Handbook of Research on the Education of Young Children-Bernard Spodek 2014-01-27 The Handbook of Research on the Education of Young Children, Second Edition is an essential reference on research in early childhood education not only in the United States but throughout the world. It provides a comprehensive overview of important contemporary issues and the information necessary to make judgments about these issues. The field has changed significantly since the publication of the first edition of this Handbook in 1993, creating a need for an update. The Handbook of Research on the Education of Young Children, Second Edition is thus focused on research conducted over the past decade or so. The volume is organized in four parts: \*Early Childhood Education and Child Development. New in this edition: moral development; the development of creativity. \*Early Childhood Educational Curriculum. New in this edition: movement or dance education; the education of linguistically and culturally diverse children. \*Foundations of Early Childhood Educational Policy. New in this edition: childhood poverty; the education of bilingual children. \*Research and Evaluation Strategies for Early Childhood Education. New in this edition: doing historical research in early childhood education; postmodern and feminist orientations. The Handbook of Research on the Education of Young Children, Second Edition makes the expanding knowledge base related to early childhood education readily available and accessible. It is a valuable tool for all who work and study in the field.

A valuable tool for all those who work and study in the field of early childhood education, this volume addresses critical, cutting edge research on child development, curriculum, policy, and research and evaluation strategies. With a multitude of new and updated chapters, The Handbook of Research on the Education of Young Children, 3rd Edition makes the expanding knowledge base related to early childhood education readily available and accessible.

Ahmedabad- 2011 In the 20th century, Ahmedabad was India's "shock city." It was the place where many of the nation's most important developments occurred first and with the greatest intensity -- from Gandhi's political and labor organizing, through the growth of textile, chemical, and pharmaceutical industries, to globalization and the sectarian violence that marked the turn of the new century. Events that happened there resonated throughout the country, for better and for worse. Howard Spodek describes the movements that swept the city, telling their story through the careers of the men and women who led them.

Ahmedabad-Howard Spodek 2011 Presents a collection of James Whitcomb Riley's poems, including "Old Aunt Mary's," "Little Orphant Annie," and "The Raggedy Man."

Industrialization and Urbanization-Theodore K. Rabb 2014-07-14 Focusing on urban development and the influence of urbanization on industrialization, this volume reflects a radical rethinking of the traditional approaches to the development of cities. Originally published in 1981. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Seth Godin, author of Poke the Box Likeable Social Media cuts through the marketing jargon and technical detail to give you what you really need to make sense of this rapidly changing world of digital marketing and communications. Being human — being likeable — will get you far. Scott Monty, Global Digital Communications, Ford Motor Company Dave gives you what you need: Practical, specific how-to advice to get people talking about you. Andy Sernovitz, author of Word of Mouth Marketing: How Smart Companies Get People Talking

Initiative-Joshua Spodek 2019-05-21 In Initiative, Spodek presents a practice-based method, not ideas or abstract principles but a sequence of concrete exercises that will lead you to discover and develop passions and take initiative—even if you don't yet know what you want to take initiative on.

Origins of the Vedic Religion-Sanjay Sonawani 2015-04-16 Whether Vedic people were indigenous habitants or emigrants is a hotly debated current issue. Both sides involved in the debate have been vehemently using the available evidences, with twists - caused at times due to sheer neglect and at times even fraudulently - to bring home their point of view, somehow. Nevertheless, what is the truth? Were there ever any migrations of so-called PIE language speakers, located at some hypothetical and yet uncertain homeland, to spread the language and culture? Are migrations necessary from any hypothetical homeland to result into a net of the languages? What was the geography of Rig Veda? Was the Avesta contemporaneous to the Rig Veda? Did any relation ever exist between the Vedic people and the Indus-Ghaggar civilisation? Is there any relationship between the Vedic religion and the modern Hindu religion? While answering to these vital questions, this book postulates a theory on the issue of the so-called IE languages and origins of the Vedic as well as the Zoroastrian religions. It diligently explains how the religious and cultural ethos of the Indus-Ghaggar Civilisation has flowed to us uninterrupted and exposes the schemes of the Vedicist scholars, who are attempting to claim its authorship!

