch many lives. That's because it's a very sharply told, sometimes hilarious, sometimes sordid, but always bravely honest account of one woman's search -- in all the wrong places -- for connection, meaning, peace, and true love. By refusing to sugar-coat the sorrows and humiliations of her wanderings, her journey's end is all the more wonderful, powerful, moving, and sweet." - Eric Metaxas, New York Times Bestselling author of Bonhoeffer: Pastor, Martyr, Prophet, Spy

Wingfield College and Its Patrons-Peter Bloore 2015 The 650th anniversary of the foundation of Wingfield College was the occasion for a special two-day symposium marking the culmination of a three-year UEA-funded research project into the college and castle. The building projects of the late medieval aristocracy focused on their homes and the monasteries, churches or chantry foundations under their patronage where their family were buried and commemorated. This commemoration allowed a visual celebration of their achievements, status and lineage, the scale and prestige of which reflected on the fortunes of the family as a whole. Wingfield is explored in the context of both the actual building of the castle, chantry chapel and the college, and that of the symbolic function of these as a demonstration of aristocratic status. The contributions to this book examine many topics which have hitherto been neglected, such as the archaeology of the castle, which had never been excavated, the complex history of the college's architecture, and the detailed study of the monuments in the church. The latest techniques are used to reconstruct the college and castle, with a DVD to demonstrate these. And the context of the family and its fortunes are explored in chapters on the place of the de la Poles in fifteenth century history, as soldiers, administrators and potential claimants to the throne.

Education Nation-Milton Chen 2012-01-24 "In Education Nation author Milton Chen draws from extensive experience in media--from his work on Sesame Street in its nascent years to his current role as executive director of the George Lucas Educational Foundation--to support his vision for a new world of learning.

Presented in five parts and divided into "module" chapters, this book examines the ways in which K-12 learning can be revolutionized through innovative reform and the use of technology. Due in large part to new technologies, over the last few decades we've witnessed a huge shift in how we imagine teaching and learning. A good example is the educational revolution sparked by Sesame Street--which in its first season had a goal of teaching preschool-age children the numbers 1 to 10. At the time, experts dismissed it as an unrealistic goal since many kindergarten students were having trouble mastering this simple counting. Yet the research proved that preschool-age children learned those skills and many others directly from the TV screen. Now Sesame Street's curriculum teaches the numbers from 1 to 40. In today's digital age the number of new ways to teach and learn is ever-expanding and includes: television, Google, YouTube, TeacherTube, Facebook, iPhones, video games, GPS devices, open source textbooks, interactive whiteboards; and there are countless examples of ways technology positively impacts student learning--from voice-recognition software that helps children learn to read to translation tools that help teachers communicate with non-English speaking parents. As a result of constant innovation, learning is no longer limited by traditional confines and we're quickly moving beyond students tied to their chairs, desks, and textbooks--and teachers locked away in classrooms."--

Long Way Round-Ewan McGregor 2013-04-11 'A highly readable and spiritually uplifting book about a dream come true' Wanderlust 'Touching and memorable ... one for armchair travellers and bike freaks' Daily Mail From London to New York, Ewan and Charley chased their shadows through Europe, the Ukraine, Kazakhstan, Mongolia and Russia, across the Pacific to Alaska, then down through Canada and America. But as the miles slipped beneath the tyres of their big BMWs, their troubles started. Exhaustion, injury and accidents tested their strength. Treacherous roads, unpredictable weather and turbulent politics challenged their stamina. They were chased by paparazzi in Kazakhstan, courted by men with very large guns in the Ukraine, hassled by the police, and given bulls' testicles for supper by Mongolian nomads. And yet despite all these obstacles they managed to ride more than twenty thousand miles in four months, changing their lives forever in the process. As they travelled they documented their trip, taking photographs, and writing diaries by the campfire. Long Way Round is the result of their adventures - a fascinating, frank and highly entertaining travel book about two friends riding round the world together and, against all the odds, realising their dream.

First Overland-Tim Slessor 2016-03-07 Why Not? After all, no-one had ever done it before. It would be one of the longest of all overland journeys - half way round the world, from the English Channel to Singapore. They knew that several expeditions had already tried it. Some had got as far as the deserts of Persia; a few had even reached the plains of India. But no one had managed to go on from there: over the jungle clad mountains of Assam and across northern Burma to Thailand and Malaya. Over the last 3,000 miles it seemed there were 'just too many rivers and too few roads'. But no-one really knew ... In fact, their problems began much earlier than that. As mere undergraduates, they had no money, no cars, nothing. But with a cool audacity, which was to become characteristic, they set to work - wheedling and cajoling. First, they coaxed the BBC to come up with some film for a possible TV series. They then gently persuaded the manufacturers to lend them two factory-fresh Land Rovers. A publisher was even sweet-talked into giving them an advance on a book. By the time they were ready to go, their sponsors (more than 80 of them) ranged from whiskey distillers to the makers of collapsible buckets. In late 1955, they set off. Seven months and 12,000 miles later, two very weary Land Rovers, escorted by police outriders, rolled into Singapore - to flash bulbs and champagne. Now, fifty years on, their book, 'First Overland', is republished - with a foreword by Sir David Attenborough. After all, it was he who gave them that film.
