Pictorial History of Japanese Motorcycles-Cornelis Vandenheuvel 1997 This is the story of the Japanese motorcycle industry which started from scratch after World War II and grew to make most of the motorcycles in existence today. It is told in a decade-by-decade narrative treatment commencing in the early 1950s and running through to the 1990s.

Halls of Fame-John D'Agata 2013-06-18 "John D'Agata is an alchemist who changes trash into purest gold." —Guy Davenport, Harper's John D'Agata journeys the endless corridors of America's myriad halls of fame and faithfully reports on what he finds there. In a voice all his own, he brilliantly maps his terrain in lists, collage, and ludic narratives. With topics ranging from Martha Graham to the Flat Earth Society, from the brightest light in Vegas to the artist Henry Darger, who died in obscurity, Halls of Fame hovers on the brink between prose and poetry, deep seriousness and high comedy, the subject and the self.

Readers will also be exposed to new cases featuring international activities of entrepreneurs and ventures throughout the world.

Partial Differential Equations and Boundary Value Problems-Nakhle H. Asmar 2000 Packed with examples, this book provides a smooth transition from elementary ordinary differential equations to more advanced concepts. Asmar's relaxed style and emphasis on applications make the material understandable even for readers with limited exposure to topics beyond calculus. Encourages the use of computer resources for illustrating results and applications, but is also suitable for use without computer access. Includes additional specialized topics that can be read as desired, and that can be read independently of each other. Denotes exercises requiring use of a computer with computer icons, asking readers to investigate problems using computer-generated graphics and to generate numerical data that cannot be computed by hand. Offers Mathematica files for download from the author's Web site; can be accessed through the Prentice Hall address <http://www.prenhall.com/pubguide/>. For engineers or anyone looking to brush up on their advanced mathematics skills.

Observatory Mansions-Edward Carey 2012-10-09 Observatory Mansions was once the Orme family's ancestral home, a magnificent residence with beautiful grounds. Now it is a crumbling apartment block, stranded on a roundabout and inhabited by eccentrics. Francis Orme, an odd little man who makes a living as a human statue in the centre of the decaying city, lives in Observatory Mansions with his parents and the other equally maladjusted misfits, all of them taking comfort in their solitude and curious harmony. In the cellar is Francis' treasured Exhibition. Carefully catalogued are all the items he has ever stolen. But the arrival of a new resident upsets the delicate balance of Observatory Mansions and Francis finds himself taking drastic measures to protect the secrets of his past and the sanctity of his collection.

Expert Systems-John Durkin 1994 Presents a step-by-step methodology for designing expert systems. Each chapter on design methodology starts with a problem and leads the reader through the design of a system which solves that problem.

Protecting His Forever-LeAnn Ashers

Calculus-James Stewart 2006

Vehicle and Engine Technology-Heinz Heisler 1999 Building upon the excellent first edition, 'Vehicle and Engine Technology, 2ed' covers all the technology requirements of motor vehicle engineering and has been rigorously updated to include additional material on subjects such as pollution control, automatic transmission, steering systems, braking systems and electrics. An ideal companion for anyone studying motor vehicle repair and servine, 'Vehicle and Engine Technology, 2ed' provides the in-depth treatment required for technician-level students, but is presented in a way which will be accessible to craft students wanting more than the bare essentials of the subject matter. Several examples of each topic application are included, describing the variations encountered in practice, making the book a useful reference for students of motor vehicle engineering.

Sociology-Robert Van Krieken 2000 This edition has been thoroughly revised to incorporate current developments in sociology, including fully updated research and statistics, Australian examples and data reflecting new developments in sociology, and new chapters on Media Globalisation and Popular Culture, and Social Research Methods.

The Christian Family Guide to Movies & Video-Theodore Baehr 1989

The Firekeeper's Son-Linda Sue Park 2009-04-20 In Korea in the early 1800s, news from the countryside reached the king by means of signal fires. On one mountaintop after another, a fire was lit when all was well. If the king did not see a fire, that meant trouble, and he would send out his army. Linda Sue Park's first picture book for Clarion is about Sang-hee, son of the village firekeeper. When his father is unable to light the fire one night, young Sang-hee must take his place. Sang-hee knows how important it is for the fire to be lit-but he wishes that he could see soldiers . . . just once. Mountains, firelight and shadow, and Sunhee's struggle with a hard choice are rendered in radiant paintings, which tell their own story of a turning point in a child's life.

A Practical Guide for Successful Church Change-Ramsey Coutta 2008-04 Church change is as inevitable as it is necessary. Pastors and church leaders can either embrace change to their benefit, or they can ignore it and watch as their church slowly becomes irrelevant. Pastors and church leaders have long needed a practical guide on how to recognize the need for change, how to plan for change, how to implement change, and how to sustain change. A Practical Guide for Successful Church Change provides just this. Pastors and church leaders will learn principles for recognizing, planning, implementing, and sustaining change. They will also learn how to cope with resistance, prepare personally for change, and effectively communicate the need for change to the church. Those who are thinking of leading change in the church will find this book exceedingly practical and useful as they seek to transform their church and ministry into a more vibrant body of believers.