Days That Changed the World-Hywel Williams 2014-08-12 The currents of History run deep and often unseen beneath the everyday ripple of events. But now and again the current rises to the surface, and the events of a single day shed an exceptional light on the meaning of the past. Such events are the subject of Days that Changed the World. Some of the 50 days described here mark the end of an era; others the start of something new. Many are the dates of bloody battles or murders; others of momentous decisions or breathtaking discoveries. All are remembered as powerful symbols of their time. Our story begins almost 2500 years ago on 28 September 480 before the Christian Era, when the Athenian navy destroyed the Persian invasion fleet in the Bay of Salamis. Had the Persians won we might never have heard the names of Plato, Aristotle or Alexander, nor recognize the word democracy. Charting 50 such defining moments, concluding with 11 September 2001 and the destruction of New York's Twin Towers, Days that Changed the World is a unique and fascinating way to portray the story of world history. These 50 history-making days include:

The Battle of the Salamis; The Assassination of Julius Caesar; The Crucifixion of Jesus Christ; The Dedication of Constantinople; The Death of Muhammad; The Coronation of Charlemagne; The Death of Genghis Khan; The Fall of Constantinople; The Defeat of the Spanish Armada; The Defenestration of Prague; The Fall of the Bastille; The Battle of Waterloo; Parliament Passing the Emancipation Act; The Battle of Sedan; The Boxer Rebellion; The First Day of the Somme; The Japanese Attack on Pearl Harbor; The Bombing of Hiroshima; Martin Luther King's 'I have a Dream'; The Breaching of the Berlin Wall; Nelson Mandela's Release from Prison; Nine Eleven.

We Have Everything Before Us-Esther Yin-Ling Spodek 2020-04 A summer party and a thunderstorm bring relationships into focus, as three women must decide how to move forward in this humorous and dramatic tale of intersecting lives. Eleanor is bored with her two sons and a husband who ignores her when she reconnects with Phil, a man she knew in high school. Phil's wife is leaving him because of his philandering, most recently with the younger Sarayu. Eleanor's friend Kaye doesn't approve of Phil, but she has her own problems: too much drinking and a fraught relationship with her husband and daughter, who are building a boat together. Poignant and acutely observed, We Have Everything Before Us is unsparing yet sympathetic as it details the unsettling junction of illusions and reality.

100 Great Events that Changed the World-Terry O'Brien 2016-07-06 100 Events that Changed the World unveils human triumph and the history behind it. The book looks at the various inventions and catastrophes, wars and treaties, momentous discoveries and cultural landmarks that altered the way we live today. All these events are remembered as powerful symbols of their times and still reverberate around the world. Beginning with the assassination of Julius Caesar on 15 March 44 BC, the book presents every historical (and contemporary) incident of note, such as the fall of Constantinople on 29 May 1453 and the partition of India on 15 August 1947, all the way to the destruction of New York's twin towers on 11 September 2001 and the Paris attacks on 13 November 2015, for today's news is tomorrow's history. A gripping way of unfolding the prolific events of world history through exciting, fascinating and thought-provoking milestones that changed the world with an absorbing account of the last 1000 years 100 Events that Changed the World is a one-of-a-kind chronicle of world history

Señor Pepino Series, La casa embrujada-McGraw-Hill Education 1988-01-01 La casa embrujada (Arturo de Rosa) is one of three readers in the Señor Pepino Series. This high-interest reader presents cultural information and extends students vocabulary in a highly entertaining way. The World's History: Prehistory to 1500-Howard Spodek 2005-01-01 : A true exploration of world history, this book links chronology, themes, and geography in eight units, or parts of study, each emphasizes a single themeorigins, cities, empires, religion, trade, migrations, revolutions, and technology. : As in the first two editions, this book focuses throughout on three major questionsWhat do we know? How do we know it? What difference does it make?but the organization has changed, giving each feature a clearer place. Rich in primary sourcesboth written and visualand in data and interpretation, it addresses how historians form, debate, and revise our historical understanding of the world, shows the value of other disciplines in understanding history, and helps readers begin to assess their own place in the ongoing history of the world. MARKET: A great resource for the professional historian.

Transforming the Workforce for Children Birth Through Age 8-National Research Council 2015-07-23 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

Maps of Time-David Christian 2011-09 Presents a new perspective for looking at history from the origins of the universe to present day.

