Essential Questions-Jay McTighe 2013-03-27 What are "essential questions," and how do they differ from other kinds of questions? What's so great about them? Why should you design and use essential questions in your classroom? Essential questions (EQs) help target standards as you organize curriculum content into coherent units that yield focused and thoughtful learning. In the classroom, EQs are used to stimulate students' discussions and promote a deeper understanding of the content. Whether you are an Understanding by Design (UbD) devotee or are searching for ways to address standards—local or Common Core State Standards—in an engaging way, Jay McTighe and Grant Wiggins provide practical guidance on how to design, initiate, and embed inquiry-based teaching and learning in your classroom. Offering dozens of examples, the authors explore the usefulness of EQs in all K-12 content areas, including skill-based areas such as math, PE, language instruction, and arts education. As an important element of their backward design approach to designing curriculum, instruction, and assessment, the authors \*Give a comprehensive explanation of why EQs are so important; \*Explore seven defining characteristics of EQs; \*Distinguish between topical and overarching questions and their uses; \*Outline the rationale for using EQs as the focal point in creating units of study; and \*Show how to create effective EQs, working from sources including standards, desired understandings, and student misconceptions. Using essential questions can be challenging—for both teachers and students—and this book provides guidance through practical and proven processes, as well as suggested "response strategies" to encourage student engagement. Finally, you will learn how to create a culture of inquiry so that all members of the educational community—students, teachers, and administrators—benefit from the increased rigor and deepened understanding that emerge when essential questions become a guiding force for learners of all ages.

How to Think Like Shakespeare-Scott Newstok 2020-04-21 "This book offers a short, spirited defense of rhetoric and the liberal arts as catalysts for precision, invention, and empathy in today's world. The author, a professor of Shakespeare studies at a liberal arts college and a parent of school-age children, argues that high-stakes testing and a culture of assessment have altered how and what students are taught, as courses across the arts, humanities, and sciences increasingly are set aside to make room for joyless, mechanical reading and math instruction. Students have been robbed of a complete education, their imaginations stunted by this myopic focus on bare literacy and numeracy. Education is about thinking, Newstok argues, rather than the mastery of a set of rigidly defined skills, and the seemingly rigid pedagogy of the English Renaissance produced some of the most compelling and influential examples of liberated thinking. Each of the fourteen chapters explores an essential element of Shakespeare's world and work, aligns it with the ideas of other thinkers and writers in modern times, and suggests opportunities for further reading. Chapters on craft, technology, attention, freedom, and related topics combine past and present ideas about education to build a case for the value of the past, the pleasure of thinking, and the limitations of modern educational practices and prejudices"--

Evaluation of the Department of Veterans Affairs Mental Health Services-National Academies of Sciences, Engineering, and Medicine 2018-03-29

Approximately 4 million U.S. service members took part in the wars in Afghanistan and Iraq. Shortly after troops started returning from their deployments, some active-duty service members and veterans began experiencing mental health problems. Given the stressors associated with war, it is not surprising that some service members developed such mental health conditions as posttraumatic stress disorder, depression, and substance use disorder. Subsequent epidemiologic studies conducted on military and veteran populations that served in the operations in Afghanistan and Iraq provided scientific evidence that those who fought were in fact being diagnosed with mental illnesses and experiencing mental health-related outcomes in particular, suicide at a higher rate than the general population. This report provides a comprehensive assessment of the quality, capacity, and access to mental health care services for veterans who served in the Armed Forces in Operation Enduring Freedom/Operation Iraqi Freedom/Operation New Dawn. It includes an analysis of not only the quality and capacity of mental health care services within the Department of Veterans Affairs, but also barriers faced by patients in utilizing those services.

The Color of Water-James McBride 2012-03-01 As a boy in Brooklyn's Red Hook projects, James McBride knew his mother was different. But when he asked about it, she'd simply say 'I'm light-skinned.' Later he wondered if he was different too, and asked his mother if he was black or white. 'You're a human being,' she snapped. 'Educate yourself or you'll be a nobody!' And when James asked what colour God was, she said 'God is the colour of water.' As an adult, McBride finally persuaded his mother to tell her story - the story of a rabbi's daughter, born in Poland and raised in the South, who fled to Harlem, married a black man, founded a Baptist church, and put twelve children through college.

Communities in Action-National Academies of Sciences, Engineering, and Medicine 2017-04-27 In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

How Will You Measure Your Life? (Harvard Business Review Classics)-Clayton M. Christensen 2017-01-17 In the spring of 2010, Harvard Business School's graduating class asked HBS professor Clay Christensen to address them—but not on how to apply his principles and thinking to their post-HBS careers. The students wanted to know how to apply his wisdom to their personal lives. He shared with them a set of guidelines that have helped him find meaning in his own life, which led to this now-classic article. Although Christensen's thinking is rooted in his deep religious faith, these are strategies anyone can use. Since 1922, Harvard Business Review has been a leading source of breakthrough ideas in management practice. The Harvard Business Review Classics series now offers you the opportunity to make these seminal pieces a part of your permanent management library. Each highly readable volume contains a groundbreaking idea that continues to shape best practices and inspire countless managers around the world.

Teaching the Critical Vocabulary of the Common Core-Marilee Sprenger 2013 Your students may recognize words like determine, analyze, and distinguish, but do they understand these words well enough to quickly and completely answer a standardized test question? For example, can they respond to a question that says "determine the point of view of John Adams in his Letter on Thomas Jefferson" and analyze how he distinguishes his position from an alternative approach articulated by Thomas Jefferson"? Students from kindergarten to 12th grade can learn to compare and contrast, to describe and explain, if they are taught these words explicitly. Marilee Sprenger has curated a list of the critical words students must know to be successful with the Common Core State Standards and any other standardized assessment they encounter. Fun strategies such as jingles, movements, and graphic organizers will engage students and make learning these critical words enjoyable and effective. Learning the critical vocabulary will help your students with testing and college and career readiness, and will equip them with confidence in reading, writing, and speaking. Marilee Sprenger is also the author of How to Teach So Students Remember, Learning and Memory, and Brain-Based Teaching in the Digital Age.