How to Make Girls Chase-Chase Amante 2011-02-18

Ciao from Rome-Helen Perelman 2010

Mischief Done-J. A. O'Brien 2012 When nine-year-old Miranda Watts goes missing, suspicion falls on Samuel Curly, a local man responsible for the abduction of another girl some years previously. When another young girl is found dead the pressure on acting DI Andy Lukeson intensifies, but the trail goes cold when the search for Curly finds him dead, a suicide note protesting his innocence. If Curly is truly innocent, as Lukeson begins to believe, then there is someone out there who knows where Miranda is, and if she's still alive.

Probability-Jim Pitman 2012-12-06 This is a text for a one-quarter or one-semester course in probability, aimed at students who have done a year of calculus. The book is organised so a student can learn the fundamental ideas of probability from the first three chapters without reliance on calculus. Later chapters develop these ideas further using calculus tools. The book contains more than the usual number of examples worked out in detail. The most valuable thing for students to learn from a course like this is how to pick up a probability problem in a new setting and relate it to the standard body of theory. The more they see this happen in class, and the more they do it themselves in exercises, the better. The style of the text is deliberately informal. My experience is that students learn more from intuitive explanations, diagrams, and examples than they do from theorems and proofs. So the emphasis is on problem solving rather than theory.

Textbook of Hospital Psychiatry-Steven S. Sharfstein 2009-02-20 With decreases in lengths of hospital stay and increases in alternatives to inpatient treatments, the field of hospital psychiatry has changed dramatically over the past 20 years. As the first comprehensive guide to be published in more than a decade, the Textbook of Hospital Psychiatry is a compilation of the latest trends, issues, and developments in the field. The textbook, written by 70 national experts and clinical specialists, covers a wide range of clinical and administrative topics that are central to today's practice of hospital psychiatry. This is the only textbook on the market today that provides information for psychiatric hospital clinicians and administrators in a single all-inclusive volume. It covers information not generally available in other textbooks and medical journals, touching on a variety of cutting-edge issues, such as safety improvement, use of seclusion and restraint, suicide prevention, and culturally competent psychiatric care. The book's 35 chapters are divided into four parts: Part I, Inpatient Practice -- focuses on specialty psychiatric units (e.g., acute stabilization unit, eating disorders unit, forensic unit, child unit), including the many psychopharmacological and psychosocial treatments used within each. This section also touches on specialized treatment for patients with co-occurring problems, such as substance abuse, developmental disabilities, and legal difficulties. Part II, Special Clinical Issues -- covers clinical issues from the perspective of different populations (consumers, families, suicidal patients). This section also examines the recent trend toward patient-centered care. Part III, The Continuum of Care -- addresses psychiatric services within the community, such as rehabilitation programs, day hospitals, and emergency services. It discusses the importance of understanding hospital-based treatment within the broader perspective of patients' lives. Part IV, Structure and Infrastructure -- focuses on such often-overlooked topics as financing of care, risk management, electronic medical records, and the actual architecture of psychiatric hospitals, as well as the roles of psychiatric hospital administrators, psychiatric nurses, and psychiatrists and psychologists. An invaluable resource for both clinicians and administrators, as well as a comprehensive teaching tool for residents, the Textbook of Hospital Psychiatry is a must-have for all professionals who work in psychiatric settings.

Everyday Mathematics- 2002

Victim-Gary Kinder 2007-12-01 The New York Times–bestselling author's pioneering true crime classic: It's "Truman Capote's In Cold Blood turned inside out" (Newsweek). During an armed robbery in 1974, five hostages were holed up in the basement of a small home-audio store in Odgen, Utah, by a group of enlisted US Air Force airmen stationed at a nearby base. The victims—including wife and mother Carol Naisbitt—were brutally tortured, shot in the head, and left for dead. Incredibly Carol's sixteen-year-old son made it out alive—and "the emotional strain his family underwent during his year-long hospitalization, is the heart of Kinder's story" (Kirkus Reviews). In Victim, the first book to go beyond the headlines to tell an unfathomable story of love, loss, courage, and survival, "the crime in question becomes not merely something that happened to somebody else somewhere else, but rather an event that touches us all firsthand and very deeply." A compelling and tragic look at how lives can be changed forever by a random act of violence, it remains one of the most influential books in the victims' rights movement and has become required reading for trainees at the FBI Academy at Quantico (Boston Herald).

Fundamentals of Logic Design-Charles H. Roth 2004 Updated with modern coverage, a streamlined presentation, and an excellent CD-ROM, this fifth edition achieves a balance between theory and application. Author Charles H. Roth, Jr. carefully presents the theory that is necessary for understanding the fundamental concepts of logic design while not overwhelming students with the mathematics of switching theory. Divided into 20 easy-to-grasp study units, the book covers such fundamental concepts as Boolean algebra, logic gates design, flip-flops, and state machines. By combining flip-flops with networks of logic gates, students will learn to design counters, adders, sequence detectors, and simple digital systems. After covering the basics, this text presents modern design techniques using programmable logic devices and the VHDL hardware description language.