Parenting Matters-National Academies of Sciences, Engineering, and Medicine 2016-11-21 Decades of research have demonstrated that the parent-child dyad and the environment of the familyâ€”which includes all primary caregiversâ€”are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

The Rise of the West-William H. McNeill 2009-07-30 The Rise of the West, winner of the National Book Award for history in 1964, is famous for its ambitious scope and intellectual rigor. In it, McNeill challenges the Spengler-Toynbee view that a number of separate civilizations pursued essentially independent careers, and argues instead that human cultures interacted at every stage of their history. The author suggests that from the Neolithic beginnings of grain agriculture to the present major social changes in all parts of the world were triggered by new or newly important foreign stimuli, and he presents a persuasive narrative of world history to support this claim. In a retrospective essay titled "The Rise of the West after Twenty-five Years," McNeill shows how his book was shaped by the time and place in which it was written (1954-63). He discusses how historiography subsequently developed and suggests how his portrait of the world's past in The Rise of the West should be revised to reflect these changes. "This is not only the most learned and the most intelligent, it is also the most stimulating and fascinating book that has ever set out to recount and explain the whole history of mankind. . . . To read it is a great experience. It leaves echoes to reverberate, and seeds to germinate in the mind."—H. R. Trevor-Roper, New York Times Book Review

The War on the EPA-William M. Alley 2020-02-08 As the U.S. Environmental Protection Agency (EPA) nears the half century mark, the public is largely apathetic towards the need for environmental protections. Today's problems are largely invisible, and to many people's eyes, the environment looks like it's doing just fine. The crippling smog and burning rivers of yesteryear are just a memory. In addition, Americans are repeatedly told that the EPA is hurting the economy, destroying jobs, and intruding into people's private lives. The truth is far more complicated. The War on the EPA: America's Endangered Environmental Protections examines the daunting hurdles facing the EPA in its critical roles in drinking water, air and water pollution, climate change, and toxic chemicals. This book takes the reader on a journey into some of today's most pressing environmental problems: toxic "forever chemicals" known as PFAS, pervasive agricultural pollution, dead zones in the Gulf of Mexico, and widespread air and water pollution from use of fossil fuels. Delving into the science, politics, and human dimension of these and other problems, the book illustrates the challenges of regulation, how today's war on science is undermining the scientific foundation upon which the agency's legitimacy rests, and why a strong U.S. Environmental Protection Agency is more important than ever before. The Blue Planet: An Introduction to Earth System Science, 3rd Edition-Brian J. Skinner 2010-12-13 The Blue Planet: An Introduction to Earth System Sciences, 3rd Edition is an innovative text for the earth systems science course. It treats earth science from a systems perspective, now showing the five spheres and how they are interrelated. There are many photos and figures in the text to develop a strong understanding of the material presented. This along with the new media for instructors makes this a strong text for any earth systems science course.

Handbook on Teaching Social Issues-Ronald W. Evans 2007 This handbook explores the issues-centered curriculum for social studies teaching and how student performance reflects an intellectual capacity to address public issues. The book is divided into 11 parts with essays to address specific aspects of the approach. The foreword, written by Shirley Engle, establishes a context for issues-based curriculum. Essays include: "Defining Issues-Centered Education"

(Ronald W. Evans; Fred M. Newmann; David Warren Saxe); "Building a Rationale for Issues-Centered Education" (Anna S. Ochoa-Becker); "The Engle-Ochoa Decision Making Model for Citizenship Education" (Rodney F. Allen); "Using Issues in the Teaching of American History" (David Warren Saxe); "World History and Issues-Centered Instruction" (Richard E. Gross); "Issues-Centered Approaches to Teaching Geography Courses" (A. David Hill; Salvatore J. Natoli); "Issues-Centered Global Education" (Merry M. Merryfield; Connie S. White); "An Approach to Issues-Oriented Economic Education" (Beverly J. Armento; Francis W. Rushing; Wayne A. Cook); "Teaching Issues-Centered Anthropology, Sociology, and Psychology" (Jerry A. Ligon; George W. Chilcoat); "Issue-Centered Curricula and Instruction at the Middle Level" (Samuel Totten; Jon Pedersen); "An Issues-Centered Curriculum for High School Social Studies" (Ronald W. Evans; Jerry Brodkey); "Assessing Student Learning of an Issue-Oriented Curriculum" (Walter C. Parker); "International Social Studies: Alternative Futures" (James L. Barth); "International Relations/Foreign Policy Teaching Resources" (Mary E. Soley); "Domestic Economic Policy" (Ronald A. Banaszak); "Teaching about International Human Rights" (Nancy Flowers); and "Children's Rights" (Beverly C. Edmonds). An afterword is provided by James Shaver. (EH) Eager to Learn-National Research Council 2001-01-22 Clearly babies come into the world remarkably receptive to its wonders. Their alertness to sights, sounds, and even abstract concepts makes them inquisitive explorers--and learners--every waking minute. Well before formal schooling begins, children's early experiences lay the foundations for their later social behavior, emotional regulation, and literacy. Yet, for a variety of reasons, far too little attention is given to the quality of these crucial years. Outmoded theories, outdated facts, and undersized budgets all play a part in the uneven quality of early childhood programs throughout our country. What will it take to provide better early education and care for our children between the ages of two and five? Eager to Learn explores this crucial question, synthesizing the newest research findings on how young children learn and the impact of early learning. Key discoveries in how young children learn are reviewed in language accessible to parents as well as educators: findings about the interplay of biology and environment, variations in learning among individuals and children from different social and economic groups, and the importance of health, safety, nutrition and interpersonal warmth to early learning. Perhaps most significant, the book documents how very early in life learning really begins. Valuable conclusions and recommendations are presented in the areas of the teacher-child relationship, the organization and content of curriculum, meeting the needs of those children most at risk of school failure, teacher preparation, assessment of teaching and learning, and more. The book discusses: Evidence for competing theories, models, and approaches in the field and a hard look at some day-to-day practices and activities generally used in preschool. The role of the teacher, the importance of peer interactions, and other relationships in the child's life. Learning needs of minority children, children with disabilities, and other special groups. Approaches to assessing young children's learning for the purposes of policy decisions, diagnosis of educational difficulties, and instructional planning. Preparation and continuing development of teachers. Eager to Learn presents a comprehensive, coherent picture of early childhood learning, along with a clear path toward improving this important stage of life for all children.

The Declaration of the Rights of Women-Olympe de Gouges 2018-03-08 Olympe de Gouges was the most important fighter for women's rights you've never heard of. An activist and writer in revolutionary Paris, she published 'The Declaration of the Rights of Women' in 1791, and was beheaded two years later, her articulate demands for equality proving too much for their time. Over one hundred and fifty years later, the key statements of her declaration were internationally endorsed by the United Nations in its Declaration on the Elimination of Discrimination Against Women, which in turn went on to be legally recognized by nearly every country in the world. This volume presents both of these key texts along with enlightening and inspiring commentary from a host of powerful women, from Virginia Woolf to Hillary Clinton.

To Banish Darkness-Ruth Messinger 2018-11-23 Channukah, the eight-day Jewish Festival of Lights, celebrates the power of light to banish darkness and tells the story of a vulnerable people's dedication. This collection of dynamic American Jewish leaders adds contemporary meaning to the messages and symbols of an ancient ritual.

Millennium-Felipe Fernández-Armesto 1996 Traces the progress and regress of the world's civilizations over the past thousand years and shows how the capacity of one people to influence another has shifted geographically.

The Beginning of Politics-Moshe Halbertal 2019-06-18 How the book of Samuel offers a timeless meditation on the dilemmas of statecraft The book of Samuel is universally acknowledged as one of the supreme achievements of biblical literature. Yet the book's anonymous author was more than an inspired storyteller. The author was also an uncannily astute observer of political life and the moral compromises and contradictions that the struggle for power inevitably entails. The Beginning of Politics mines the story of Israel's first two kings to unearth a natural history of power, providing a forceful new reading of what is arguably the first and greatest work of Western political thought. Through stories such as Saul's madness, David's murder of Uriah, the rape of Tamar, and the rebellion of Absalom, the author of Samuel deepens our understanding not only of the necessity of sovereign rule but also of its costs--to the people it is intended to protect and to those who wield it. Moshe Halbertal and Stephen Holmes show how these beautifully crafted narratives cut to the core of politics, offering a timely meditation on the dark side of sovereign power and the enduring dilemmas of statecraft.

The Mitzvah Project Book-Liz Sunebly 2011 Provides suggestions for meaningful mitzvah projects to complement a bar or bat mitzvah celebration, focusing on creative and compassionate projects, and includes information on the importance of mitzvah in a Jewish teen's life.

Bernard Spodek-Olivia Saracho 2013-03-01 Bernard Spodek, one of the most important figures in contemporary early childhood education, has been a seminal figure in early childhood education for approximately six decades. He has also been a creative contributor to contemporary thinking on the integration of theory, research, and practice on the development and education of young children. He is the author of numerous theoretical, research, and practical articles that continue to be published in scholarly journals and the author of textbooks that span the fields of early childhood education and child development. This book, Bernard Spodek: Early Childhood Education Scholar, Researcher, and Teacher, offers an understanding of an eminent scholar who has made significant contributions to the field of early childhood education. It has a richly detailed and intimate picture of the construction of a knowledge base for the development and education of young children. All of the chapters show how Bernard Spodek assumes various roles to promote the field of early childhood education as he functions as a mentor, scholar, researcher, and master teacher. Bernard Spodek: Early Childhood Education Scholar, Researcher, and Teacher is a text for students who are interested in acquiring the basic knowledge about early childhood education, about the work that practitioners do with young children, and about the ideas that underlie that work. It is an appropriate text for graduate students in four-year colleges and universities.

Industrial-Strength Denial-Barbara Freese 2020-04-21 How corporate denial harms our world and continues to threaten our future. Corporations faced with proof that they are hurting people or the planet have a long history of denying evidence, blaming victims, complaining of witch hunts, attacking their critics' motives, and otherwise rationalizing their harmful activities. Denial campaigns have let corporations continue dangerous practices that cause widespread suffering, death, and environmental destruction. And, by undermining social trust in science and government, corporate denial has made it harder for our democracy to function. Barbara Freese, an environmental attorney, confronted corporate denial years ago when cross-examining coal industry witnesses who were disputing the science of climate change. She set out to discover how far from reality corporate denial had led society in the past and what damage it had done. Her resulting, deeply-researched book is an epic tour through eight campaigns of denial waged by industries defending the slave trade, radium consumption, unsafe cars, leaded gasoline, ozone-destroying chemicals, tobacco, the investment products that caused the financial crisis, and the fossil fuels destabilizing our climate. Some of the denials are appalling (slave ships are festive). Some are absurd (nicotine is not addictive). Some are dangerously comforting (natural systems prevent ozone depletion). Together they reveal much about the group dynamics of delusion and deception. Industrial-Strength Denial delves into the larger social dramas surrounding these denials, including how people outside the industries fought back using evidence and the tools of democracy. It also explores what it is about the corporation itself that reliably promotes such denial, drawing on psychological research into how cognition and morality are altered by tribalism, power, conflict, anonymity, social norms, market ideology, and of course, money. Industrial-Strength Denial warns that the corporate form gives people tremendous power to inadvertently cause harm while making it especially hard for them to recognize and feel responsible for that harm.

Children's Peer Relations and Social Competence-Gary W. Ladd 2005 This book examines the role of peer relationships in child and adolescent development by tracking research findings from the early 1900s to the present. Dividing the research into three generations, the book describes what has been learned about children's peer relations and how children's participation in peer relationships contributes to their health, adjustment, and achievement. Gary W. Ladd reviews and interprets the investigative focus and findings of distinct research eras to highlight theoretical or empirical breakthroughs in the study of children's peer relations and social competence over the last century. He also discusses how this information is relevant to understanding and promoting children's health and development. In a final chapter, the author appraises the major discoveries that have emerged during the three research generations and analyzes recent scientific agendas and discoveries in the peer relations discipline.

A Phoenix Rising-Ron Duncan Hart 2007 This timely book examines the resurgence of the major civilizations of the Middle East, India, and China as they claim their historic places of power and prestige. This book explores the history, culture, religion, ethnic composition, and experience with the West of each of these world regions.

The Selected Writings and Speeches of Sir Edward Coke-Sir Edward Coke 2003 These volumes contain the most important works of the great English jurist-politician who set out to codify English common law. In his Reports and his Institutes, Coke set down a view of English law that has had a powerful influence on lawyers, judges, and politicians through the present day.

Worlds Together, Worlds Apart-Jeremy Adelman 2021-01-15 A compelling global storytelling approach to world history

Traditions & Encounters-Jerry H. Bentley 2006 "On the basis of a superficial inspection, Traditions & Encounters might look similar to several other textbooks that survey the world's past. Like other books, for example, Traditions & Encounters examines the historical development of societies in Asia, Europe, Africa, the Americas, and Oceania. Yet Traditions & Encounters differs from other works in two particularly important ways. First, it relies on a pair of prominent themes to bring a global perspective to the study of world history: it traces the historical development of individual societies in all world regions, and it also focuses attention systematically on interactions between peoples of different societies. Second, it organizes the human past into seven eras that represent distinct and coherent periods of global historical development"--Preface (Page xvi).
